COLOR SORTING

Color sorting games are great for developing problem-solving hand strength (grasping, pinching, holding) and vocabulary!

MATERIALS

- Recycled egg carton or small containers of various colors
- Markers the same color as objects.
- Poms or small solid color objects that match

LET'S TALK ABOUT IT!

- What colors do you see? What other colors are there?
- Count together! (I see 3 BLUE poms - 1, 2, 3!)
- What else is red, orange, green, blue, purple around the room?

HOW TO PLAY

Encourage your child to grasp poms and sort them color.

Safety tip: Always supervise your child as they play with these items. Don’t let children chew on or put items in their mouths.
