HOMEMADE BLOCKS

Open-ended play, such as building with blocks, helps children learn how to problem solve, create, and build fine and gross motor skills.

MATERIALS
- Cereal boxes
- Paper cups
- Small package boxes
- Small snack boxes

HOW TO PLAY
Encourage your child to build their own creation and explore the materials. Recreate this at home using cereal boxes to make blocks, paper cups, or other fun “construction” materials you have at home.
Safety tip: Always supervise your child with these materials.

LET’S TALK ABOUT IT!
- Ask your child, “What should we make today?”
- Encourage your child to build a tall tower! Ask them how many blocks or cups they think they can stack and then count each together as they stack them as high as they can.
