Summary

Main entry:	Sonnabend, Joseph A.
Title:	Joseph A. Sonnabend Papers, 1963-2004
Size:	9.4 linear feet (24 boxes)
Source:	Gift of Joseph A. Sonnabend, July 2005.
Abstract:	Joseph A. Sonnabend is a physician, laboratory scientist, clinical researcher, and community activist who contributed immeasurably to the fight against AIDS. As a pioneer in community-based research, he co-founded the AIDS Medical Foundation (later to become the American Foundation for AIDS Research, or amfAR) and the Community Research Initiative/Community Research Initiative on AIDS, as well as the PWA Health Group. In addition to creating community organizations, Dr. Sonnabend treated patients and conducted research into AIDS for the first twenty-three years of the epidemic in New York City, and helped create the first safe-sex guidelines. The Joseph A. Sonnabend Papers contain interviews, lectures, and press clippings; correspondence; published and near-print materials; legal case files and depositions; organizational records, clinical trial records, and grant applications and research proposals; scientific research, article drafts, charts, graphs, and notes; conference materials; and ephemera. The materials in this collection date from 1963 through 2004.
Access:	Apply in the Special Collections Office for admission to the Manuscripts and Archives Division.
Preferred citation:	Joseph A. Sonnabend Papers, Manuscripts and Archives Division, The New York Public Library.

Biographical note

Physician, laboratory scientist, clinical researcher, and community activist Joseph A. Sonnabend was born in South Africa on January 6, 1933. Sonnabend received his MBBCh from the University of Witwatersrand in Johannesburg in 1956 and trained in the United Kingdom. Specializing in infectious diseases, Sonnabend became a Member of the Royal College of Physicians (MRCP) of Edinburgh in 1961. In 1963, he joined the scientific staff at the National Institute for Medical Research in London, where he was the last scientist to work with Alick Isaacs, one of the discoverers of interferon, on interferon research. In the early 1970s, Sonnabend permanently moved to New York City, where he worked as an associate professor and as an associate attending physician at medical centers in Brooklyn. In 1977, he began working for the Bureau of Venereal Disease Control for New York City's Department of Health. During this time Sonnabend also volunteered at the Gay Men's Health Project, a clinic specializing in venereal diseases affecting gay men.

Around 1978, Sonnabend began practicing private medicine for the first time when he opened a practice in Greenwich Village specializing in infectious and sexually transmitted diseases. Sonnabend's background as a microbiologist, virologist, and infectious disease specialist uniquely prepared him for the pandemic to which he would devote his life. His practice in Greenwich Village consisted primarily of gay men and he soon saw compromised immunity in his patients; Dr. Sonnabend was one of the first physicians to recognize that something out of the ordinary was affecting his patients. Having had the majority of his professional training and experience situated in the scientific laboratory, Sonnabend was in the unique position to be both treating patients and conducting research.

Calling upon his fellow scientists, Sonnabend soon created a network of experts to run tests on the samples he would send them. Independent of government agencies, his urgent inquiry into the new illness saw him freeze his patients' samples in his practice's refrigerator and ship them overnight. Sonnabend paid for his investigations out of his own pocket and soon ran out of money. Turning to an old interferon colleague, Dr. Mathilde Krim, with interesting research ideas, Sonnabend and Krim founded the AIDS Medical Foundation in April 1983 to raise private funds to support research on AIDS. This was the first of three community AIDS organizations that Sonnabend would found within four years. He went on to co-found both the Community Research Initiative and the PWA (People with AIDS) Health Group in 1987. As a pioneer in community-based research with experience in both the scientific laboratory and the examining room, he was able to bridge the gap between two traditionally separate fields to bring his experience directly to the community. Sonnabend brought a "do it yourself" attitude to his fight against AIDS. In addition to co-founding these three highly respected organizations, Sonnabend also served on the boards of other organizations and was actively involved in the AIDS community.

Along with Michael Callen and Richard Berkowitz, Sonnabend is credited with creating safe sex as we know it today. Vilified by members of the gay community upon its release in 1983, *How to Have Sex in an Epidemic* provided the first safe sex guidelines and spawned prevention education. Sonnabend was also greatly concerned with the ethical issues raised by this new illness. In 1983, Sonnabend and his co-authors won the Nellie Westerman Prize for Research in Ethics awarded by the American Federation for Clinical Research for their article "Confidentiality, Informed Consent and Untoward Social Consequences in Research on a 'New Killer Disease' (AIDS)" in *Clinical Research*.

Due to his background as a virologist and infectious disease expert specializing in sexually transmitted diseases, Sonnabend developed a theory early in the pandemic that proposed a multifactorial model for AIDS. The model theorized that AIDS in gay men was caused by repeated exposure to specific factors, notably Epstein-Barr virus, cytomegalovirus, and semen. Published in 1984, the model went against the popular theory that a single, new infectious agent was the cause of AIDS. After the identification of the retrovirus that would come to be known as HIV, Sonnabend stood by his argument that multiple factors cause AIDS; he continued to question the role of HIV in AIDS until the late 1990s. This stance caused him to be labeled a dissident, which subsequently effected

his research funding and publication acceptance. This dissident status was later compounded by his questioning the toxicity of early AZT therapy.

Although labeled a dissident and relegated for years to the periphery, Sonnabend's devotion to his patients and his fight against AIDS continued undiminished. He retired in 2005 and returned to London. On World AIDS Day (Dec 1st) of that year he was honored for his outstanding leadership with a Red Ribbon Leadership Award from the National HIV/AIDS Partnership (NHAP). Similarly, he was one of the first individuals to be honored by amfAR as one of their Award of Courage Honorees in the award's inaugural year, 2000.

Scope and content note

The Joseph A. Sonnabend Papers contain interviews, lectures, and press clippings; correspondence; published and near-print materials; legal case files and depositions; organizational records, clinical trial records, and grant applications and research proposals; scientific research, article drafts, charts, graphs, and notes; conference materials; and ephemera. The materials in this collection date from 1963 through 2004.

This collection documents the work of a laboratory scientist, physician, clinical researcher, and community advocate from the onset of the AIDS epidemic. It is especially significant since it documents both the scientific and community efforts of the first twenty-three years of the epidemic in New York City. The papers are particularly strong in documenting both Dr. Sonnabend's belief in and commitment to community organizations, especially regarding the community-based research he pioneered, as well as his approximately forty years of research into interferon and AIDS. Dr. Sonnabend's private life is not documented in this collection.

This collection also documents Dr. Sonnabend's professional relationship with Dr. Mathilde Krim through correspondence and organizational records, tracing their relationship from their early days as interferon colleagues through their work establishing community AIDS organizations.

Prior to giving his papers to The New York Public Library, Dr. Sonnabend grouped them by subject. His organization was used as a basis for the arrangement of this collection; since he imposed this order upon his papers, materials were not separated unless clearly misfiled. For example, drafts associated with his research files were left in Series VI.A.1. National Institute for Medical Research, Mill Hill, London rather than being separated into Series II. Writings. Given the nature of AIDS research, confidential medical information has been removed from the collection. In some cases, small amounts of identifying information have been redacted in order to retain the other information present.

Arrangement note

The Joseph A. Sonnabend Papers are organized in the following series:

Series I. Biographical files, 1981-1995, 1998, 2004, n.d. Series II. Correspondence, 1970-2004, n.d. Series III. Writings, 1964-circa 2001, n.d. Series IV. Legal case files, 1982-1987, 1991-1992, n.d. Series V. Community AIDS organizations, 1980-1999, n.d. Series VI. Research files, 1963-2001, n.d.

Series V. Community AIDS organizations is divided into four sub-series: V.A. American Medical Foundation, V.B. Community Research Initiative/Community Research Initiative on AIDS, V.C. PWA Health Group, and V.D. Other organizations.

V.A. AIDS Medical Foundation, 1980-1991,1995,1997, n.d. 3 boxes

The AIDS Medical Foundation was founded by Drs. Sonnabend and Mathilde Krim in April 1983 as a nonprofit organization to raise private funds for AIDS research. Sonnabend served as the chairman of the scientific committee and as a member of the Institutional Review Board from 1983 until his resignation in 1985 over differences in opinion regarding the AIDS threat to heterosexuals. After Sonnabend's departure, the AIDS Medical Foundation merged with the National AIDS Research Foundation in September 1985 to form what is now known as the American Foundation for AIDS Research (amfAR).

Fol

The Community Research Initiative (CRI) began as a sponsored project of the People with AIDS Coalition (PWAC) in 1986/1987. Enlisting the help of Dr. Mathilde Krim, CRI became its own nonprofit organization dedicated to New York City community-based research on AIDS in 1987. CRI brought together people with AIDS, community physicians, and clinical researchers in a collaborative fight against AIDS. The organization focused on performing clinical trials in the community setting, rather than as part of government conducted trials. CRI served as a model of community-based research and was praised by the President's Commission on AIDS.

Dr. Sonnabend served as a member of the Board of Directors, Institutional Review Board, and Scientific Advisory Committee. In 1990, CRI dissolved due to financial issues, but reconstituted in 1991 as the Community Research Initiative on AIDS (CRIA; now known as the AIDS Community Research Initiative of America, or ACRIA). Sonnabend left CRIA in 1996 over clashes with the Board of Directors and the new executive director.

V.C. PWA Health Group, 1987-1994, 1997-1999, n.d. 2 boxes

In 1987, Dr. Sonnabend co-founded the PWA (People with AIDS) Health Group with Thomas Hannon and Michael Callen. Initially formed to distribute egg lipids (AL 721), the organization evolved into a buyer's club where PWAs could get treatments not yet approved in the U.S. Of the many organizations he was involved with, Sonnabend's relationship with the PWA Health Group was the most successful, lasting until the group closed in 2000.

Series VI. Research files, 1963-2001, n.d.

12 boxes

Series VI. Research files is divided into three sub-series: VI.A. Interferon, VI.B. Sexually transmitted diseases, and VI.C. AIDS.

The majority of the materials in this series have been kept in their original order at the folder level.

VI.A. Interferon, 1963-1978, n.d.

5 boxes

Sub-series VI.A. Interferon is divided into three sub-sub-series: VI.A.1 National Institute for Medical Research, Mill Hill, London, VI.A.2. New York, and VI.A.3 Miscellaneous. The material contained in this sub-series has been arranged into sub-sub-series by the location where the research was conducted; when possible, the institution associated with the research has been identified.

VI.A.1. National Institute for Medical Research, Mill Hill, London, circa 1963-circa 1973, n.d.
