Dear Sir or Madam

We hereby acknowledge receipt of your Freedom of Information Law ("FOIL") request. Your request is important to us and will be handled as expeditiously as possible. Please be advised however, that because of the large volume of pending complex FOIL requests handled by the Department of Environmental Protection ("DEP"), and the available staffing, your response is anticipated to be between 120-150 days from the date of this acknowledgement.

Please also be advised that for requests that appear to be submitted in connection with a Phase I site assessment of a property, DEP's response will exclude records relating to asbestos, and discharges into the sewers, as non-scope items, unless the FOIL request explicitly asks for those records. To the extent you require this information, please specify so in the FOIL request. In addition, any information on boiler permits filed with DEP is already publicly available at the following website <https://a826-web01.nyc.gov/DEP.BoilerInformationExt/>. Accordingly, DEP's response assumes you have directly obtained any relevant records from that website, and will exclude those records, as well.

Sincerely,
Deborah S. Fremder
Records Access Officer

NEW YORK CITY DEPARTMENT OF HEALTH AND MENTAL HYGIENE

FREEDOM OF INFORMATION LAW REQUEST FORM

To: Records Access Officer
NYC Department of Health and Mental Hygiene
42-09 28th Street, 14th Floor, CN 31
Long Island City, NY 11101
Phone: (347) 396-6078/6116
Fax: (347) 396-6087
recordsaccess@health.nyc.gov

Date 5 / 23 / 17

Dear Record Access Officer:

I, Carla Stout request copies of any inspection reports and/or records located in the Bureau of Environmental Health Services, of the New York City Department of Health and Mental Hygiene.

The records pertain to:

- Lead Poisoning, Animal bite, Employment/Human Resources, Contracts/RFPs, Pest Control, Correctional Health, Early Intervention, Food Safety, Mental Health, Communicable Diseases, School Health, Day Care, Other: Please see below

Please specify/describe the records you are requesting from the above program(s): Provide the following records for Block 3245, Lot 3 and Block 3244, Lot 1 in the Bronx: The status and description of any reported petroleum spills or tanks, copies of any record of decision regarding investigation of clean up of site; notification of the lead agency that is primarily responsible for investigating the cleaning up of the site; notification of any legal action involving the site, and detailed reports, monitoring data, regulatory non-compliance, documents and/or or studies regarding any pollution problems at the site, and how I may obtain copies of them.

There is a charge of 25¢ per page or actual costs of reproduction, payable in advance.

Requester's Name: Carla Stout (Please print)

Subject: FOIL Request :: W022403-052317

Dear Carla:

Thank you for your Freedom of Information Law (FOIL) request. Your request has been received and is being processed. Your request was received in this office on 5/23/2017 and given the reference number FOIL #W022403-052317 for tracking purposes. You may expect the Department's response to your request no later than 6/22/2017.

Record Requested: For Block 3245, Lot 3 and Block 4344, Lot 1 in the Bronx, the status and description of any reported petroleum spills or tanks, copies of any record of decision regarding investigation of clean up of site; notification of the lead agency that is primarily responsible for investigating the cleaning up of the site; notification of any legal action involving the site, and detailed reports, monitoring data, regulatory non-compliance, documents and/or studies regarding any pollution problems at the site, and how I may obtain copies of them.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed. Again, thank you for using the FOIL Center.

Governor Nelson A. Rockefeller Empire State Plaza

Albany, New York 12237

1. TO THE NEW YORK STATE DEPARTMENT OF HEALTH:

I hereby apply to **Inspect** or **Receive Copies** of the following records (use additional sheets as needed and attach)

Block 3245, Lot 3 and Block 3244, Lot 1 in the Bronx - Status and description of any reported petroleum spills or tanks, copies of any record of decision regarding (see additional sheet)

NAME: Carla Stout PHONE: () 212-221-7822 EMAIL: _____

FIRM: TRC Engineers, Inc. cstout@trcsolutions.com

ADDRESS: 1430 Broadway, 10th Floor, New York, NY

SIGNATURE: _____  DATE: 5/23/2017

2. TO THE APPLICANT:

-Records Provided

The reproduction costs for the records are \$ _____. Please forward a check payable to the New York State Department of Health to the address listed above. If we do not receive your payment within **60** days, we will assume that you no longer wish to receive the materials, and they will be sent back to the originating unit. Accordingly, any future requests for information will require an initial deposit before processing.

Records have been (partially, fully) provided. (If not fully provided, date when records are expected to be fully provided: _____).

-Records Not Available

Records cannot be found after a diligent search.

The Department does not maintain records indicated, please contact: _____

-Records Denied or Redacted

I hereby certify that access to the records—or part of the records—have been denied to the applicant for the reason(s) checked below (You may appeal this denial of access in writing within 30 days to the Records Access Appeals Officer, Empire State Plaza, 1455 Corning Tower, Albany New York 12237):

Specifically exempt by other statute(s).

Unwarranted invasion of personal privacy.

Would impair present or imminent contract awards or collective bargaining negotiations.

Are examination questions or answers.
Are inter-agency or intra-agency materials that are not: -statistical or factual tabulations or data

-instructions to staff that affect the public
-final agency policy or determinations; or
-external audits, including but not limited to audits performed by the comptroller and the federal government.

Are trade secrets.

Could, if disclosed endanger the life of any person.

Are compiled for law enforcement purposes and which, if disclosed would:
-interfere with law enforcement investigations or judicial proceedings
-deprive a person of the right to a fair trial or impartial adjudication
-identify a confidential source or disclose confidential information relating to a criminal investigation, or
-reveal criminal investigative techniques and procedures

Would jeopardize an agency's capacity to guarantee the security of its information technology assets, such assets encompassing both electronic information systems and infrastructures.

Department Representative _____ Date: _____

(continued from Section 1 of application)

investigation of clean up of site; notification of the lead agency that is primarily responsible for investigating the cleaning up of the site; notification of any legal action involving the site, and detailed reports, monitoring data, regulatory non-compliance, documents and/or studies regarding any pollution problems at the site.

FOIL # 17-05-382

Dear Ms. Stout:

This will acknowledge receipt of your request for records under the Freedom of Information Law, received by this office on May 23, 2017.

Your request has been forwarded to the appropriate Department program area(s) to identify documents that are responsive to your request and which may be made available pursuant to all applicable provisions of the Freedom of Information Law.

A determination as to whether your request is granted or denied will be reached in approximately 20 business days or we will notify you in writing if the responsible program area(s) should require additional time to locate, assemble, and review documents that may be responsive to your request.

Please note that, pursuant to Article 6 of the Public Officers Law, a charge may be applied to your request, including the actual cost of the medium used to respond to your Freedom of Information Law request and/or other related costs. When responsive records have been identified, you will be informed of any cost and how payment should be made.

Sincerely,

Rosemarie Hewig, Esq.

Re: FOIL #: 17-05-382

Dear Ms. Stout:

This letter responds to your Freedom of Information Law request of May 23, 2017, in which you requested environmental records regarding "Block 3245, Lot 3 ... West 192 Street, Bronx, NY; and ...Block 3244, Lot 1 ... Landing Road, Bronx, NY." Please be advised that after conducting a diligent search, no records responsive to your request have been located.

Should you feel that you have been unlawfully denied access to records, you may appeal such denial in writing within 30 days to the Records Access Appeals Officer, Division of Legal Affairs, Empire State Plaza, 2438 Corning Tower, Albany, New York, 12237-0026.

If you require additional information or wish to discuss this matter further, please do not hesitate to contact me at (518) 474-8734.

Sincerely,

Rosemarie Hewig, Esq.

RE: PUBLIC RECORDS REQUEST of 5/23/2017, Reference # W022403-052317

Dear Carla Stout,

I write in response to your Freedom of Information Law (FOIL) request seeking:
For Block 3245, Lot 3 and Block 4344, Lot 1 in the Bronx, the status and description of any reported petroleum spills or tanks, copies of any record of decision regarding investigation of clean up of site; notification of the lead agency that is primarily responsible for investigating the cleaning up of the site; notification of any legal action involving the site, and detailed reports, monitoring data, regulatory non-compliance, documents and/or studies regarding any pollution problems at the site, and how I may obtain copies of them..

A diligent search of the files maintained by the Department produced no responsive records.

If I can be of further assistance, please contact me at (718) 482-4940 and reference FOIL W022403-052317.

Sincerely,
Region 2 FOIL Coordinator

**APPENDIX E:
TRC STAFF AND ENVIRONMENTAL PROFESSIONAL
QUALIFICATIONS/RESUMES**

JENNA N. RAUP

EDUCATION

B.A. Chemistry, Minor in Environmental Science, State University of New York at Buffalo, 2010

AREAS OF EXPERTISE

Ms. Raup has five years of environmental experience. Her experience includes: due diligence investigations and assessments, polychlorinated biphenyls (PCB) soil investigations and remediation, hazardous materials building assessments, remediation oversight, groundwater monitoring well sampling, product gauging and LNAPL extraction, monitoring well installation oversight, soil sampling, implementation of community air monitoring plans (CAMP), and fuel release investigations.

Ms. Jenna N. Raup, has experience in the following general areas:

- Project Management
- Remedial Activity Oversight and Management
- Ambient and Community Air Monitoring
- Soil, Groundwater, and Soil Vapor Investigations and Remediation
- Environmental Media Sampling
- Field Sampling Equipment and Calibration
- Data Management
- Report Preparation
- Regulatory Compliance
- State Permit Discharge Elimination System Permit Compliance
- Analytical Chemistry

REPRESENTATIVE EXPERIENCE

New York City School Construction Authority

Ms. Raup serves as Project Manager performing site assessments, investigations, and remediation for new construction and renovations of New York City public schools. Additionally, Ms. Raup manages remedial activities associated with existing and proposed school facilities that are NYSDEC State Hazardous Waste Sites (SHWS) including authoring Interim Remedial Measure Work Plans, Construction Completion Reports, Site Management Plans, and Final Engineering Reports; and, managing the remediation of SHWS. Ms. Raup's project management responsibilities include coordination with NYCSCA project managers, regulators, contractors, and supervision of field staff. Additionally, Ms. Raup serves as an environmental scientist performing Phase I Environmental Site Assessments, Phase II Environmental Site Investigations, Indoor Air Quality Investigations, Outdoor Air Assessments and preparation of an

Environmental Easement. Ms. Raup's responsibilities have included all aspects of preparation of reports and all elements of field investigations, subcontractor supervision, and report preparation associated with completion of due diligence assessments. Furthermore, Ms. Raup performed excavation oversight during PCB remediation activities. Ms. Raup's responsibilities included implementation of the Community Air Monitoring Plan (CAMP) and collection of post-excavation soil samples. Ms. Raup also assisted with the preparation of the PCB Remediation Summary Report.

Kosciuszko Bridge Replacement, Brooklyn/Queens, New York

Ms. Raup serves as the Environmental Compliance Inspector and Project Scientist on the Kosciuszko Bridge Replacement Project. Ms. Raup prepared the Water Quality Monitoring Plan, contributed to the preparation of various other project plans (i.e., Contaminant Management Plan, CAMP, and Construction HASP), prepared waste disposal applications for disposal of hazardous and non-hazardous soils, and performed oversight and endpoint sampling for the excavation of soil with hazardous levels of lead. In preparation of project activities, Ms. Raup assisted in the preparation of an extensive cost estimate for proposed environmental oversight activities during construction/demolition associated with the Kosciuszko Bridge replacement. During construction, Ms. Raup conducts environmental compliance audits to verify compliance to project plans and requirements and prepares monthly progress reports to document remedial activities on an inactive hazardous waste site within the project limits.

CSX Transportation, Inc., New York and New Jersey

Ms. Raup serves as a Project Manager for stormwater pollution prevention plan (SWPP Plan) compliance and sampling and spill prevention controls and countermeasures (SPCC) plan updates at railroad yards located in New York City and New Jersey. Ms. Raup's responsibilities include coordinating with CSX project managers, arranging analysis through the CSX laboratory program, training field personnel on sample collection, and completing five-year updates to the site-specific SPCC Plans in accordance with 40 CFR Part 109, Attachment 2.

CSX Transportation, Inc. – Pittsburgh Intermodal Rail Terminal Pittsburgh, Pennsylvania

Ms. Raup serves as Project Manager for the Pittsburgh Intermodal Rail Terminal redevelopment through the Pennsylvania Land Recycling Program. Ms. Raup's responsibilities include administrative management of the project (i.e., budget oversight, preparation of change orders, and coordination with the project team). Additionally, Ms. Raup serves as a Project Scientist and performed Phase I Environmental Site Assessments (ESAs) for 17 separate parcels to be acquired for development of the property; authored the Baseline Remedial Investigation Work Plan and Baseline Environmental Report; performed data management; and contributed to portions of a Consent Order and Agreement.

CSX Real Property, Inc.

Ms. Raup serves as the project manager on several environmental due diligence related projects. Ms. Raup's responsibilities include coordination with CSX project managers and site representatives and preparation of several Phase I ESA reports in New York, Virginia, and Pennsylvania.

New York City Economic Development Corporation – NYC

Ms. Raup serves as a Project Scientist for task relating to environmental due diligence as well as construction oversight. Ms. Raup has prepared several Phase I ESA reports and performed on-site environmental inspection activities including implementation of a Community Air Monitoring Plan (CAMP), verifying compliance with the Site Health and Safety Plan and Remedial Action Plan, oversight of excavation work, quantifying materials imported to the Site, and preparing daily reports for submittal to the New York City Economic Development Corporation.

The Port Authority of NY & NJ

Ms. Raup performed the five-year Major Oil Storage Facility (MOSF) Inspection Certification of Secondary Containment report for the bulk and satellite fuel farms located at John F. Kennedy Airport (JFK). Ms. Raup performed a thorough inspection of all secondary containment of petroleum storage tanks, documented findings, and prepared all aspects of the engineering report for submission to New York State Department of Environmental Conservation (NYSDEC). Additionally, Ms. Raup served as a Project Scientist on various other Port Authority projects. Her responsibilities included soil and groundwater sample data review and tabulation, assistance with final environmental investigation reports, implementation of remedial investigations, performance of Phase I ESAs, developing soil pile sampling programs in accordance with DER-10, and organization/tabulation of data collected from petroleum remediation treatment systems.

New York State Department of Environmental Conservation – Standby Environmental Engineering Services Contract

Under TRC's contract with the NYSDEC to provide environmental engineering services for investigation and remediation of "State Superfund" sites, Ms. Raup has served as a Project Scientist in connection with Remedial Investigations at several project sites. Her responsibilities have included quality assurance/quality control reviews of analytical data summary tables presenting soil and groundwater sampling results, assistance with preparation of remedial investigation reports, and implementation of groundwater sampling. Ms. Raup also prepares and uploads sample data to the EarthSoft Environmental Quality Information System (EQUIS) data management software in accordance with NYSDEC requirements.

Civic Builders – New York City

Ms. Raup serves as Project Manager for tasks relating to environmental due diligence and subsurface investigations services for Civic Builders, a developer of new charter schools in New York City. Ms. Raup has been responsible for preparation of Phase I Environmental Site Assessment reports and Phase II Environmental Site Investigation reports for existing and proposed school sites.

SPECIALIZED TRAINING

- NYSDOH Certified Chemist
- 10-Hour OSHA Construction Training
- 40-Hour HAZWOPER Training
- 8-Hour OSHA HAZWOPER Refresher Training
- First Aid/CPR
- Roadway Worker Training
- E-Railsafe
- Transportation Worker Identification Card (TWIC)

CARLA STOUT

PROPOSED PROFESSIONAL TITLE: ASSOCIATE ENVIRONMENTAL SCIENTIST

YEARS OF ENVIRONMENTAL CONSULTING EXPERIENCE: 25

EDUCATION

B.A., Philosophy, Hamilton College, 1979

AREAS OF EXPERTISE

Ms. Stout has management and technical experience in the following general areas:

- Quality control
- Technical writing
- Regulatory program requirements
- Creation and administration of computer-based management systems
- Supervision of technical publications activities
- Subcontractor management and performance monitoring
- Cost estimating

New York City School Construction Authority (NYCSCA), Long Island City, NY

Ms. Stout provided technical writing/editing and report preparation services for the Pilot Study to Address PCB Caulk in New York City School Buildings that is being undertaken as a result of a USEPA consent and final order. The Pilot Study consists of an investigation of the sources of PCBs in five New York City schools, including, but not limited to, PCBs in caulk, ballasts, and soil. Ms. Stout, as part of a multi-disciplinary team, wrote, edited and coordinated the preparation of the Final Remediation Investigative Report and a Summary Report. Once the Summary Report was reviewed by USEPA Peer Reviewers, Ms. Stout summarized the Peer Review comments and participated in the team who developed responses to the comments. In ongoing support for the PCB Caulk Pilot Study, Ms. Stout authors the reports on long-term monitoring in the pilot schools.

National September 11 Museum and Memorial, New York, NY

As the environmental consultant for the National September 11 Museum and Memorial (NS11MM), TRC collected samples for asbestos, lead, and other constituents of concern from the objects that were slated for the Open-Mount (i.e., objects that are not encased) exhibit at the museum. Objects that tested positive for constituents of concern were cleaned and retested, sometimes twice or three times. Sample results and cleaning techniques were meticulously documented in individual Open-Mount Object data sheets, a spreadsheet and in a comprehensive final report prepared by Ms. Stout. The spreadsheet also documented cleaning activities that occurred after the museum was flooded by Hurricane Sandy. Ms. Stout provided an audit several weeks before the museum opening to ensure that all

the 95 Open-Mount objects in the exhibit had been properly cleared through sample results. In addition to the Open-Mount object project, Ms. Stout prepared reports for ad hoc investigations at the museum including the installation of the “Chelsea Jeans” exhibit that involved encasing clothing that had been covered with asbestos-containing dust and the sampling of artifacts that were slated for storage.

Starwood Capital Group, Environmental Services for Redevelopment of the Former United Hospital Site, Port Chester, New York

For this century-old former hospital comprised of 17 different buildings and an occupied apartment building, Ms. Stout authored the Phase I Environmental Site Assessment. Because the property buildings are slated for demotion and redevelopment, Ms. Stout also authored the Limited Hazardous Building Materials Assessment Report that ascertained approximate amounts of hazardous waste. On the basis of the findings associated with these activities and the planned redevelopment, an Environmental Impact Statement (EIS) was prepared in accordance with SEQRA regulations with respect to hazardous materials. The EIS underwent numerous reviews and Ms. Stout updated the statement based on agency and other comments.

Richmond Recycling, LLC for Vanbro Corporation, Staten Island

TRC is retained by Richmond Recycling, LLC (Richmond) to act as the third-party oversight engineer/consultant firm to review source material that is being submitted for acceptance and processing at the Vanbro Corporation (owner/operator), New York State Department of Environmental Conservation (NYSDEC) Part 360 Registered C&D Processing Facility. Ms. Stout provides the initial review of various documents including Phase I Environmental Site Assessments, Phase II Environmental Site Investigations, Geotechnical reports, remedial investigation reports and plans, etc. and she compares the laboratory results to NYCDEC Soil Cleanup Objectives to determine if the source materials is acceptable for importation to the Vanbro facility

Spectra Energy Partners, LP, Waltham, MA

For Algonquin Gas Transmission, LLC, an indirect, wholly-owned subsidiary of Spectra Energy Partners, LP, Ms. Stout provides writing, editing and quality control services for the Stormwater Pollution Prevent Plan (SWPPP) for the following two projects:

- Algonquin Incremental Market (AIM) Project that includes the take-up and relay of Algonquin’s existing 26-inch diameter pipeline with approximately 15.7 miles of new 42-inch diameter pipeline in New York. This project involves several aboveground facilities (each provided for agency-approval as an amendment) and part of the pipeline traverses the New York Watershed that involves close scrutiny by the New York City Department of Environmental Protection (NYCDEP). The SWPPP had to satisfy the requirements and needs of several concerned agencies as well as eight (8) municipalities.

- Atlantic Bridge Project that includes the take-up and relay of Algonquin's existing 26-inch diameter pipeline with approximately 4.0 miles of new 42-inch diameter pipeline in New York. Most of the pipeline is located within the New York City Watershed and the Project includes aboveground facilities and meets the requirements and needs of multiple agencies (including the NYCDEP) as well as two (2) municipalities.

New York State Governors Office of Storm Recovery (GOSR), Housing Recovery Program, Albany, New York

Ms. Stout performed quality control services for this New York State project whose aim is to assist homeowners to recover from Hurricane Sandy. The project involved multiple lead and asbestos surveys a day (as many as 10), generating as many as 20 survey reports. Ms. Stout coordinated streamlining of data from the field, supervised and trained a team of report writers, provided quality control on each report, and ensured that the quick turnaround time was adhered to. Through her efforts, the report process has been described as "practically running itself."

Consolidated Edison of New York, Inc., EH&S Procedures, New York, NY

Under two Environmental, Health and Safety (EH&S) Procedures contracts, Ms. Stout provided technical review and writing services for the client's Steam Operations organization. Activities included writing and review of Steam Generating Station EH&S and operating procedures, with emphasis on water vulnerability and SPDES permit compliance; editing and review coordination of Steam Operations Central Operations Procedures (COPs); and updating department environmental and safety performance statistics. Ms. Stout also developed self-assessment checklists used by the stations to ensure compliance with environmental and safety laws and regulations and company policy.

Posillico Development Company at Harbor Island, Inc., Former Cibro Petroleum Terminal Site, Island Park, NY

For this NYSDEC Brownfield Cleanup Program Site, Ms. Stout reviewed historical soil and groundwater sample results. Ms. Stout prepared the data tables for the Remedial Work Plan as well as involvement in the preparation of drawings that showed the delineation of contaminated soil. Subsequently, Ms. Stout reviewed and prepared data tables for soil sample results for a soil cleanup pilot study at the site.

New York City School Construction Authority (NYCSCA), Long Island City, NY

Ms. Stout provided report preparation services for the Final Remedial Investigation Report for the PCB Pilot Study.

National Grid, Glenwood Power Station, Glenwood, NY and Far Rockaway Power Station, Far Rockaway, NY

For the demolition of two power plants, Ms. Stout coordinated documentation of submittal receipt and review.

Consolidated Edison of New York, Inc., 1st Avenue Properties, New York, NY

Under the NYSDEC Brownfield Cleanup Program Site, following the remediation and demolition of this Con Edison power plant and associated buildings, Ms. Stout provided report preparation support for the Final Engineering Report and Site Management Plan.

New York City Department of Parks & Recreation, Ferry Point Park Golf Course Development, Bronx, NY

For the Ferry Point Park construction project, Ms. Stout reviewed pertinent data regarding fill material, including sample results and historical site uses, and prepared reports for the Parks and Recreation Department and the NYSDEC.

Consolidated Edison of New York, Inc., Subject Matter Expert Support, New York, NY

Under a Subject Matter Expert contract, Ms. Stout provided technical review and writing services. Ms. Stout worked on numerous Corporate Environmental Procedures (CEPs), General Environmental Instructions (GSIs), Corporate Safety Procedures (CSPs), and General Safety Instructions (GSIs), and other Con Edison guidance documents, including:

- **General Environmental and Safety Instructions:** Ms. Stout streamlined over 200 documents and, working with Con Edison field forces, revised the documents to ensure accuracy, adherence to regulations, and to make the documents more user-friendly.
- **Corporate Environmental and Safety Procedures:** Working with Con Edison corporate personnel and field forces, coordinated the development and review of various environmental policy and safety procedures. Subject areas included hazardous and PCB waste management, oil and chemical management, wastewater management, land use, release reporting, sampling protocols, employee safety, and fire prevention.
- **Environmental and Safety Checklists:** Developed and updated a checklist used by engineers to ensure that environmental and safety concerns are addressed in the engineering phase of a construction project. Ms. Stout also developed a teaching manual for the checklist.
- **Manuals:** Ms. Stout provided technical editing services for a DOT Hazardous Materials Manual and a Vehicle Safety Manual confirming that the documents conformed to regulations and Con Edison policy.

U.S. Environmental Protection Agency, Asbestos in Dust Background Survey

Ms. Stout performed quality control activities for a USEPA contract to determine background levels of asbestos in dust in New York City to address indoor dust issues at the World Trade Center site. Ms. Stout wrote the Quality Control Plan and Health and Safety Plan for the sampling effort and reviewed the Sampling Plan.

Cleary, Gottlieb, Steen & Hamilton, Reoccupancy Services, New York, NY

In the fall of 2001, TRC was contracted by Cleary, Gottlieb, Steen & Hamilton (CGS&H), a corporate law firm near the World Trade Center site, to provide environmental consulting services for eight office floors (over 300,000 square feet). TRC conducted extensive sampling of the interior space and of the outside air quality as well as sampling during and after the clean up of the HVAC system. Over 800 air, microvacuum, and wipe samples were collected and analyzed for a variety of analytes including asbestos, lead, VOCs, SVOCs, metals and fungi and bacteria. Ms. Stout was responsible for the collation and reporting of sample results.

New York City Law Department, Reoccupancy Services, New York, NY

In the fall of 2001, TRC was retained to perform project management and monitoring services for the New York City Law Department's (NYCLD) offices near the World Trade Center site. TRC conducted extensive sampling of the interior space of the building including the NYCLD six floors of office space, the HVAC system and the cellar and subcellar, the latter having been flooded after the World Trade Center collapse. Air, microvacuum and wipe samples were collected for analysis for asbestos, metals, VOCs, SVOCs, fungi and bacteria. Ms. Stout collated, organized, and reported on the over 2,500 sample results involved in this effort.

Various Clients, Sample Results Services, New York

Ms. Stout provided sample collation and reporting services for numerous clients including U.S. Environmental Protection Agency, New York City Department of Health, NYC Transit Authority, and NYC Department of Design and Construction.

City of Yonkers, Brownfield Database, Yonkers, NY

Ms. Stout was the Project Manager for the Economic Development Office of the City of Yonkers to collect information on brownfields in Yonkers and to create a database documenting the information. Ms. Stout identified over 150 properties and researched information including ownership, property size, adjacent property use, prior use, and factors that could be environmentally adverse. The sites were visited to determine and/or confirm the potential environmental issues. The sites were then ranked according to various factors such as occupancy, property assessment, suspected environmental concerns, size and environs. In addition to the creation of the Access database, Ms. Stout provided the City of Yonkers with a database report, a communications plan, and a map, all of which were made available to the public.

U.S. Environmental Protection Agency, Region II, Enforcement Support Services, New York, NY

Ms. Stout provided the following services:

- **Reporting Function:** As Project Manager, Ms. Stout was responsible for financial reporting. Specific responsibilities included preparation and review of monthly progress reports; preparation of invoice and site-specific voucher in accordance with EPA requirements; and preparation of other financial documents including monthly financial summary reports and a yearly Superfund

Allocation Report. Inherent in the Reporting Function project management role was also the administration of the contract as a whole.

- **Potentially Responsible Party Services:** Ms. Stout assisted with the identification of Potentially Responsible Parties (PRP) in support of Superfund litigation activities. Ms. Stout's was responsible for agency file reviews and database management. Agency file reviews activities consisted of review of files associated with cost recovery for remediation of Superfund sites.
- **Database Management:** Ms. Stout was responsible for all database creation and management for the ESS Region II contract. Created using Microsoft Excel or its equivalent, these databases ranged from the simple to the very complex. To conform to the client's various needs, reports were generated manipulating the data in various ways and summaries of the data were also produced. Due to the database efforts, the inclusion of a database as backup for PRP negotiation became the standard in Region II.
- **Brownfields Initiative/Community Relations:** Ms. Stout was the Project Manager for a \$450,000-budget project in support of the EPA Region II Brownfields effort. The project entailed five components: Database management; preparation and update of Pilot Project Fact Sheets; research, writing and publication of a quarterly Brownfields community relations report; hotline staffing; and production of presentation materials. As Project Manager, Ms. Stout administered all aspects of the project including the meeting of tight deadlines and provision of final review of written and electronic material.
- **Records Center:** Ms. Stout was the Project Manager for a \$5-million-budget work assignment in support of Region II's Remedial, Removal, and Pre-Remedial Record centers. The Record Centers house all working files in the region. Record Center staff compiled the site files, manage confidential business information, assist interested party visitors, respond to FOIA requests, compile the NPL deletion docket, and prepare Administrative Records for the public. Ms. Stout oversaw a staff of 15 and administered the compilation and/or update of approximately 100 site files a month.
- **Niagara Falls Public Information Office:** Since 1982, EPA has maintained an office, staffed by consultant personnel, who provide community relations activities for Superfund sites to the City of Niagara Falls and the surrounding area. As Project Manager, Ms. Stout oversaw the preparation of community relations plans, fact sheets, presentation materials, news releases, and public notices and the maintenance of a local media file, as well as the day-to-day administration of visitors to the office. At the onset of the program, the office oversaw 14 sites and four additional sites, including a RCRA facility, were added.

United States Environmental Protection Agency, Enforcement Support Services, Region II, New York, NY

Ms. Stout was involved with the following task projects:

- **Risk Assessment (Reynolds Metal, Radiation Technology, Wilson Farm, Stepan-Maywood):** Ms. Stout assisted in delivering the overall high standard of quality that has been brought to bear on risk assessments reports. She provided the final "polish" to the document by objective reading and attention to detail.
- **RI/FS Field Oversight (Brookhaven, Plattsburgh Air Force Base, Cortese Landfill, Tronic, Newstead, Kenmark, Picatinny Arsenal):** From a QC perspective, Field Oversight Work Plans and related documents are complicated because of the various components which go into their production. As a member of the production team, Ms. Stout produced high quality documents, which solicited only minor comments from the EPA.
- **Technical Review (Fort Dix, Plattsburgh, Picatinny, Ewan, W.R. Grace, Stepan-Maywood, Batavia):** The challenge of technical reviews is that many times they involve a multi-disciplinary effort. Ms. Stout's ability to shift from one disciplinary approach to another has benefited the quality of these reviews. She has also assisted in the coordination of documents, which require an accelerated turnaround. For the Phase II 95% Design Review for the Fort Dix, New Jersey site, she was able to identify and address comments in a timely manner and ensure that the document was made ready for a requested early submittal.
- **Community Relations (Goldisc, Reynolds Metal, Niagara Mohawk):** Ms. Stout has brought to her work in the community relations field a high level of quality assurance and attention to detail. Among the characteristics that distinguish her work in this area is the quick turnaround that is consistently provided.
- **Toxic Loadings for Niagara County:** Ms. Stout was involved with the Toxic Loadings project at its onset. This project analyzed the contamination in the Niagara River. She assisted in the production of the eight-page spreadsheets required for each loading by manipulating the software and the data, and she ensured that the numerous spreadsheets were consistent and easy to decipher. To do this, she was required to learn advanced programming functions, and trouble-shoot complicated Lotus formulas and formatting.

**APPENDIX F:
ENVIRONMENTAL PROFESSIONAL STATEMENT**

**DEFINITION OF ENVIRONMENTAL PROFESSIONAL AND RELEVANT
EXPERIENCE THERETO PURSUANT TO 40 CFR 312**

(1) a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases (see §312.1(c)) on, at, in, or to a property, sufficient to meet the objectives and performance factors in §312.20(e) and (f).

(2) Such a person must: (i) hold a current Professional Engineer's or Professional Geologist's license or registration from a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) and have the equivalent of three (3) years of full-time relevant experience; or (ii) be licensed or certified by the federal government, a state, tribe, or U.S. territory (or the Commonwealth of Puerto Rico) to perform environmental inquiries as defined in §312.21 and have the equivalent of three (3) years of full-time relevant experience; or (iii) have a Baccalaureate or higher degree from an accredited institution of higher education in a discipline of engineering or science and the equivalent of five (5) years of full-time relevant experience; or (iv) have the equivalent of ten (10) years of full-time relevant experience.

(3) An environmental professional should remain current in his or her field through participation in continuing education or other activities.

(4) The definition of environmental professional provided above does not preempt state professional licensing or registration requirements such as those for a professional geologist, engineer, or site remediation professional. Before commencing work, a person should determine the applicability of state professional licensing or registration laws to the activities to be undertaken as part of the inquiry identified in §312.21(b).

(5) A person who does not qualify as an environmental professional under the foregoing definition may assist in the conduct of all appropriate inquiries in accordance with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

Relevant experience, as used in the definition of environmental professional in this section, means: participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases (see §312.1(c)) to the Site. TRC personnel resume(s) are included in **Appendix E**.

I declare that, to the best of my professional knowledge and belief, I meet the definition of environmental professional as defined in §312.10 of 40 CFR 312.

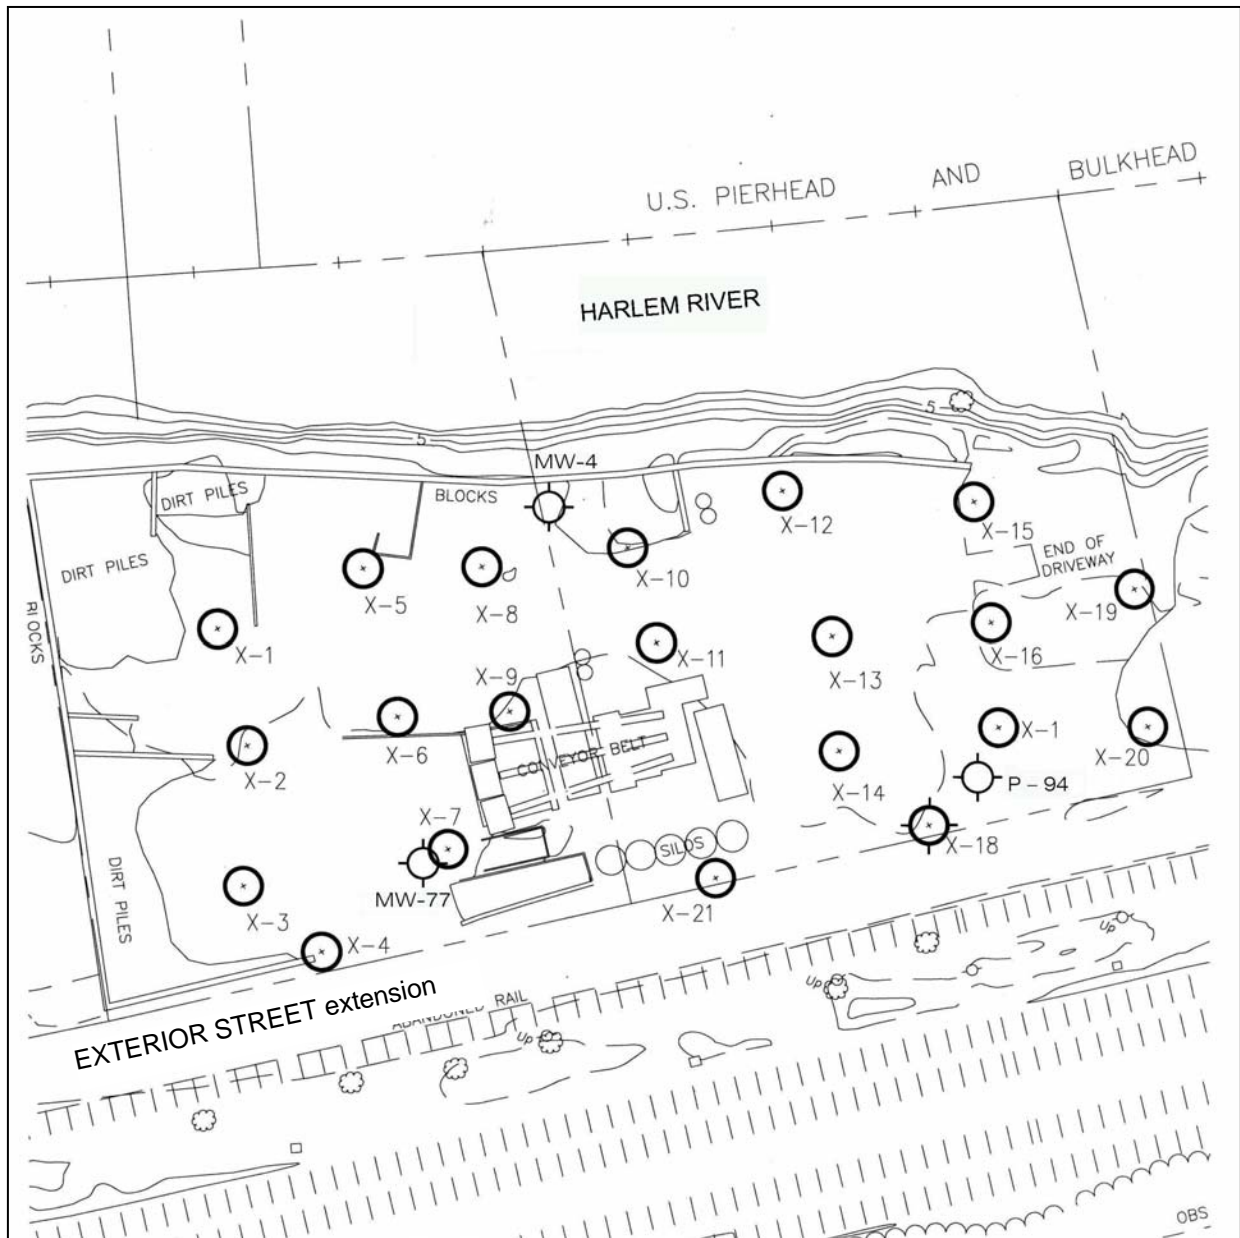

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Figure 4. Sample Locations on the XCEL Property at the Harlem River Site

Legend

-  Soil Sampling Locations
-  Groundwater Sampling Locations

Table 1. Harlem River Site Sample Parameters, Containers, and Preservatives

PARAMETER	SAMPLE CONTAINER	PRESERVATIVE
SOIL/SEDIMENT		
Volatile Organics (1)	core sample/40ml glass vial	Methanol
Semivolatile Organics/PCBs/PEST/TRPH	4 oz. wide mouth glass jar	Cool to 4 C
Total Metals (1)	4 oz. wide mouth glass jar	None
Asbestos	1 oz. Ziplock bag	None
Benthos (sediment only)	500 ml wide mouth plastic jar	10% formaldehyde/Rose Bengal
WATER		
Volatile Organics	2 @ 40 ml glass vials	HCl to pH <2
Semivolatile Organics/PCBs/PEST/TRPH	2 @ 1 liter glass bottles	Cool to 4 C
Total Metals (2)	1 liter plastic bottle	HNO ₃ to pH <2

Notes:

1. VOC soil/sediment samples will be collected in accordance with SW-846 Method 5035
2. Total Metals will include the 23 elements identified on the EPA Target Analyte List

Table 2. Harlem River Site Sample Parameters, Analytical Methods, and Holding Times

PARAMETER	ANALYTICAL METHOD	HOLDING TIME
SOIL/SEDIMENT		
Volatile Organics	8260, 5035 (1)	14 days (preserved)
Semivolatile Organics	8270 (1)	7 days to extraction 40 days after extraction
Polychlorinated Biphenyls (PCB)	8082 (1)	7 days to extraction 40 days after extraction
Pesticides	8081 (1)	7 days to extraction 40 days after extraction
Total Petroleum Hydrocarbons (TPH)	Modified 8015 (1)	14 days to extraction 40 days after extraction
Total Metals	6010/7000 (1)	180 days (28 days for mercury)
Asbestos	EPA 600/M4-82.020 (2)	None
Benthos (sediment only)	Hand Picking -EPA 1999 (3)	Indefinite
WATER		
Volatile Organics	8260 (1)	14 days (preserved)
Semivolatile Organics	8270 (1)	7 days to extraction 40 days after extraction
PCBs	8082 (1)	7 days to extraction 40 days after extraction
Pesticides	8081 (1)	7 days to extraction 40 days after extraction
Total Metals	6010/7000 (1)	180 days

Notes:

1. Test Methods for Evaluating Solid Waste, SW-846, USEPA
Total metals analysis includes the 23 TAL elements by 6010 and various 7000 series methods
2. Polarized Light Microscopy
3. Rapid Bioassessment Protocols for Use in Streams and Wadeable Rivers (EPA 841-B-99-002)

Table 3. Harlem River Site Soil Sample Log

Sample Number	Total Boring Depth (ft)	Observations
DOT-1	8.0	Dark sediment at 5.5-8 ft
DOT-2	16.0

**Re: Jurisdictional Determination Review
University Heights Waterfront
Bronx, New York
Langan Project No.: 170533801**

Dear Scott:

Langan Engineering, Environmental, Surveying, Landscape Architecture, and Geology P.C. (Langan) performed a due diligence review of the potential tidal wetlands jurisdictional determination on a Harlem River waterfront site.

The site at West 192 Street is within the University Heights neighborhood of the Bronx, New York. The site consists of Block 3244 Lot 1 and Block 3245 Lot 3. The site covers about 11 acres. It is bordered by CSX railroad lines and Major Deegan Expressway to the east, an unoccupied ready-mix concrete plant on the south, and the Harlem River on the west and north. A site location map is included as Figure 1. The site boundaries, high water line, and the on-site railroad tracks are shown on Figure 2. There are two New York City Department of Environmental Protection (NYCDEP) outfalls along the approximately 1,800 linear feet (ft) (lf) of waterfront at the site.

Our due diligence effort included a site visit on 20 June 2018 and a review of publically available information including historical aerials, United States Geological Survey (USGS) topographic maps, and Sanborn fire insurance maps.

Tidal Wetlands Jurisdiction

The New York State Department of Environmental Conservation (NYSDEC) has jurisdiction of any upland considered to be within a tidal wetland "Adjacent Area." Within New York City, this generally includes the first 150 feet from a tidal wetland boundary (e.g. where high water meets the upland) except where there are functional structures parallel to the shoreline or there is an elevation contour line of el. 10 feet above mean sea level. Functional linear structures include but are not limited to bulkheads, engineered revetments, roads, and railroad tracks. These structures must have been present and functional as of 20 August 1977 and have been maintained since then. Improvements within an Adjacent Area may be regulated by the NYSDEC if they involve excavation, filling, or general construction.

Site History

Langan reviewed available Sanborn fire insurance maps and historical aerial images to evaluate site development history. The Sanborn maps indicate that the site was undeveloped up to 1896. Starting in 1900, the northern portion of Lot 3 was landfilled up to the authorized pier and bulkhead line. Historical aerials show that the site was filled in from 1924 to 1974, and in 1984 the waterfront appears to have a vertical edge. The 1924 aerial does not show any discernible development on site. 1966 and 1974 aerials show railroad tracks along the eastern edge of the site, rail cars on these tracks, and vehicles parked at the north end of the site. About 1.7 acres of Lot 3 appears to have been covered with asphalt by 1984. The referenced Sanborn map and aerials are provided as Attachment A.

Site Visit Observations

Langan visited the site on 20 June 2018 at 10:30am (low tide was at about 9:30am) and met with Michael Davis of the Plymouth Group. Representative photographs are attached; a photo location plan is provided as Figure 3. Langan noted the following general observations:

Shoreline

The remains of a timber crib bulkhead were identified along the northern portion of the site. Observed timber bulkhead elements start at about the low water elevation. The embankment behind the deteriorated bulkhead is covered with rock and miscellaneous debris including concrete slabs. The condition of the timber crib and inboard escarpment are shown in Photographs 1 through 4.

Vegetation

The northern third of the site is covered with vegetation, as can be seen in Photograph 5. It is unclear from the historical aerials if this area has ever been paved.

Pavement

As seen in Photographs 6 through 8, there are select areas of continuous asphalt paving in the central portion of Lot 3. There are limited areas of concrete pavement located immediately east of the waterfront embankment as seen in Photographs 9 and 10. Vegetation was observed along the majority of the waterfront covering these paved areas.

RCA Fill

Recycled Concrete Aggregate (RCA) was identified over the southern third of Lot 3, as seen in Photograph 11.

Railroad Tracks

The western and center railroad tracks on Lot 1 appear to be in fair condition. However, the presence of trees and other vegetative growth (Photograph 12) suggests that the tracks have not been used recently.

Conclusions

1. The timber crib bulkhead is considered to be non-functional since tides are able to flow over the remnants of this structure.
2. The asphalt pavement has been largely covered with vegetation, indicating it has not been maintained, and is therefore considered to non-functional.
3. The railroad tracks meet the criteria of being a linear structure, but the vegetation growing through the tracks indicates the tracks have not been maintained, and are therefore are considered to be non-functional.
4. The NYSDEC will likely determine that they have jurisdiction on the site up to 150 feet from the high water line.

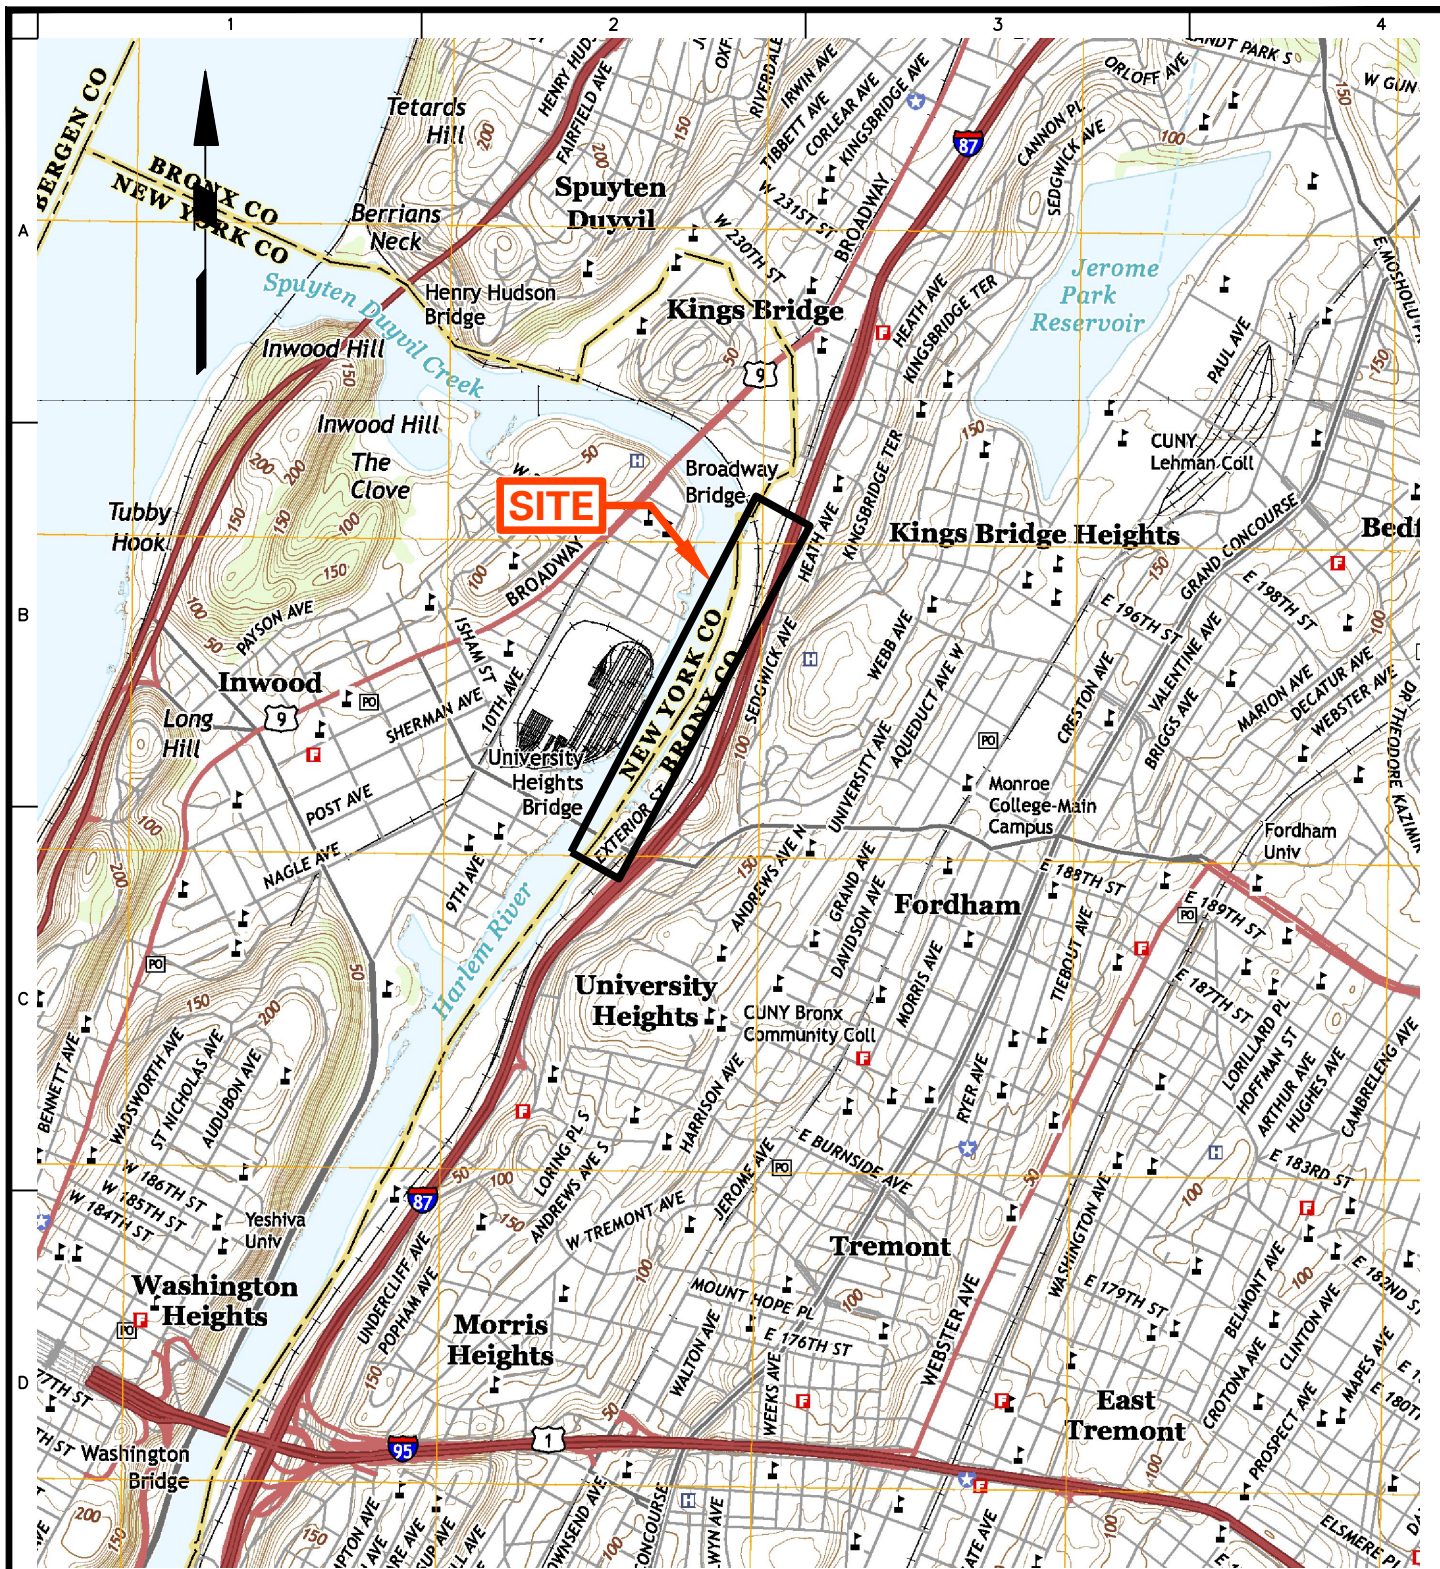

Please call me if you have any questions on our findings.

Sincerely,
**Langan Engineering, Environmental, Surveying,
Landscape Architecture and Geology, D.P.C.**

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 05/13/2018 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

<i>HUDSON RIVER PCBs</i>	<i>NO STREET APPLICABLE</i>	<i>WNW 1/2 - 1 (0.923 mi.)</i>	<i>0</i>	<i>12</i>

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 05/18/2018 has revealed that there is 1 SEMS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 10 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/14/2018 has revealed that there are 3 NY SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/14/2018 has revealed that there are 115 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 27 NY UST sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/01/2018 has revealed that there are 117 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

CON EDISON - BROADWA	12 DONGAN PLACE	WSW 1/2 - 1 (0.908 mi.)	602	1391

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 6 EDR Hist Auto

EXECUTIVE SUMMARY

sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Historical Generators:

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated 1.1 million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million (ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when the level of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabilize the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act (CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authorize a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action at the remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for parties potentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

- . Waste code: D001
- . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Spiller Company: 001
Contact Name: SAME
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL Doing cleanup at bronx cable house. some silt and mud at base of pump cable house. one sample came back with 61 ppm pcb's took three samples other 12 & 15 ppm. don't know if it is random PCBs. spill cleanup contractor to be there tomorrow at 8:00am. spill on CON ed propey, no exposure to general public. cable house is below grade. to his knowledge, no groundwater contact. cable dielectric? not sure. rep stated no visible sign of oil just silt and mud. just wanted to remove mud from base of building. came in contact with mud. on site at 10:15 hours. pete cooney - con ed electric construction division. tom willis - clean harbors. clean harbors on-site and will do cleanup at low tide, guzzling into rolloffs. will start tues or wed next week. expect 2 rolloffs of sediment. (MMM) 10/23/95: Joe Deveny, Con Ed - Are under cable house sampled at request of Env. Affairs (Mariela Gonzalez). Oil found from retired oil regulator leaking. (CAE) 10/24/95, 8:55 AM - Mariela Gonzalez (Con Ed EA). Clean Harbors assigned to clean up on site this morning. Will remove 30 - 40 yards. (CAE) 10/27/95: Mariela Gonzalez - Clean Harbors working today - expected to finish today. Remove 35 yards of oily soil - found concrete slab under soil - going to remove. (CAE) 10/30/95: site visit with Bob DePass (Con Ed EA). Requested copies of lab analytical. (CAE) 11/6/95: lab data submitted by Con Ed. Results range from non detect to 86 ppm from various locations within the cable house. 11/8/95: Wipe samples collected from below-grade concrete slab following initial clean up. 11/15/95: results forwarded to DEC - six of eight samples equal or exceed EPA clean up standard for indoor surfaces of 10 ug/100 cm2. 11/22/95: Letter from Con Ed formally transmitting wipe sample results. Will consider these surfaces cleaned. EPA requires low contact indoor surfaces to be <10 ug/100 cm2, and low contact outdoor surfaces to be <100 ug/100 cm2. As of 2/9/96, EPA considers manholes to be indoor. They are awaiting documentation from Con Ed to categorize these as outdoor. Since the highest concentration is 20 ug/100 cm2 and the area is restricted access and the structure is not a work place for anyone (people only go there every couple of years) will accept this level of clean up. (CAE) 2/9/96: spoke to Dorothy Zoledziowska of USEPA Region 2 TSCA (908) 906-6811. Asked her if cable house would be considered low contact indoor restricted area or low contact outdoor restricted area fro purpose of clean up criteria. She said that this question has been asked by Con Ed before, concerning manholes. EPA would consider classifying manholes as outdoor structures, but are awaiting written request with information from Con Ed. So presently EPA considers manholes indoor surfaces thus requiring clean up to be done to <10 ug/100 cm2. We will apply this until EPA gives further guidance. Spill of original oil contained 136 ppm PCB by analysis. If this is

S102180138

the case, then Con Ed is only required to do a double wash/rinse. (CAE) 4/96: Draft Scope of Work for Subsurface Environmental Investigation submitted for review. 7/10/96: Phone call to Bob DePass (EA) - Con Ed has petitioned EPA (Dan Kraft - Region 2) to relax cleanup standards in MH to 100 ug/100 cm2 in cases where they have cleaned up multiple times. Agreed w/ DePass on plan for investigation: 6 borings less than or equal to 25' from manhole offset by 30 degrees from one another. Also, one upgradient (background) boring as close to property line as possible. (CAE) 7/11/96: letter to Bob DePass confirming agreement of scope of work for investigation. (CAE) 6/02: NYCDEP indicates their intention to purchase the property from Con Ed as part of Croton Water Treatment Plant Project. Spill transferred from Engelhardt to O'Connell. (JHO) 7/18/02: Unable to find file on spill, I contacted Joe Coletta, Con Ed. He said he recalls that spill was to soil inside the cable crossing house (similar to a tunnel head house). He says Engelhardt responded, and All State was used to vac out soil. He will try to find out more info and get back to me. (JHO) 2/7/03: Attempted to track down Joe Coletta - he retired from Con Ed in December. Joe Susco (SSO) indicated that he would try to track down more info on the spill - he thinks it is under the Distribution Group (where Coletta worked in 1995). Susco called back, said he spoke with Jim McCabe (Bronx/Westchester EH&S), who may have some info. (JHO) 2/26/03: found original spill file containing all info from spill date through July 1996. Entered info in database, will contact McCabe to track down Bob DePass for update - was investigation ever conducted? Results? (JHO) 3/3/03: called Maureen Sicherman (Con Ed Remediation) - requested she attempt to track down file for this site. (JHO) 11/30/04: Spill transferred to Arakhan for follow up. (JHO) Closed. 12-30-05. see eDocs. G. Breen "

Remarks:

"61 parts per million in soil sample taken from above location. unknown how much pcb oil is in ground. conctor will be on site sat 10/21/95. clean harbor is contractor."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 Spiller Address: 233 LANDING ROAD
 Spiller Company: 999
 Contact Name: ARSHEEN
 DEC Memo: "8/25/2015: Rashad Prepared and will send CSL to owners address per NYC property records: American Self Storage Landing Road LLC 788 Shrewsbury Avenue Tinton Falls, NJ 07724 CSL document uploaded to D2. 8/28/15-Zhune called Arseen from GZA 973-774-3300. She said this site entered the OER VCP program. During excavation as part of development, soil contaminated was identified with petroleum odor and PID readings. 8/28/15-Karen Pinto from American Self Storage Landing Road, LLC sent a letter dated 8/27/15. The letter stated please be advised that we no longer own this property. It was sold to West 25th Street Housing Development Fund Corporation on March 27, 2015. Karen Pinto 732-741-0707 Phone 732-741-1188 Fax 3/23/16-Benjamin Alter from GZA sent the spill closure report for this site. The report stated that a nine story residential building with a cellar is currently being constructed at the site. During the construction, the site was divided into eight sampling and excavation grids. Two impacted areas were discovered during site gridding, one in the north of Grid-5 at 4 feet below ground surface and another in the eastern portion of grid -3 to a depth of 10 feet below ground surface. Soil samples TP-1, TP-2 and Hotspot-TP were collected from test pits TP-1, TP-2, TP-3 (installed north of Gris-5) respectively to characterize the soil. Soil contaminated in TP-3 was excavated. The final excavation was

approximately five feet by five feet in area and five feet deep. GZA collected endpoint samples TB-3East, TB-3North, TB-3South, TB-3West at a depth of 4.5 feet bgs, and bottom samples TB-3CTR at 5 feet bgs. The soil analytical result indicate no VOCs exceedance. All five samples indicate benzo (a) anthracene, benzo (a) pyrene, benzo(b)fluoranthene, chrysene, dibenzo(a,h)anthracene and indeno (1,2,3-cd)pyrene at concentration above the NYSDEC Cp-51 guidance. The impacted area in the Easter portion of grid-3 was excavated. The excavation area is five foot by five foot, ten foot deep area. Four endpoint samples were collected from sidewall Grid-3E, Grid-3W, Grid-3N and Grid-3S and one sample from bottom Grid-3W. The soil analytical result indicate no VOCs exceedances in these samples. Samples Grid-3Sand Grid-3W, Grid-3E, Grid-3N contained benzo(a)anthracene, benzo(a)pyrene, benzo (b)fluoranthene, Chryzene and indeno(1,2,3-cd)pyrene at concentrations above the NYSDEC CP-51 guidance. Based on the discussion of the data with Jeff Vought. This spill case can be closed. Any residual contamination has been deemed not to be a threat to the public or the environment. Spill closed." Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110004505483

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"Tyree submitted a letter/closure which states the following: On July 11, 2007 it was reported that a customer hit a dispenser for regular and premium grade gasoline. The NYSDEC was immediately notified and spill No. 07-04058 was assigned to the site. On July 11, 2007 Metro Environmental Services, LLC dispatched a crew to the site in order to inspect the dispenser and test the product dispenser lines. The regular and premium grade dispenser lines were tested and passed. A copy of the testing results is included with this report. It was noted that all of the piping was in sound condition and that there was no release of gasoline to the soil or groundwater at the site. Based upon the aforementioned information Tyree, on behalf of Getty Petroleum Marketing Inc., kindly requests the closure of NYSDEC spill no. 07-04058. ***** Spill Closed"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 3/23/05-Vought-File review by Vought: Tank Closure Report (Tyree Org)-June 1997. Tank removal performed as part of service station upgrade. One dispenser island adjacent to Bailey Avenue. Currently the new underground storage tanks are located in the area of the forme gasoline tanks . The surrounding area consists of wooded tracts of land interspersed with multi-story apartment buildings . Removal of pump island, twelve (550-gallon) gasoline USTs, one (550-gallon) waste oil UST and one (550-gallon) fuel oil UST. Approximately 500 cubic yards of impacted soil was excavated and stockpiled . Sixteen endpoint soil samples were collected. Soil analyticals show: 1040ppb benzene(notwall fuel oil 4'bgs), 9890ppb xylene(north wall fuel oil 4'bgs), 23100ppb 1,2,4-trimethylbenzene(north wall fuel oil 4'bgs), 3880ppb toluene(S5 7.5'bg), 11700ppb ethylbenzene(S5 7.5'bg), 85300ppb xylene(7.5'bg), 3270ppb MTBE(S5 7.5'bg), 31500ppb xylene(S6 7.5'bg), 2240ppb MTBE(S6 7.5'bg), 3030ppb xylene(S7 7.5'bg) and 1600ppb MTBE(S7 7.5'bg). Approximately 591.33 tons of impacted soil was removed from the site. Subsurface Investigation Report (Tyree Org)-March 1998. Residential located across Heath Avenue and expressway located across Bailey Ave. North of site is parking lot. Four borings performed and three monitoring wells installed. Depth to water is 16-28' below grade and flow to the west. Soil analyticals show 638ppb MTBE(B2 0-5'bg), 1956ppb xylene(B3 0-5'bg). Groundwater analyticals show 184ppb MTBE(W-1). Letter from DEC O'Dowd to Getty Ochotorena-4/2/98. However, additional investigation is warranted and required... ..the Department is requiring that Getty Petroleum Marketing Inc conduct and adequate subsurface investigation to delineate the full extent of gasoline contamination on-site and off-site . Report deadline to DEC by 7/31/98. Quarterly Monitoring Reports (Tyree Org) 7/9/98 thru 10/21/98. Three monitoring wells onsite and groundwater flow to the

west. Depth to groundwater is 16-29 with monthly gauging and quarterly sampling. Groundwater shows no TOGs exceedences. Initial Subsurface Investigation Report (Tyree Org)- December 1998. Same report as March 1998 report above. Letter from Tyree Org (Conroy) to DEC O'Dowd-3/22/99. Tyree requests that NYSDEC close the spill number for this site . Quarterly Monitoring Reports (Tyree Org) 10/21/98 thru Jan 2000. Three monitoring wells onsite. Groundwater at depths of 14-29'bg and flow to the west-southwest. Quarterly sampling and quarterly gauging. Groundwater analyticals show 52.5ppb MTBE(W1). Environmental Site Investigation and Monitoring Well Installation (Tyree Org)-January 2000 thru January 2002. Two additional monitoring wells were installed in January 2000. Soil analyticals show no TAGM 4046 Soil Cleanup Objective exceedences. Groundwater analyticals show 579ppb MTBE(W4), 13ppb benzene(W5), 374ppb ethylbenzene(W5), 243ppb xylene(W5) and 1320ppb MTBE(W5). No Further Action Request (Tyree Org)-3/31/02. Site monitoring and gauging changed to a semi-annual basis. No Further Action Request (Tyree Org)-5/3/02. Site monitoring and gauging changed to a semi-annual basis. Status Report (Tyree Org) January 2002 thru June 2003. Five monitoring wells onsite and groundwater flow to the west. Semi-annual monitoring and gauging. Groundwater analyticals show 35ppb ethylbenzene(MW5), 47ppb xylene(MW5) and 1450ppb MTBE(MW5). Semi-Annual Monitoring Report (Tyree Org) July 2003-June 2004. Five wells onsite and groundwater flow to the west. Semi-annual monitoring and gauging. Groundwater analyticals show 284ppb MTBE(MW4), 6ppb ethylbenzene(MW5) and 73ppb MTBE(MW5). Geoprobe Workplan (Tyree Org)-7/29/04. Proposal for the installation of five soil borings downgradient of the tanks, pumps, and MW's 4 and 5 on the sidewalk of Bailey Avenue. Unless you indicate otherwise, Tyree will proceed with the work mentioned above in the August 2004 . Subsurface Investigation Report (Tyree Org)-10/26/04. On behalf of Getty Properties Corporation, the Tyree Organization requests that Spill No. 9611209 be issued a No Further Action... Soil analyticals show no TAGM 4046 Soil Cleanup Objective exceedences. Semi-Annual Monitoring Report (Tyree Org)-July 2004 thru December 2004. Five wells onsite and groundwater flow to the west. Semi-annual monitoring and gauging. Groundwater analyticals show 27ppb MTBE (MW5) with no nearby sensitive receptors. 3/23/05-Vought-No Further Action Letter sent by Vought. "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 12/02/2009
Site name: CON EDISON
Classification: Conditionally Exempt Small Quantity Generator

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "e2mis no 157632 16-Mar-2005 03:48hrs. FOD field Op. A. Martucci discovered approximately 3 gallons of oil on 100 gallons of water. No sewers, waterways or private property affected. Env. tag 43787 placed in vault. Chain of custody DD13465 tracking a PCB sample. Clean up will be scheduled at 1500hrs pending sample test results. 16-Mar-2005 20:55hrs. Env. Flush Mech O. Negron 18400 reports partial cleanup completed. Unit is leaking. Fdr Control verifies unit and three sections of cable will be replaced. Once feeder is Live, end capped and setions and vault are isolated, I&A will schedule a removal of the unit with a complete cleanup. CFS tanker took on 100 gallons of liquid for transport and disposal at the Astoria WWTF. Env. vactor took on 85 lbs. of flush debris for transport and disposal at the hellgate flush facility. Env. tag 43787 remains in place. 28-Mar-2005 07:21 Lab Sequence Number: 05-02340-001 TOTAL PCB 29 ppm 29-Mar-2005 15:45 D. Rohrer 12788 Flush Mech T. Brown 44432 reports cleanup complete performing a double wash and rinse removing 300 lbs of flush solid debris to be brought to Hellgate Pit for temporary disposal. CFS tanker removed 296 gallons of non-hazardous liquid to be brought to Astoria WWTF. Env tag 43787 was removed and the source of the oil was the transformer which was removed from the structure."
Remarks: "Transformer possibly still leaking. Spill was on 100 gallons of water. Spill is contained. Coming off 24 hour program. Con-Ed #157632" Not reported

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"09/20/07 - See eDocs for Con Ed report detailing cleanup and closure. 207748. See eDocs. This spill is believed to be related to discovery of cable oil in manhole in Bronx, spill 0706033 (emis 207751). Alarm is for feeder M51. Leak rate is low - about one gallon per hour. The Sedgwick Avenue spill, 0706033, for cable oil in a manhole in the Bronx, is being closed out so that the information can be consolidated in one place, which is this spill 0706027. 08-28-07. Breen went to MH 29001 at Sedgwick Ave, site of Spill 0706027. All State vac d out concrete vault. About 200 gal recovered. Leak is very slow. ConEd found it very quickly after feeder alarm went off. Feeder is operating and under full pressure. Excavated on the south side of the vault. I did not see any contaminated soil in the excavation. Leak is believed to be on bottom of feeder where it exits the south wall of vault. ConEd has to break concrete around feeder penetration of wall to install clamp. Mike Pillig was there with Ed Conway, former ombudman who has just been promoted, and Tony DelGardo and new ERT from Indian Point. Leak is slow. Most or all of release is into the vault. Little or no impact to soil, or so it seems at this point in time. Plan is to expose feeder to locate leak. Then apply first a clamp and then weld on a barrel over the damaged area. ConEd will break the south wall around where the feeder penetrates in order to locate the leak. In the process of excavating, it will come clear where cable oil got out of the vault. After the repairs are made, ConEd plans to investigate the north wall of the vault by excavating there. 09-14-07. See spill 0706480 for an additional release from this feeder near 231 Street. "

Remarks: "POTENTIAL SPILL AMOUNT IS 500 GALLONS; FEDDER RUNS FROM ABOVE ADDRESS TO SPRAIN BRROK SUBSTATION IN WESTCHESTER - 245 TUCKAHOE RD; FEEDER NAME- M51- 345 TRANSMISSION FEEDER; NRC #847038; 207748."

Contact Name: AFROSA AMIN
DEC Memo: "02/16/18-Hiralkumar Patel. 1:37 PM:- spoke with Afrosa at DEP. she mentioned that NYC Department of Investigation referred this site to DEP. she inspected the property and found multiple tanks containing upto 30,000 gallon of diesel. she also noted sheen on property surface at multiple locations. she stated that USEPA is responding to investigate the site. 3:00 PM:- visited site and met Ross Hoffman from NYC Dept. of Investigation. Mr. Hoffman mentioned that the concrete plant at the site is operating without a permit and they have issued a vacate order. during inspection, light sheen (may have originated from trucks on-site) noted on water puddles throughout facility. found concrete floor in areas where oil sheen noted on water and no signs of petroleum contaminated soils noted at the site. site has following tanks: - one diesel AST on saddle next to stack of storage containers - one diesel AST (possibly sitting on concrete floor) and one 275 gal waste oil AST a shed the site also has one tanker truck containing diesel and equipped with dispenser hose. Mr. Hoffman mentioned that FDNY has issued an order to immediately remove motor fuel (diesel) from tanks/truck due to storage vessels being unregistered. spoke with Charlie, plant operator. he has confirmed that property owner has retained a contractor to remove oil from the tanks. Charlie provided copy of NYS DOT letter which has site address as 265 Fordham Road. Fordham Road is approx. 1,500 ft south of the subject site. 4:00 PM:- received call from Peter Sullivan, owner's attorney. he confirmed that oil tanks will be pumped out today and they have retained Roux Associates to complete required environmental work. 02/20/18-Hiralkumar Patel. based on observations during site visit and review of google street map, NYC DOB records, NYC ACRIS records and NYC Digital Tax Lot maps, the concrete plant is located on lots # 145 and 160 on block #: 3244. there is no street address listed for lots 145 and 160 in NYC DOB records. both lots 145 and 160 are owned by Galway Realty LLC. searched PBS database for 'Galway' and noted PBS #: 2-130826 for site 265 West Fordham Road (aka 265 Major Deegan Highway). as per PBS # 2-130826, site has following tanks: - one (1) 3,000 gal #2 oil UST, in-service, installed in May 1981 - one (1) 1,500 gal #2 oil UST, in-service, installed in May 1981 PBS registration has expired on 01/06/2009 and it does not have

any information about ASTs or current status of UST systems. 10:21 AM:- spoke with Mr. Sullivan. he confirmed that fuel was removed from tanks. he mentioned that Roux Associates has subcontracted Brookside Environmental who will inspect site today. Galway Realty, LLC. **property owner** c/o Jenna Harlem River Inc. 1465 Bronx River Ave. Bronx, NY 10472 Attn.: Anthony Valente Ph. (718) 842-5250 / 5997 email: avjenna@hotmail.com Peter Sullivan **owner's attorney** Sullivan PC Ph. (212) 687-5900 (917) 270-5961 email: ps@sullivanlegal.net 12:34 PM:- sent email to Mr. Sullivan including PBS application. asked him to immediately renew PBS registration. email copied to Mr. Valente and DEC Leszek. 02/21/18-Hiralkumar Patel. 12:45 PM:- sent email to Mr. Sullivan inquiring updates. email copied to Mr. Valente. 3:14 PM:- received call from Mr. Sullivan. he mentioned that Richard Taylor from Brookside Env. inspected the site and found no signs of oil spill. Mr. Sullivan confirmed removal of on-site tanks and they will do further investigation to locate USTs listed on PBS record and will renew/update PBS registration. 3:25 PM:- received call from Richard from Brookside. he confirmed that all on-site ASTs have been removed and he did not observe any signs of oil spill at tank locations or other parts of the site except some minor sheen on concrete surface. they will conduct GPR survey to locate USTs listed on PBS record. case closed based on field observations and review of available information."

Remarks:

"DEP is at the site. 30,000 gallons of diesel is being stored without a permit. There is an unknown loss to soil"

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 12/5/03-Vought-See also closed Spill #8705665. 9/20/05 - oBLIGADO -Spill transferred from Vought to obligado 12/5/05 - Obligado - File review. Baseline Assessment Report, Delta, 10/3/02. At time of assessment site was an active Gaseteria with 3 4000 gallon gasoline USTs and 1 4000 gallon diesel UST installed in 1989. Sensitiver receptor survey shows Harlem River located 375 ft west, no wells within 1 mile, Bronx Community college is located 375 ft to the southeast. 1 park 375 ft north. Commercial/residential buliding with basement 20 ft south. Ground water at 10 to 13 ft bgs and flows west. Soil is brown fine to coarse sand with gravel. Weathered rock from 7 to 11 ft bgs. Bedrock at between 2 and 11 ft. 4 soil borings advanced and 4 soil samples collected. Soil results show only one impact of 1720 ppb MTBE. 4 temporary ground water wells installed into bedrock. Ground Water results in ppb: (2/7/02) MW1 - 5.67 benzene, 33.2 toluene, 10.2 ethylbenzene, 158 xylenes, 876 MTBE, 207 BTEX, 1236 VOCs MW3 - 5.49 toluene, 11.5 xylenes, 20 BTEX, 436 MTBE, 478 VOCs MW4 - 2.52 benzene, 6.59 xylenes, 493 MTBE, 12 BTEX, 528 VOCs MW5 - 239 MTBE RCRA Mettals - MW1 - 1800 ppb chromium, 7040 ppb barium, 2160 ppb lead (8/7/05) MW1 - 37.3 benzene, 292 MTBE, 39 BTEX, 335 VOCs MW3 - 239 L benzene, 10.5 toluene, 6.77 ethylbenzene, 5730 MTBE, 6020 VOCs MW4 - 19 benzene, 749 MTBE, 19 BTEX, 768 VOCs MW5 - 208 L MTBE UST Closure Report, AGS, January 2004. USTs, piping, dispensers removed Dec 03. Soil endpoint samples show now VOCS above SCOs. Some PAH exceedences. Ground water sample from excavation show 350 ppb benzene, 1300 ppb toluene, 200 ppb ethylbenzene, 1430 ppb xylenes, 21000 ppb MTBE, 3280 BTEX. EXcavated soil was used as backfill. Conclusions: the operation of this site as a gasoline service station has caused impact to the subsurface soils to warrant further environmental site assessment or action. Upon completion of rebuild activities, AGS on behalf of Gaseteria will prepare a subsurface investigation workplan for NYSDEC approval which will outline additional field activities to investigate and delineate the detected contaminants. UST Closure Report Addendum, AGS, September 2004. Remaining product supply piping under the concrete to the pump islands were removed to facilitate replacment with new BP piping. 5 soil samples were collected from 4-6 inches below the trench bottom. 1 sample was collected from under each of the four removed pump islands and 1 sample from adjacent to the Kiosk. Soil Results in PPB:

MOBIL (Continued)

S100144828

P3 piping - 3680 xylene P4 piping - 2100 toluene, 300000 xylene, TOTAL VOCs : 977110 P5 piping - 50000 toluene, 91000 ethylbenzene, 318000 xylenes, TOTAL VOCs : 1247000 The data set indicates very high VOCs; however, the lack of benzene and low MTBE relative to overall concentration is not typical of gasoline. The elevated level of naphthalene may indicate diesel fuel; however, no corresponding SVOC's were detected . Upon completion of the rebuilding activities AGS will prepare a Subsurface Investigation Work Plan . 6/2/06 - Obligado - Reviewed subsurface investigation workplan. Proposes 4 monitoring wells to be installed into bedrock. 6/6/06 - Obligado - Sent email to Steve Muller approving workplan with minor adjustments to boring locations. Due date for summary report is 8/8/06. 7/19/06 - Obligado - Meeting with Gaseteria, ASR, DEC on 7/19/06. Wells have been installed at the site. Gaseteria will submit a schedule for submission of work. 9/12/06 - Obligado - Emailed multi-site stipulation agreement to Gaseteria on 9/8/06. Sent original on 9/12/06. Due date for ISR according to DEC approved Corrective Action schedule is 11/1/06. 10/31/06 - Obligado - Multi Site Stipulation executed by Oliva on 10/31/06 12/6/06 - Obligado - Review ISR, submitted by ASR, dated 10/31/06. 3 monitoring wells installed. MW1 was turbid for sampling. MW2 and MW3 were both nondetect. Recommended 2 additional monitoring wells. I sent an email to Steve Muller requiring Supplemental Investigation Workplan for additional monitoring wells and MW1 redevelopment submission by 1/6/07. 2/7/07 - Obligado - Review SIWP. Proposes 2 additional wells in the sidewalk west of the site and redevelopment of MW1. Approve of workplan with modification to attempt to collect soil samples via HSA and split spoons prior to switching to air rotary. 3/7/07 - Obligado - Sent sidewalk opening letter to Steve Muller. 6/1/07 - Obligado - Received ISR via email. 7/27/07 - Obligado - Final summary report submitted. 2 additional wells were installed west of down gradient of tankfield. During installation, 1 soil sample was collected for lab analysis, no VOCs detected in this sample. Ground water samples were collected. MW1 through MW3 were all ND, MW4 and M5 had minor exceedences of TOGS. MW4 had 65 ppb total BTEX, MW5 had 42 total BTEX. The report requested closure due to low numbers. I had a meeting with JOe Sun to discuss this site. Agree to spill closure based on the following. 1) Relatively low concentrations, exceedences of TOGS for only 3-4 compounds in two wells. GW concentrations are significantly lower down those found in Delta baseline assessment, suggesting natural attenuation is occurring 2) No receptors immediately down gradient, immediately down gradient of the site is a major deegan expressway which is an 8 lane highway (including service roads). Downgradient of the highway, according to the ASR report are industrial/commercial buildings. 3) Sensitive receptor survey was previously completed by DELta in 2002. According to this survey, no potable wells within 1 mile. Nearest surface water body is harlem river, 375 ft west of the site. However, due to small size and very low concentrations of contamination in gw, plume emanating from this site most likely will not reach or impact this river. There is a residential building with basement to the south, however, southern most well MW1 was ND so plume does not pose a risk in this dieection. The Data from this site do not indicate potential adverse impacts to human health and the environment. This spill is closed. I emailed an NFA letter to Gaseteria. "

Remarks:

"contaminated soil and groundwater found. Delta reported spill to DEC despite Gaseteria knowledge as of 8/5/2002."

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

 DEC Memo: "Prior to Sept. 2004 data translation this spill Lead_DEC Field was TIPPLE 9/18/03 1107 Hrs DDO Sawyer talked to Keith Williams (917)513-5240 of DEP Industrial Water who was on the scene of the spill. He said the waste because of a clogged or backed up sewer system was dumping sewage waste into the street, to the sewers and on ground across from 2575 Sedgwick Avenue. The Va Hospital is responsible and is in the process of cleaning up the street and the sewer areas. The ground is only going to be cleaned up cosmetically. Since this is a reoccurring problem, Mr. Williams thinks subsurface contamination warrants testing and remediation of the contaminated soil. Forwarded to Water Department."
 Remarks: "UNK CHEMICAL WASTE IS BEING PUMPED INTO THE GROUND"

DEC Memo:	"7-13-2005 This site is remediated under NYCDDC CO. Monitoring borings were completed in April 2005 and the results showed compliance with TAGM 4046. Contacted Steve Frank (LiRo). Requested to map exact location of the excavated tanks, excavate all contaminated soil, install new soil borings/wells if this area is not covered by the previous investigation. AZ 7-18-2005 Requested original laboratory data and tank closure report. AZ 3-23-2006 Contacted Steve Frank (LiRo) and requested an update for the site. AZ 3-21-2007 Reviewed monitoring report for November 2006 - January 2007. On December 6, 2006 the MPE system was off due to the blockage in the seal water piping. The system was repaired.M W-02 was destroyed. No gw compounds exceeded DEC Quality Criteria. Soil sampling will be performed. I requested that downgradient wells are sampled. AZ 4-30-2008 An e-mail requesting identification, investigation and remediation of the tanks associated with the spill was sent to Jane Staten (URS)/VB. Conversation w/Jane Staten. I confirmed that DEC requested information about this tank closure but never received it. URS has to map the tanks and sow locations of sampling points and their results in the USTs area. J. Staten will look into it. AZ 7-8-2008 I have reviewed a report for the above spill number dated June 2, 2008. URS stated in their report that in June 2005, The Franklin Company (Franklin) excavated three of five USTs contained in a vault located at the Manhattan 12 site. The USTs were identified as ##7, #10 and #11. The remaining two USTs located in the same tank vault, identified as #8, and #9, were previously closed in place (filled with concrete) in September 1996. Following removal of tanks #7, #10, and #11, Franklin collected five post-excavation samples. The analytical data showed that no compounds exceeded the NYSDEC TAGM #4046. Additional soil samples were collected in the vicinity of the tank vault. In July 2004 and April 2005, Liro collected confirmation soil samples to evaluate the effectiveness of the multiple-phase extraction system that began operating in March 2003. The analytical data showed that no compounds exceeded the NYSDEC TAGM #4046 recommended soil cleanup criteria. Collectively, the analytical data showed that soil in the vicinity of the tank vault had been remediated. Based on the submitted information, spill #0504296 is closed. An e-mail was sent to Jane Staten/DDC/V. Brevdo. AZ "FLORENE , TRIMETHELBEZINE. WAS FOUND ON THE N POINT SAMPLES TAKN AFTER TANK REMOVAL. THREE TANKS REMOVED."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY Also, refer to spill # 9604408. -II (12/14/04). Site was first investigated by Lehrer McGovern Bovis and Raritan Enviro Sciences; they installed a limited product recovery system, with recovered & treated groundwater (from depression pump) going to percolation trench. Site was transferred to LiRo, and they removed the old system and installed a more extensive multi-phase extraction system, which is currently operating to address soil and groundwater contamination and recover small amounts of free product. This site transferred from Kolleeny to A. Zhitomirsky on 4/15/05. - JK
6-20-2005 Reviewed a Monitoring Report for January-March 2005. The

report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. In the report LiRo proposed to shut down Header No.2 and only operating the system on Header No.1. This will allow the system to operate on the remaining area of contamination. The Department concurred with this proposal. AZ 7-18-2005 Reviewed a Monitoring Report for April-June 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. In the report LiRo recommends installing ORC socks in wells MW-8 and MW-10 to treat MTBE in groundwater. The Department concurred with this proposal. AZ 12-27-2005. Reviewed a Monitoring Report for July - September 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. In the report LiRo recommended installing ORC socks in wells MW-9 and MW-13 to treat groundwater contamination. The Department concurred with this proposal. Also, the Department concurred with LiRo proposals to shut down extraction wells EW-5, EW-6, EW-9 and EW-10. Remaining extraction wells should continue to remediate remaining groundwater contamination. Proposed confirmation soil borings were approved. AZ 4-5-2006 Reviewed a Monitoring Report for October - December 2005. The report presented remedial system performance and groundwater monitoring data. The report stated that based on the site monitoring data, the MPE system is effectively treating contamination. Gw and soil contamination exists in the area of MW-8, MW-10, and MW-13. LiRo recommended turning on wells EW-11,EW-12, EW-18 and EW-19. AZ 5-11-2006 Reviewed a Monitoring Report for January - March 2006 received on April 13, 2006. The report presented remedial system performance and groundwater monitoring data. The system was shut down for 14 days in March 2006 due to sensor replacement. As of March 2006 LiRo is no longer the consultant fr the site. Gw and soil contamination exists in the area of MW-8, MW-10, and MW-13. AZ 11-13-2006 Reviewed a Monitoring Report for April - July 2006 received on August 23, 2006. The report presented remedial system performance and groundwater monitoring data. MW-03 is apparently short circuited by EW-08. Wells MW-05, MW-10 and MW-14 were not accessible for sampling. A confirmation soil plan will be prepared by URS. AZ 1-2-2006 Reviewed a Confirmation Soil Plan dated September 26, 2006, and a Monitoring report for August through October 2006 dated November 14, 2006. Low vacuum in MW- 3, MW-7, MW-14. URS recommended advancement of three new borings in contaminated areas. AZ 1-3-2006 Could not locate borings which encountered contaminated soil in previous investigations on the site plan. GW Samples were not collected from MW-10, MW-12, MW-09 since they were unaccessible due to the parked vehicles. I informed Jane Staten that all wells should be sampled in order to apply for NFA. Contacted Jane Staten (URS) via e-mail and phone and requested clarification of the boring locations. AZ 3-20-2007 Contacted Jane Staten (URS). URS provided clarifications following DEC request for existing borings locations. 3 confirmation borings will be advanced. The dual phase system is down due to the liquid ring pump failure since February 17, 2007. System repairs will be postponed until the full round of gw and soil sampling is performed. AZ 3-21-2007 Reviewed monitoring report for November 2006 - January 2007. On December 6, 2006 the MPE system was off due to the blockage in the

S103478327

seal water piping. The system was repaired. MW-02 was destroyed. No groundwater compounds exceeded DEC Quality Criteria. Soil sampling will be performed. I requested that downgradient wells be sampled. AZ 11-20-2007 Reviewed report dated Aug. 7, 2007. A spike in MTBE level in MW-12 (2,100 ppb). The soil analytical results showed slight exceedances but PID readings were high and petro odor noticed. URS proposed additional soil borings UBR-04, UBR-05 and UBR-06 near UBR-01, UBR-02 and UBR-03. No groundwater map with the plume was submitted. Spoke with Jane Staten and sent the following e-mail: As per our discussion of the above site, proposed soil borings are approved. The report submitted on August 13, 2007, did not contain groundwater map with the contaminant plume. Whenever groundwater sampling is performed, groundwater plume map with the latest sampling results should be compiled. I concur with your proposals to sample all existing groundwater wells. Special attention should be given to sampling the downgradient wells. AZ 4-29-2008 Reviewed Contamination Soil Sampling Results/Recommended strategy report dated February 5, 2008. MTBE contamination ranged from 24 ppb to 1,100 ppb in two wells. There is a slight rise in MTBE concentrations in MW-12 over the last three sampling events. Recent soil sampling showed a significantly elevated concentration of total xylenes in UBR-04 (8' TO 10' bgs) - 44,000. MPE system is off-line. The Harlem River is situated approximately 200' from the site. Discussed the site with Jane Staten (URS). I proposed to install ORC socks in MW-12 and leave MPE system in-place. Jane Staten proposed quarterly monitoring of the select wells. An e-mail with these conclusions was sent to URS/DDC/VB. AZ 12-24-2008 Reviewed Groundwater monitoring data through 2nd quarter 2008 dated August 8, 2008. ORC sock was installed in MW-12 in June 2008. Monitoring was performed on July 14, 2008. Well MW-12 exhibited MTBE at a concentration of 340 ppb. No other VOCs were detected in MW-12. The improved groundwater quality in MW-12 may be attributed to the ORC socks. AZ 1-8-2009 Reviewed Groundwater monitoring data through 3rd quarter 2008 dated November 14, 2008. It appears that the ORC sock placed in MW-12 should be replaced, however MW-12 box needs repair, the sock will be installed after the repairs are made. The work was planned for December 2008. In October 2008 all wells were sampled. MTBE was the only contaminant detected. Concentrations ranged from 23 ppb to 720 ppb. Concentration of MTBE has increased from 340 ppb to 720 ppb in MW-12. AZ 5-14-2009 Reviewed groundwater monitoring data through 1st quarter 2009 dated February 16, 2008. In January 2009 all wells were sampled. MW-08 and MW-12 exhibited MTBE at concentrations of 260 ppb and 42 ppb respectively. MW-12 also exhibited benzene slightly above criteria. Well MW-08 exhibited an unexpected increase in MTBE concentrations. AZ 9-21-09 Reviewed groundwater monitoring data through 2nd quarter 2009 dated May 27, 2009. In April 2009 all wells were sampled. MW-08, MW-10 and MW-13 exhibited MTBE at concentrations ranging from 25 ppb to 260 ppb. DEC requested installation of ORC socks which were consequently installed. The ORC socks in MW-12 are improving groundwater quality MTBE concentrations in this well continues to decrease. Well MW-9 was destroyed. AZ 1-26-10 Reviewed groundwater monitoring data through 3rd quarter 2009 dated August 25, 2009. In July 2009 all wells were sampled. MW-08, MW-10, MW-12 and MW-13 exhibited MTBE at concentrations ranging from 12 ppb to 310 ppb. DEC requested installation of ORC socks which were consequently installed. URS will replace ORC sock in well MW-12 to reduce MTBE concentrations. Well MW-9 was destroyed. AZ 2-16-2010 Reviewed

S103478327

groundwater monitoring data through 4th quarter 2009 dated October 28, 2009. Wells exhibited MTBE at concentrations ranging from 11 ppb to 85 ppb. Well MW-9 was destroyed. AZ 4-21-2010 Reviewed groundwater monitoring data through 1ST quarter 20010 dated February 17, 2010. Well MW-08 exhibited MTBE at concentrations of 100 ppb and MW-12 exhibited MTBE at concentrations of 260 ppb. ORC sock was placed in well MW-12 and may have contributed to the decrease of MTBE concentrations. Analytical data for well MW-08 sine October 2007 shows fluctuating MTBE concentrations and there is no decreasing contamination trend in this well. AZ 4-23-2010 An e-mail was sent to J. Staten (URS): I have reviewed groundwater monitoring data through 1st quarter 2010 for the above site. Well MW-08 exhibited MTBE at concentrations of 100 ppb and well MW-12 exhibited MTBE at concentrations of 260 ppb. ORC sock was placed in well MW-12 and may have contributed to the decrease of MTBE concentrations. Analytical data for well MW-08 sine October 2007 shows fluctuating MTBE concentrations and there is no decreasing contamination trend in this well. URS proposed spill closure for this site. Spill closure can not be granted at this time. However, monitoring reports could be submitted semi-annually. ORC sock should be placed in MW-8, if this has not been done before. AZ 2-17-2011 An e-mail was sent to K.Shenahan/Asbagh/V. brevdo: I have reviewed semi-annual monitoring report for the above site dated October 13, 2010. Monitoring well MW-06 can be removed from the scheduled sampling. AZ 2-18-2011 Discussed this site with URS at the quarterly meeting. URS informed DEC that MW-06 had a reading of about 300 pbb in January. DEC requested continuing monitoring of MW-06. An e-mail was sent to URS on 2-18-2011. AZ 7-8-2011 Reviewed gw monitoring report through February 2011 and dated May 19, 2011. An email was sent to URS/DDC/V. Brevdo: Dear Kevin, I have reviewed a quarterly monitoring report through February 2011 and dated May 19, 2011, for the above site. The report states that there are some discrepancies in the tank inventory between URS's records and PBS records. This discrepancy should be clarified. A site visit should be conducted to confirm the tanks status. If necessary, GPR studies should be performed to verify if the tanks in question are removed or closed in place. After discrepancies are clarified, a corrected PBS form should be submitted to NYSDEC PBS Section. Contamination was unexpectedly found in a monitoring well MW-6. As per URS recommendation, if re-sampling confirms contamination, an investigation should be performed to determine the extent of the problem. AZ 8-6-2012 The spill was discussed at the DEC/DDC/URS meeting on August 2, 2012. Groundwater monitoring report for the fourth quarter 2011 and first quarter 2012, dated May 17,2012 was discussed. The report stated that all available wells were sampled. However, wells EW-08 AND EW-20 were blocked, EW-09 was destroyed, EW-02 and EW-11 had obstructions in the well. It was decided that URS will attempt to sample blocked wells. Regarding the wells which were destroyed and/or had obstructions, historical data will be submitted to DEC. Groundwater results in nine wells exceeded VOC criteria. Also, after removal of ORC socks, concentrations in three wells rebounded: MW-12 (from 30 ppb to 300 ppb),EW-11 (from 0 ppb to 171 ppb) and EW-13 (from 0 ppb to 200 ppb). URS will continue monitoring this site. I have discussed the site with K. Shenahan over the phone. AZ 8-7-2012 E-mail received from K. Shenahan: Alex, We are sampling the extraction wells they are designated as EW wells. Only two EW wells are not functioning. EW-02 could not be sampled due to an obstruction. It is relatively close to

MANHATTAN WEST 12 DOS -DDC (Continued)

S103478327

the boundary of dissolved-phase contamination, located between wells MW-13 and MW-14, and about 15 feet or so from each. Analytical data from MW-13 and MW-14 over the past 5 years shows low contamination. EW-09 is reported as being destroyed. It is upgradient from the plume, and total VOCs in nearby wells have been 2 ppb or Not Detected over the past 5 years. I recommend that we sample the wells listed and if the levels are such that we could petition for closure we could see if it is necessary to acquire data from these locations. AZ 6-7-2012 An e-mail received from URS: From: McDaid, Daniel Sent: Tuesday, August 07, 2012 4:19 PM To: Shanahan, Kevin Subject: RE: Man W12 sampling Wells within the boundary of dissolved-phase contamination: MW-06 MW-08 MW-10 MW-12 EW-01 EW-11 EW-12 EW-15 EW-18 The following wells were not sampled (green font indicates that the sample collection could be re-attempted): EW-02 Obstruction EW-08 Vehicle parked over well EW-09 Destroyed EW-16 Not enough water EW-20 Vehicle parked over well In summary, here is a full list of wells to be sampled during the upcoming site visit: MW-06 MW-08 MW-10 MW-12 EW-01 EW-08 Vehicle parked over well EW-11 EW-12 EW-15 EW-16 Not enough water EW-18 EW-20 Vehicle parked over well Notes EW-02 could not be sampled due to obstruction. It is relatively close to the boundary of dissolved-phase contamination, located between wells MW-13 and MW-14, and about 15 feet or so from each. Analytical data from MW-13 and MW-14 over the past 5 years shows minimal contamination (See attached). EW-09 is reported as being destroyed. It is upgradient from the plume, and total VOCs in nearby wells (See attached) have been 2ppb or ND over the past 5 years. URS has never sampled any of the extraction wells before, and there is no historical data for these wells in the ISRP. AZ 11-19-2012 Discussed the site with K. Shenahan. There is persistent MTBE contamination probably related to soil MTBE contamination. A soil map attached to the report is not legible. URS will submit another map. AZ 11-20-2012 Email from K.Shanahan: Alex, Yesterday you called me to discuss the above referenced site and specifically URS' report dated September 21, 2012 . You indicated that Figure 3 in Attachment B was not legible enough to discern the boring locations. I have sent you a hard copy in a separate letter. In the meantime, the pdf version is attached. AZ 11-21-2012 An e-mail was sent to K. SHenahan and V. Brevdo Dear Kevin, We have discussed this site yesterday and today. The groundwater at the site still has MTBE contamination which exceeds the standards by an order of magnitude. A reason for this contamination could be that soil at the site was grossly contaminated with MTBE. In order to trace groundwater contamination we need to prepare detailed soil maps showing original soil contaminant levels and the latest confirmation soil borings results. It was agreed that URS will submit these maps to DEC. Sincerely, Alexander Zhitomirsky 5-13-2013 On April 3 and 4, 2012, URS sampled monitoring wells. The data showed that the groundwater in the northeastern corner of the sanitation garage continued to be impacted with low concentrations of volatile organic compounds (VOCs) including MTBE. The highest total VOC concentration detected was in MW-12 with 300 ppb (MTBE was the only compound detected). I have reviewed a Historical Soil Sampling Analytical Results report dated February 1, 2012. The report stated that free phase at the site was treated by a passive product recovery system which was converted to operate as an active groundwater and product recovery system. Also, product recovery was performed using a vac truck. A multi-phase extraction system was constructed at the site in 2003 and was shut down due to equipment failure in 2007. The

MANHATTAN WEST 12 DOS -DDC (Continued)

S103478327

site still has lingering groundwater impacts detected in the northeastern corner near the dispensers. Given the most current soil and groundwater data for the site, URS recommended natural attenuation of remaining soil and groundwater contamination. URS recommended no further action for this site. The report stated that soil sampling completed after MPE system was terminated. In 2007 soil samples were collected. PID screening had elevated measurements indicating petroleum constituents. Moderately elevated VOC exceedances were present in the sample collected from UBR-04. AZ 8-5-2013 Reviewed Groundwater Monitoring Report and Request for Spill Closure dated May 10, 2013. A total of 1,018 gallons of product were reported as being collected by RES through 1999. LiRo reported collecting an additional 88 gallons of free product.. No free product has been observed at the site since September 2003. The most recent soil sampling was conducted in 2007/2008. The soil data indicated that a limited area of contamination remained in the area of MW-08, MW-12, and MW-13 near the former dispenser area. The highest total VOC concentration was about 46,000 ppb. groundwater sampling from from January 2013 ranged from 52 PPB TO 224 PPB in those wells with exceedances of the the NYSDEC criteria. In the latest sampling event in April 2013, the highest total VOC concentration observed was 175 ppb. Based on the above information, URS requested that DEC close spill number 9604262. This request is approved and the spill number is closed. However, there are some discrepancies between the PBS registration and URS' current understanding of the tanks status. A number of tanks are listed in the PBS database as aboveground tanks (ASTs) tanks were closed in place. It is assumed that most if not all of these ASTs were removed from the site. Additionally, PBS lists tanks Nos. 008 and 009 as closed in place, although URS believes that these tanks have been removed. URS should perform a site inspection and verify the tanks status. An updated PBS information should be filed. URS inform NYSDEC when the above information is filed. AZ 8-6-2013 The following e-mail was sent to Kevin Shenahan, M. Asbagh and Vadim Brevdo: Dear Kevin, I have reviewed Groundwater Monitoring Report and Request for Spill Closure dated May 10, 2013. A total of 1,018 gallons of product were reported as being collected by RES through 1999. LiRo reported collecting an additional 88 gallons of free product. No free product has been observed at the site since September 2003. The most recent soil sampling was conducted in 2007/2008. The soil data indicated that a limited area of contamination remained in the area of MW-08, MW-12, and MW-13 near the former dispenser area. The highest total VOC concentration was about 46,000 ppb. Groundwater sampling results from January 2013 sampling event, ranged from 52 ppb to 224 ppb, in those wells with exceedances of the NYSDEC criteria. In the latest sampling event in April 2013, the highest total VOC concentration observed was 175 ppb. Based on the above information, URS requested that DEC close spill number 9604262. This request is approved and the spill number is closed. However, there are some discrepancies between the PBS registration and URS' current understanding of the tanks status. A number of tanks are listed in the PBS database as aboveground tanks (ASTs) tanks closed in place. It is assumed by URS that most, if not all of these ASTs, were removed from the site. Additionally, PBS lists tanks Nos. 008 and 009 as closed in place, although URS believes that these tanks have been removed. URS should perform a site inspection and verify the status of the tanks. An updated PBS information should be filed with the PBS Section of NYSDEC. URS should inform NYSDEC when

the above information is filed. Based on the documentation provided to date, the New York State Department of Environmental Conservation (the Department) has closed the spill case number 9604262. All wells associated with this project should be closed according to the Department's Groundwater Monitoring Well Decommissioning Procedures. All wells should be gaged for the presence of free product before closure. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the Department's spill case closure, which indicates the corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts must be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alexander Zhitomirsky "

Remarks: "upon drilling for wells soil contamination was discovered still under investigation at this time"

EPA Region: 02
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:

Date form received by agency: 09/01/2015
Site name: CON EDISON
Classification: Small Quantity Generator

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "8/23/13-Vought-Duty desk officer. Called AARCO Environmental (John Bonnano Ph:(631) 586-5900 Cell:631-284-7028) for more information and left message to return call to DEC. Vought called cell phone of Bonanno and spill was in containment sump and the sump was cleaned. Possible leak in double wall hydraulic oil line (3 steel line inside a 4 fiberglass) and fiberglass will be tested to see if tight and he will return call to Vought. 10/24/13-Vought-Receivede message from Bonnano that they tested the outwall piping of the line and it passed and as such there was no environmental impact and that they will excavate line. Vought left message to return call to Vought. Vought and DEC Falvey examined PBS registration (2-602986) for site and it is current and shows a 3000-gallon hydraulic oil tank that does not require tightness testing. Vought received callback from and spoke to Bonnano and he noted that NYCDOS did not have funds yet for line replacement and again confirmed no release based on passing test of line's secondary containment. Spill closed by Vought as no release to soil or groundwater. "

Remarks: "Spill into double-walled pipe, still have to test secondary. Contact for responsible party J Shah, 718-334-9138."

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: X001
. Waste name: WASTE OILS

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"Double walled tank, line, sump and they found oil in the sump. When F&N opened up the boot they found the whole secondary containment was filled with oil. DOS foreman said that the tank & system was taken out of service for repairs. 8-6-2008 An e-mail was sent to DDC/URS/V. Brevdo: There is a new spill caused by a hydraulic oil tank. The spill records state that oil was found in the sump. F&N found that the whole secondary containment was filled with oil. DOS foreman said that the tank & system was taken out of service for repairs. The tank area should be investigated. Please submit an investigation plan to DEC. AZ 8/21/2008 There was a duplicate spill number for this tank test failure. Spill # 0802569 was closed out and referred to this case. 8-21-2008 Received a NYC DOS report stating that the motor oil tank #2 (2,000 gallon UST) failed an air tightness test. Follow up testing by Fenley & Nicol showed that there is a leak in the piping (suction line). NYC DOS suspended use of this tank. I sent an e-mail to DDC/URS/V. Brevdo requesting investigation of the spill. AZ 3-9-2010 Reviewed URS report dated August 20, 2009. The report stated that the cause of this spill was a failed tightness test of the suction line associated with 2,000-gallon motor oil UST. In May 2009 Franklin Company Contractors initiated work by tightness testing the suction line. The primary, inner line was tested at 30 psi and the secondary, outer pipe was tested at 5 psi for 30 minutes. During the test, Franklin observed that pressure in the primary pipe dropped while pressure in the secondary pipe increased. These results indicated that there was a break in the primary line but that the secondary pipe was tight. Any release from the primary pipe was contained by the secondary pipe and returned to the tank sump. Franklin excavated and removed the entire length of the old suction line. Franklin found no break in the secondary line and no evidence of soil contamination. Franklin installed and tightness tested a new double-walled suction line. Based on the above information, URS requested closure of this spill number. The request is granted. The e-mail confirming spill closure was sent to J. Staten, Ms. Asbagh (NYC DDDC) and V. Brevdo. AZ"

Remarks:

"Motor oil line failed. Material is leaking into the piping sump. No impact to the environment. The line will be taken out of service and repaired. Unknown who is doing the repair work."

Hoferichter #90221 reports while performing maintenance in TM6397 he found ~ 2 quarts of unknown oil in the earthen sump with 2 gallons of water. Two liquid samples have been taken (oil ID, PCB) and environmental tag #30697 has been placed. There was no smoke or fire, no sewers or waterways, and no private property affected. Clean up pending tanker, crews, and test results. 13-JUN-2002 14:23 CIG Roach #03494 notified. There is no movement of the liquid in this structure. Page 1 of 1 6/13/2002 Consolidated Edison Environment, Health and Safety ChemLab NELAP NY Lab ID No: 10380 Lab Sequence Number: 02-05521-001 Date Approved: 6/13/2002 E2 Incident Number: 143351 Date Received: 6/13/2002 Chain of Custody ID: CC06410 Date Sampled: 6/13/2002 MATRIX: WATER GRAB LOCATION: N/S W.225 ST & BROADWAY STRUCTURE: VAULT 6397 FEEDER ID: QC ID: 07-200206112042 TEST DESCRIPTION RESULT UNIT METHOD ----- Aroclor 1242 < 1.0 ppm EPA 608/8082 Aroclor 1254 < 1.0 ppm EPA 608/8082 Aroclor 1248 < 1.0 ppm EPA 608/8082 Aroclor 1260 < 1.0 ppm EPA 608/8082 15-June-2002 05:24 Hrs. DEC Memo:

"e2mis no 157522 09-Mar-2005 09:51 D. Rohrer 12788 EH&S Manager W. Hedeman 84455 reported while on location for an inspection of the Bronx Cable House discovered 1 quart of cable leaked on concrete from wrapped leaking dead end cables. No sewers, waterways, or private property affected. Env tag 46304 was placed and a pcb sample was taken on EE04834. This is being made a reportable spill due to the planning involved for the cleanup between remediation and scheduling of feeder outages. 09-Mar-2005 10:09 D. Rohrer 12788 This spill was voided and replaced - this site-previously under WEDS-157522. Lab Sequence Number: 05-02079-001 - PCBs < 1 ppm (BRONX CABLE HOUSE - LANDING N/O FORDHAM) Sample were taken from the floor of structure at each wall. The source of oil is unknown due to multiple D Faults. Because the feeders are covered in arc proof tape it is difficult to determine if a feeder is leaking or if it was leaked on from a feeder above. Due to the D Faults it is unsafe to enter this structure until every feeder is properly identified and de-energized. Source is potentially several leaking joints, cables or cable ends. When the feeders are taken out of service for repairs and cleanup, each source will be sampled to determine the equipment responsible for the high PCB results. Engineering, the underground and EH&S are currently working on a plan to take out every feeder in this structure out of service to determine which sections contain D faults. During this outage the leaking sections will be replaced and the cleanup conducted. Lab Sequence Number: 05-03620-001 - TOTAL PCB 5718 ppm (FLOOR OF NORTH WALL) Lab Sequence Number: 05-03620-002 - TOTAL PCB 46 ppm (FLOOR OF SOUTH WALL) Lab Sequence Number: 05-03620-003 - TOTAL PCB 65 ppm (EAST FLOOR OF NORTHERLY WALL) Lab Sequence Number: 05-03620-004 - TOTAL PCB 12 ppm (EAST FLOOR OF SOUTHERLY WALL) Walter Hedeman 84455. 21-May-2005 19:30hrs. EH&S Sr. Spec. L. Fischer reports that the intial cleanup is complete. All 'D' fault feeders were de-energized prior to work within the cable house at Fordham landing. All Arc proofing and spill roll flooring material carpet removed and barrelled. Floors and lower wall areas scrubbed twice with 760 soap and spread with speedy dry to absorb and shoveled into barrels. Floor areas were re-carpeted with spill roll and splicers were sent into the cable house with appropriate PPE to begin re-racking of feeders and addressment of 'D' faults. 10 barrels of PCB waste generated and transported to Van Nest Service center under a one-trip rule by tool room personnel. Once all work is complete the floors will be wiped by chem lab technicians for analysis to investigate if cleanup achieved acceptable clearance results. Note, sampling and final cleaning are on hold do to sensitivity of feeders and potential for large outage requiring splicing work to progress prior to wipe samples and analysis. C. Blaich 87348 31-May-2005 22:40 hrs. UG Env Mech A Esham Gafur 19528 reported cleanup of north east wall and north floor started at 16:30 and completed at 21:30 hours using speedi dri, simple green 460 degreaser generating 1 drum of oily haz for PCB waste to be returned to VNSC under 1 trip rule. Partial cleanup complete. 2 empty drums left outside door of cable house for cleanup tomorrow 15:00 shift. Rich Benkwitt 38373 01-Jun-2005 22:14 hrs. UG Env Mech A Esham Gafur 19258 reports south floor cleaned with speedi dri, simple green and 760 degreaser generating 1 drum of oily haz waste to be transported under 1 trip rule to Van Nest SC for proper disposal. Gate locked, tag in place and one empty unmarked drum left outside entrance door. Rich Benkwitt 38373 21-Jun-2005 16:41. Chem-Lab was cancelled due to the crew's

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002
. Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROSSAN CALLED LT. RUNFULU; NYCFD SQ. 61, WHO CONFIRM THE SPILL. CALLED STEVE SANGESLAND WHO DECIDED THAT WE SHOULD VISIT THIS SITE. ONCE WE ARRIVED AT THE SITE, WE DETERMINED THAT THE SPILL MATERIAL IS INDEED # 2 FUEL OIL. SPILL HAS BEING CONTAINED AND CLEAN-UP HAS STARTED. A.L.EASTMOND DID THE CLEAN-UP. WILL SEND PAPER-WORK. A.L. EASTMOND, faxed SPILL REPORT/CLOSURE ON 1/16/2001. Report includes. Address; 20/40 225th Street (Bronx) Owner/Agent; Bronx Presbyterian Hospital Cause; Leaking flange on mobil tank (6,500-gallon tank) Work performed; Applied speedy-dry to oil and pick-up. Removed 200 bags of dirt, speedy-dry with oil. Removed heating trailer. Apply speedy-dry to area under heating trailer and pick-up 280 bags. (manifest submitted) Pressure wash entire area, disposed or 300-gals. of oil/water. (manifest submitted) Recommends that this spill be closed out due to absence of any signs of oil. 1/30/2002 - Sangesland received closeout documentation from Eastmond (waste manifest & oily water manifest from street cleaning) spill closed "

Remarks: "TANKER PARKED ON ST FEEDING MOBIL BOILER TANKER IS LEAKING. LEAK CONTINUING AT THIS TIME BUT SPILL DYKED AND IS BEING RECOVERED "

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was DEMEO 10/27/03. J. Krimgold spoke to Russ Holcomb (Deputy Chief DOT Division of Bridges). Staining on the concrete pad of the active transformer. DOT believes that the oil in the transformer has been changed to a non-PCB oil circa 1992. However, currently searching records to support this. DEP responded and found another transformed (out of service) on the ground with rusted bottom and discolored soil around it. Trade -Winds was contracted to cleanup and remediate. Contaminated Soil Letter has been sent to : Mr. Russell Holcomb NYC

Spiller Name: JOHNATHAN SANTOS
 Spiller Company: UNKNOWN
 Spiller Address: BROADWAY AND 225TH ST
 Spiller Company: 999
 Contact Name: JOHNATHAN SANTOS
 DEC Memo: "Probably easy to close out. Mr. Santos says there is about 20 gal of grease/oil that leaked out of a gear box. Material is contained in a cement floor area and is solid/jelly like material (not going anywhere). The Control room is 30 feet up a ladder and they are working out the logistics of getting a contractor to climb up, clean it and carry the buckets of material down. They will call back when the work is done. (within 2 weeks?) 1/27/2010 Johnathan Santos called Sangesland to say the cleanup is complete. The material has been removed and the area cleaned. Other cleanup work is being done (not related to the grease problem) When all of this work is done, a single manifest will be generated for all of the waste."
 Remarks: "used for gear lubrication - all contained in concrete room - cleanup pending (possibly Wednesday)"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Large Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RIVERDALE TRANSMISSION (Continued)

1000214609

Site name: RIVERDALE TRANSMISSION
Classification: Not a generator, verified

. Waste code: NONE
. Waste name: None

Date form received by agency: 04/29/1986

Site name: RIVERDALE TRANSMISSION
Classification: Large Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F004
. Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: CRESOLS AND CRESYLIC ACID, AND NITROBENZENE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Evaluation Action Summary:

Evaluation date: 10/11/1993
Evaluation: COMPLIANCE EVALUATION INSPECTION ON-SITE
Area of violation: Not reported
Date achieved compliance: Not reported

FINDS:

Registry ID: 110004353299

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

 DEC Memo: "04/18/07-Vought-Off hours responder. Vought responded to site and FDNY 19th Battalion (Captain Roach 718-430-0219) onsite. Spill occurred when #4 fuel oil was being transferred from one 25000-gallon #4 fuel oil UST to another. Spill was discovered at 5am. Spill inside building coming out of entry port of supply return lines into wall. Concrete in good condition in boiler room however sump affected. DEC notified by FDNY and arriving on-site. No odor complaints received to date. Site maintenance director is Gildardo Arvelaez (718-365-9659)

and owner of site is Fordham Hill (Everton Moore 718-365-9600). Oil came out of AST manway flowed down soil hill and impacted sewer. As per petrometer, 4300 gallons in North tank and 20000 gallons in South Tank. Unable to determine spill amount as petrometers may not be working correctly. Spill amount approximated at 300-gallons. Eastmond arrived onsite and began cleanup. Eastmond hired by Fordham Hill. DEC requires: 1)submission of Eastmond invoices 2)collection of endpoint soil samples 3)petrometer repair replacement. Vought sent letter with above requirements and one month due date to owners as per PBS: Fordham Hill Owners 1 Fordham Hill Oval Bronx, NY 10468 Ph: 718-365-9600 Fax: 718-733-0472 05/18/07-Vought-Office visit by Gildardo Arvelaez who provided endpoint soil analyticals from Eastmond (eight soil samples were collected and showed no TAGM 4046 Soil Cleanup Objective Exceedences and provided letter from Fordam Hill stating that two new petrometers were installed. Arvelaez also provided invoices from Eastmond that included pressure washing of basement and cleaning of three sump pits. Spill closed by Vought and NFA provided to Arvelaez."

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

"11/2/05: This spill transferred from J.Kolleeny to S.Kraszewski. Refer to previous spill #9613005. 01/13/06: According to a letter sent in May 2003 by DEC, a Field Investigation was supposed to take place to satisfy the closure and removal of two 28K tanks. This spill seems to be the beginning work for this investigation but it seemed to be halted. Mentioned in the NYCHA spill report, the boring encountered what was initially thought to be contamination but was soon identified as coal ash fill material. No documentation of the field investigation report. Need to know if it was ever completed. Call NYCHA and ask for missing tank closure report. - SK 01/26/06: this spill transferred from S.Kraszewski to Q.Abidi 03/29/06: This spill transferred from Q. Abidi to Koon Tang. 07/02/09: J.Kann - spill closed based on information for spill 0001287 (NFA issued in April 2006). Site was not linked in the database because of the spelling of Avenue. "

Remarks: "Conducting a soil boring under a DEC approved site plan, PID reading of 122 ppm"

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Number: 001
Tank Id: 32835
Material Code: 0003
Common Name of Substance: #6 Fuel Oil (On-Site Consumption)

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground
L09 - Piping Leak Detection - Exempt Suction Piping
E00 - Piping Secondary Containment - None
H00 - Tank Leak Detection - None
B00 - Tank External Protection - None
J02 - Dispenser - Suction Dispenser
F04 - Pipe External Protection - Fiberglass
G00 - Tank Secondary Containment - None
K00 - Spill Prevention - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
A00 - Tank Internal Protection - None

Tank Location: 1
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 04/28/1958
Capacity Gallons: 5000
Tightness Test Method: 21
Date Test: 02/19/2014
Next Test Date: Not reported
Date Tank Closed: Not reported

Tank Info:

Tank Number: 001
Tank Id: 180528
Material Code: 0015
Common Name of Substance: Motor Oil

Equipment Records:

E01 - Piping Secondary Containment - Diking (AG only)
I05 - Overfill - Vent Whistle
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
J02 - Dispenser - Suction Dispenser
L09 - Piping Leak Detection - Exempt Suction Piping
G06 - Tank Secondary Containment - Remote Impounding Area
I04 - Overfill - Product Level Gauge (A/G)
C01 - Pipe Location - Aboveground
K00 - Spill Prevention - None
G10 - Tank Secondary Containment - Impervious Underlayment
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating

Tank Location: 3
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 04/01/2003
Capacity Gallons: 1500
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: Not reported
Register: True
Modified By: LSZINOMA

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

- . Waste code: D007
- . Waste name: CHROMIUM

DEC Region: 2
DER Facility ID: 228191
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY 10/04/05: Spill case transferred from J. Kolleeny to A. Zhitomirsky, who is DEC project manager for this DDC site. - J. Kolleeny 10/07/2005 The site has free product plume. AZ 10/24/2005 Quaterly Report from 5/24/2005 from LiRo was reviewed in July 2005. Reviewed and approved proposed soil boring locations for the first round of soil sampling. AZ 1/24/07 At the meeting with DDC/URS on January 10, 2007, the site was discussed. URS will prepare a site map with existing borings/wells and tank locations. A site visit will be arranged. AZ 3-17-2009 An e-mail was sent to Jane Staten (URS): What's the status of this spill? I do not have any updates since 2007. AZ 3-17-2008 J. Staten replied that she contacted Mike Murphy,DSNY, about this spill number. URS wantS to make sure which tank the spill report is referring to before they spend the money for an investigation. AZ Michael R. Murphy NYC Department of Sanitation Facilities & Equipment 125 Worth Street, Room 823B New York, N.Y. 10013 (T) 646-885-4876 (C) 646-235-3041 (E) mrmurphy@dny.nyc.gov 9-2-09 URS in their report dated April 24-09 stated that they continue to research spill #9705837. AZ 1-11-10 Reviewed free product recovery and groundwater monitoring data for the period April through June 2009. VOCs were detected in wells LMW-09 and LMW-11 ranging from 1,530 ppb to 1,017 ppb respectively. Contaminant concentrations increased in a couple of wells this quarter. AZ 4-5-2010 Reviewed a URS's report dated February 1, 2010. No free product has been detected at the site in over six months. URS will reduce the frequency of the product recovery visits from monthly to quarterly. VOC concentrations ranged from 6 ppb to 350 ppb. AZ 6-3-2011 An e-mail was sent to K. Shenahan: Dear Kevin, I have reviewed a report covering the period of October - December 2010 and dated April 28, 2010. The report provided a table with bulk storage records. This table indicated that a number of discrepancies exist between the URS records and the current PBS records including contents, status and capacity of tanks. A field inspection should be performed by URS. A

reconciliation of existing tanks, past site plans, tank closure reports and NYSDEC's PBS registry data should be performed. URS should verify how many USTs were historically present and/or may still be located on site. Size, status (active/closed in place/removed) and contents of the existing/closed in place/removed tanks should be confirmed. Corrected detailed information should be reported to the DEC PBS Section and included in next monitoring report. AZ 11-7-2011 An email was sent to URS (Kevin Shenahan): Dear Kevin, I have reviewed a report covering the period of January - March 2011 and dated July 28, 2011. The report provided a table with bulk storage records. This table indicated that a number of discrepancies exist between the URS records and the current PBS records including contents, status and capacity of tanks. During a recent site visit, URS confirmed the accuracy of the status of several tanks. However, the status of many tanks is still unknown. The tank status should be finalized in the next monitoring report. Corrected detailed information should be reported to the DEC PBS Section. Sincerely, Alexander Zhitomirsky Engineering Geologist 2 NYSDEC Region 2 Division of Environmental Remediation AZ 7-31-2012 The following e-mail was sent to URS/V. Brevdo/M. Asbagh: Dear Kevin, I have received a groundwater monitoring data report for the first quarter 2012 and dated May 1, 2012. This report evaluated criteria for closure of spill #9705837. According to the report, the source of contamination was at Tank Area 4 and 5, which contained a 2,000-gallon gasoline UST (Area 4) and 1,000-gallon waste oil UST (Area 5). The tanks in Area 4 were removed in 1994 and the tank in Area 5 was replaced in 2000. However, spill report #9705837 states that spill#9705837 was reported when 5,000-gallon #2 fuel tank failed the test. This discrepancy should be resolved. Sincerely, Alexander Zhitomirsky Engineering Geologist 2 NYSDEC Region 2 Division of Environmental Remediation AZ 3/15/2013 Reviewed report dated 10-11-2012. The report requested that this spill number is transferred to Manhattan West 8 site. This spill is already attributed to Manhattan West 8 site. AZ 5/28/2013 Reviewed a proposed Work Plan dated February 20, 2013. Discussed the site with K. Shenahan over the phone. An e-mail was sent to K. Shenahan/V. brevdo/M. Asbagh: Dear Kevin, I have reviewed a Work Plan for the above site dated February 20, 2013. The Work Plan calls for investigation of a 5,000 gallon UST which failed a tightness test. This tank was presumably closed in place. The Work Plan submitted by URS is conditionally approved. URS should proceed with a geophysical survey of the designated areas. However, the Work Plan has not recommended any investigation of the piping and fill port associated with this UST. Also, only one well was recommended for installation. If soil contamination is encountered, three monitoring wells should be installed. After geophysical survey is completed, a map with the proposed soil boring locations should be submitted to DEC. The Work Plan should be modified to reflect the above mentioned comments and submitted to DEC. Sincerely, Alex Zhitomirsky 5-28-2013 E-mail from K. Shenahan: Alex, Thanks for the conditional approval. We will send you the results of the geophysical investigation and review the best locations for borings and wells. In addition, we will include investigation of remote fill and piping to the extent feasible. This will also be reviewed with you prior to drilling. Kevin J. Shanahan 7-29-2013 Contacted Kevin Shenahan. The geophysical showed potentially 3 USTs. A lot of potential piping was discovered. Nothing has been done at the site before. There two options: 1. Sample soil

and ground water and if contamination is found, excavate the tanks and piping, if feasible. 2. Excavate the tanks and piping if feasible. Kevin will contact DDC and look for their input. AZ 8-6-2013 The following e-mail was received from K. Shenahan (URS): Alex, As you requested, URS is re-issuing this e-mail documenting the boring locations and plan to install groundwater monitoring wells in accordance with the approved March 8, 2013 Work Plan. A total of 15 borings are proposed. If petroleum contamination is encountered, we will install at three groundwater monitoring wells around each tank and sample groundwater. We will also install additional wells as necessary to delineate the extent of free product or dissolved phase contamination. We have also attached the geophysical survey report for your files. Thanks, Kevin J. Shanahan 8-13-2013 The following e-mail was sent to K. Shenahan/V. Brevdo/M. Asbagh/H. Roberts: Dear Kevin, I have reviewed a modified Work Plan to install soil borings and groundwater monitoring wells. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Sincerely, Alexander Zhitomirsky 4-10-2014 The following e-mail was sent to K. Shenahan and V. Brevdo: Dear Kevin, I have reviewed an Investigation Summary and Remedial Plan for the above site. The Remedial Plan for this site proposed removal of tank#008 and any remaining piping within the footprint of the excavation. Also, limited soil excavation will be performed. I concur with this Work Plan. Former fill port should be located and excavated, if feasible. Post excavation samples should be taken. URS should include proposed number and locations of the post excavation samples in the Design Analysis Report. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Sincerely, Alexander Zhitomirsky 9-19-2014 An e-mail was sent to K. Shenahan/V. Brevdo: Dear Kevin, I have reviewed a Design Analysis Report (DAR) for this site received on July 1, 2014. DAR proposed removal of tank#008 and any remaining piping within the footprint of the excavation. Also, limited soil excavation and additional investigation will be performed. I concur with these proposals. Former fill port should be located and excavated, if feasible. Post excavation samples should be taken. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on and off site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alexander Zhitomirsky 10-13-2015 Reviewed a monitoring report through the Third Quarter of 2015, and dated December 19, 2014. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. Free phase product is found in one well at the site. URS will implement the proposed supplemental investigation. AZ 3-9-2016 Reviewed a monitoring report through the Fourth Quarter of 2014 and

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued)

S102659627

the first Quarter 2015, and dated June 5, 2015. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. URS will excavate test pits and collect other information to verify that excavation of the tank is feasible, and to collect information necessary for the final design of the tank removal. AZ 5-9-2016 Reviewed a monitoring report through the second Quarter of 2015, and dated October 20, 2015. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. URS will excavate test pits and collect other information to verify that excavation of the tank is feasible, and to collect information necessary for the final design of the tank removal. The dissolved phase contamination and the free product are found only in the immediate area surrounding Tank No. 8. AZ 8-15-2016 Reviewed a monitoring report through the third and fourth Quarters of 2015, and dated January 8, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. A test pit was excavated in June 2015 near Tank No.008. Piping was encountered pocket of stained soil was encountered. PID readings were elevated but there were no exceedances in three soil samples. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. The dissolved phase contamination and the free product are found only in the immediate area surrounding Tank No. 8. About 0.01' of free product was found in July 2015. The petroleum absorbent sock was reinstalled at that time. AZ 1-26-2017 Reviewed a monitoring report through the first Quarter of 2016, and dated June 8, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. URS will retain a qualified remediation contractor to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. AZ 3-21-2017 Reviewed a monitoring report for the second Quarter of 2016, and dated August 15, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. URS will retain a qualified remediation contractor to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. MW-06 had 0.1' of product in May 2016 and the absorbent sock was 50% saturated. AZ 5-24-2017 Reviewed a monitoring report for the third Quarter of 2016, and dated November 29, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. URS will retain a qualified remediation contractor to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. The absorbent sock in wMW-06 was 50% saturated in August 2016. AZ 9-7-2017 Reviewed a monitoring report for the Fourth Quarter of 2016, and dated Feb 16, 2017. Tank No. 008 and surrounding soil will be excavated. DEC

approved the excavation in September 2014. URS has retained CGE to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. Monitoring well MW-06 had 0.01' of free-phase product in November 2016. AZ 10-26-2017 Reviewed a monitoring report for the First Quarter of 2017, and dated April 19, 2017. DEC approved the excavation in September 2014. It was determined that underpinning would be required during the excavation. However, Tank#8 is located adjacent to the building foundation, preventing access for the underpinning construction. A heavy sheen was observed in monitoring well MW-06 in February 2017. AZ 2-6-2018 Reviewed a monitoring report for the Second Quarter of 2017, and dated August 8, 2017. DEC approved the excavation in September 2014. It was determined that underpinning would be required during the excavation. However, Tank#8 is located adjacent to the building foundation, preventing access for the underpinning construction. From March through June 2017, no product has been observed in well MW-06. AZ"

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5/26/15: Mahat DEC Mahat left a phone message to Mr. Isuf Celaj (718.882.8116) inquiring to follow up with the repair and retest. 6/11/15: Mahat DEC Mahat received an email from Renae Lewis (Retained Contractor) who performed the TT. Report has been uploaded on D2 for reference. Tank- Passed Fill- Passed Suction- Passed Return - Passed Vent - Passed with comporessin vent alarm removed. Renae will perfrom further repair and a completed report will be provided to the Department for a closure. 6/19/15: Mahat DEC Mahat received a call from Renae and he mentioned that tank has passed the pressure test once he removed the vent alarm. A complete closure reprot will be submitted to the Department for a closure. DEC Mahat received an email with the passing TT result. Tank will be removed from the site. and new tank will be instlled on site with smaller capacity. Based on the phone conversation and reprot, Department does not warrant any further investigation on the site. Hence, the spill case is closed in NYSDEC Spill Database. "
Remarks:	"5000 gal tank."

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D018
. Waste name: BENZENE

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

- . Waste code: D001
- . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Tank Info:

Tank Number: 002
Tank Id: 219574
Material Code: 0008
Common Name of Substance: Diesel

Equipment Records:

E00 - Piping Secondary Containment - None
L09 - Piping Leak Detection - Exempt Suction Piping
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
F01 - Pipe External Protection - Painted/Asphalt Coating
G09 - Tank Secondary Containment - Modified Double-Walled (Aboveground)
K00 - Spill Prevention - None
J02 - Dispenser - Suction Dispenser
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
I05 - Overfill - Vent Whistle
H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)

Tank Location: 3
Tank Type: Steel/Carbon Steel/Iron
Tank Status: In Service
Pipe Model: Not reported
Install Date: 07/01/1986
Capacity Gallons: 250
Tightness Test Method: -
Date Test: Not reported
Next Test Date: Not reported

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Program: BCP
Site Code: 529560
Acres: 1.64
HW Code: C231102
SWIS: 3101
Town: New York City
Record Added Date: 06/30/2016
Record Updated Date: 10/06/2017
Update By: MJKOMORO
Site Description:

Location: The Site is located at the northeast corner of the intersection of 207th Street and 9th Avenue, in the Inwood section of Manhattan, City of New York, and State of New York. According to the New York City tax maps, the BCP Site is bounded by Ninth Avenue to its west, West 207th Street/ University Heights Bridge approach to the south, West 208th Street to the north (mapped but not built street), and Exterior Street to the east (mapped but not built street). Beyond the Site boundary to the east and to the north the land is a natural wooded riparian area bounded by the Harlem River and North Cove, respectively. Site Features: Currently, the entire Site is an asphalt-paved lot used for parking. There is a parking attendant trailer in the northwestern corner of the parking lot, and the parking lot is surrounded by a chain link fence. Current Zoning and Land Use: The current zoning for the BCP Site is M1-1, which allows for light industrial uses. According to the NYC Department of Planning, offices, hotels and most retail uses are also permitted within M1-1 districts. The nearest residential properties are located approximately 500 feet northwest of the BCP Site. Surrounding land uses located immediately adjacent to the property include a New York City Transit rail yard and office building, a gas station, a parking facility and a food and beverage commercial store. Other land uses within the Site vicinity include: light commercial facilities, places of worship, multi-family housing, and a school. Past Use of the Site: The BCP Site was historically used for: auto repair and sales shop, auto wrecking, houseboat mooring, trailer parking, dumping and vacant land. Undocumented underground storage tanks may be present in the southwest section of Lot 1 associated with the auto repair and auto wrecking shops that were present from 1930s to at least the 1950 s. The eastern portion of the property was part of the Harlem River until filling activities occurred between 1951 and 1968. The fill material was of unknown origin and the former Harlem River bed may contain hazardous materials. Site Geology & Hydrogeology: The Site is generally characterized by historic fill from ground surface to a depth of approximately 10 feet below land surface (bls) consisting of anthropogenic materials such as brick, concrete, ash, plastic and wood with intermittent sandy and/or gravely silt and silty sand layers. Silty clay, clay and vegetative matter (peat) was observed in several borings at depths ranging between 10.5 to 12.5 feet bls, consistent with the historical river and associated wetlands. The Site soils are classified as urban land, tidal marsh substratum (UmA), 0-3 percent slopes and urban land, reclaimed substratum, 0-3 percent slopes (UrA). The geology in the area of the Site consists primarily of metamorphic rock and bedrock consists of

Env Problem: Cambrian-Ordovician Inwood Marble (USGS). Bedrock was not encountered during the AKRF Phase II investigation. The average depth to groundwater is 9.3 feet bls and the range in depth is 7.5 to 11.0 feet bls. Groundwater flow most likely flows in a northeasterly or southeasterly direction toward the Harlem River and it may be tidally influenced given the proximity to the Harlem River.

Health Problem: Information submitted with the BCP application regarding the environmental condition at the site are currently under review and will be revised as additional information becomes available.

Dump: Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spiller Extention: Not reported
DEC Region: 2
DER Facility ID: 259550
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was KRIMGOLD 2-275 GALLONS ASTs show missing fuel oil during building renovation. Bayside is not servicing this builing at this time. Unknown if oil was drained to sewer or stolen. AJS. 11/27/02. J.Krimgold spoke to Mary Langevin (718) 562-9427, the homeowner. The 4 story brownstone building has 2x275 gal tanks located in the basement. On November 25, 2002 oil was delivered to the building by Bayside Fuel, however, on November 27 she have found that the tanks are empty. She will contact her insurance co. and Milro (recommended by Bayside Fuel) to perform a cleanup. 11/29/02. J. Krimgold spoke to Mary Langevin. She informed that her insurance co. is not covering the cost of environmental cleanup. She will use her own funds to hire a contractor. She is currently negotiating with Miro as a potential contractor. 12/03/02. J. Krimgold spoke to Paul Basso (Milro). Milro went to the side and confirmed that tanks are empty, the buttom of one tank is porous and might developed a leak. There is a hall in the concrete floor in the vicinity of tanks, with evidence of oil in it. Paul B. also informed that a bedrock was found about one foot bellow the floor. Milro is planning to begin excavation on 12/5/02. 12/9/02. J. Krimgold @ site. Spoke to Steve Gordon (Trade Winds Env.) which was hired by the homeowner to do the job. 2x275 gal tanks, contaminated concrete and soil was removed from the tank room. However, oil probably escaped through a fractured bedrock, which was found under the thank room floor. Based on the amount of oil left in the tanks, it was assumed that about 200 gal was lost, and not recoverable at this time. It was agreed that Trade Winds will apply bio-solution into bedrock fractures in hope to contain and biodegrade the oil. Trade Winds should follow with a report upon completion of bio-injection. 04/07/03. Spoke to Steve Gordon he should submit a report in two- three days. 05/05/03. Krimgold. Mary Langevin - homeowner called DEC and requested a spill closure letter. I explained that the case will be closed only after DEC receipt of the remedial report and a Non-Haz. Manifest. 08/18/03. Trade-Winds submitted remedial report and Non - Haz. manifest. NFA is required. YK."

Remarks: "caller reporting tank empty after being filled yesterday - unk where oil went # for superintendant - #917-560-2296"

 DEC Memo:

"06/14/2007: This spill case was transferred to A. Doronova. AD 06/19/2007: Reviewed Tank Closure report. It states that: On July 16, 2003 one 3,000 gallon fuel oil UST was permanently abandoned in-place at the Harlem River Bridge site. It is DDC site. Visual inspection of the tank reveled no evidence of leakage. Since the tank was closed in place, post tank closure soil samples were not collected. However four soil borings, SB-01 through SB-04, were performed adjacent to UST on August 11, 2003. Analytical results of sampling revealed the

HARLEM RIVER FACILITY (Continued)

S104501355

presence of residual concentrations of VOCs in two of the four samples and SVOCs in one of the four samples, all at concentrations below ASCs (Allowable Soil Concentration). Based on the data consultant (Shaw) requested NFA for this spill. In lab data method detection limit is elevated and varies all the time for the same compound depending of the soil boring. Have to ask J. Kolleeny. AD Sent an email to A. Samani (DDC) with the request for additional soil and groundwater investigation in the vicinity of the closed in-place fuel oil UST. (cc: J. Kolleeny; T. Ahmad; J. Staten and H. Roberts). AD 09/17/2007: Received Additional Site Subsurface Investigation Work Plan dated September 17, 2007, submitted by URS. The plan proposes installation of two monitoring wells on the eastern and western sides of abandoned in-place UST. It states that monitoring wells cannot be installed north and south of the USt, because West 206th Street and an existing building located immediately north and south of the UST. URC proposes to collect soil and groundwater samples and analyze them for VOCs and SVOCs. Monitoring wells also will be surveyed for location and elevation. According to the Tank Closure Report, submitted by Shaw earlier, four soil borings were advanced around the fuel oil UST for collecting end-point samples. Soil samples from borings on the northern and southern sides of the UST indicated elevated concentrations of SVOCs. This data indicates, that installation of monitoring wells to the north and south of UST is feasible. Have to speak to J. Staten of URS. AD 09/27/2007: Spoke with J. Staten regarding feasibility of installation of the wells on the northern and southern sides of UST. She said that it involves obtaining a street permit, traffic plan and other procedures. I asked, if it possible to relocate MW-01 close to the UST. I sent a Figure 3 with indication of new location of MW-01 to Jane by fax. AD 12/17/2007: Received Field Investigation Summary and Request for Spill Closure from URS. The summary states that on October 16, 2007 two monitoring wells were installed at the approved locations. Two soil samples were collected from each well borehole at 3 to 5 feet bgs and 7 to 9 feet bgs. The analytical data indicated presence of trace levels of VOCs and SVOCs at concentrations below TAGM #4046 soil guidance values. On November 14, 2007, groundwater samples were collected from wells MW-01 and MW-02. According to labresults, presence of any VOCs or SVOCs were not detected in the sampled groundwater. Based on the data, URS recommended closure of the spill case. AD 12/18/2007: Spoke with J. Kolleeny regarding this site. Sent a No Further Action letter to A. Samani (cc: J.Kolleeny; M.Asbagh; H.Roberts and J.Staten). PDF version is in eDocs. AD"

Remarks: "gross failure."

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 39722
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

J02 - Dispenser - Suction Dispenser
E00 - Piping Secondary Containment - None
L09 - Piping Leak Detection - Exempt Suction Piping
G03 - Tank Secondary Containment - Vault (w/o access)
F00 - Pipe External Protection - None
A00 - Tank Internal Protection - None
B01 - Tank External Protection - Painted/Asphalt Coating
D01 - Pipe Type - Steel/Carbon Steel/Iron
K00 - Spill Prevention - None
C01 - Pipe Location - Aboveground
I04 - Overfill - Product Level Gauge (A/G)
I05 - Overfill - Vent Whistle
H99 - Tank Leak Detection - Other

Tank Location: 3

Date form received by agency: 03/02/2010
Site name: NYCT-215 SIGNAL SHOP
Classification: Large Quantity Generator

. Waste code: D001
. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D008
. Waste name: LEAD

Date form received by agency: 04/25/2008
Site name: W. 215TH STREET
Classification: Small Quantity Generator

ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

- . Waste code: D002
- . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: "5/17/16-Zhune spoke to Isabel Potter from NYC Transit 646-252-5777.

Isabel said the tank fail the test with a dry leak. Sprague will repair the tank. 5/20/16 aTTF letter sent to: NYCT Attention: Francine Ocampo 2 Broadway Floor 27 New York, NY 10004 Spill assigned to Rashad Omar (runner). 5/20/2016: Rashad 4065 10th Avenue has alternate addresses of 4056 9th Avenue, 4065-4079 10th Avenue, and 400-450 West 218th Street. Various other spills exist for this site. PBS 2-190209. Sent email to Francine: Just to let you know, I was also additionally assigned a spill that was called in on Tuesday May 17th, spill#1601622 (PBS# 2-190209) for the Kingsbridge Bus Depot. Thanks, have a nice weekend. 7/7/2016: Rashad Received email from Francine: Please find attached the formal request for closure of Spill #1601622, Kingsbridge Depot, DSL-1 sump failure. If you require any additional information please contact me directly, 646-252-5768. Attached to email was closure report, it has been uploaded to D2. Review of letter is as follows: On May 17th 2016 a hydrostatic test of the sump for the fill port of DSL-1 was tested and failed. The tank was taken temporarily out of service, the assessment indicated one of the pipe penetrations was found to be not tight . The sump was repaired and retested on June 29th and July 1st, the tank is now tight and passed the hydrostatic testing. Spill will be closed as no spill occurred, repairs made, and passing tightness test was conducted."

Remarks: "fill pump failed test. No product loss, tightness test"

 DEC Memo: "1/29/2014 - Feng - called the tank tester Michael Sepe (631-714-9156) and left a message for him to call back. 8/28/2015 - email to Jay Shah of NYC Sanitation Jay, The spill was reported on 1/29/2014 for a tank test failure and then nothing has been received. Could you please tell me the status of this case? What happened and what work has been done to address the problem? Thank you, 3/29/2016 - Feng - Called NYC Sanitation (718-334-9138) and talked to Jim Manfredy. Jay is out of the office today. He will leave Jay a message that DEC needs documentation to close the spill. 3/30/2016 Feng This spill is transferred from J. Feng to V. Brevdo as per J. Vought. 3/30/2016 Spill transferred to Alex Z., as per V. Brevdo. AZ 4/26/2016 Spoke with Kevin Shanahan. He will contact DDC and inquire if this spill could be included in their list. AZ 2-15-2017 Reviewed a report by URS dated 11/4/2016. The report stated that water was found on several occasions in the sump and secondary containment of diesel tank #25. Also, the remote fill was excavated and a small leak was found at the top of the Fernco coupling located under the spill bucket. I discussed this spill with Kevin Shanahan over the phone. Soil borings and monitoring wells will be installed to confirm that soil and groundwater are not impacted by the spill. A work plan will

be submitted by URS. AZ 6-21-2017 The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Kevin, I have reviewed a Work Plan for this site dated May 8, 2017. URS proposed installation of six soil borings, installation of groundwater monitoring wells at three of those boring locations, and collection/analysis of soil and groundwater samples. I concur with this proposal. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov 8/1/2017 Reviewed a WP dated 5/8/2017. Discussed the site with K. Shanahan. Fill port and the secondary containment piping were leaking and repaired. Three wells and three boring were proposed. URS have not obtained as built drawings for the tanks. URS will inquire from NYC DOS more details regarding the secondary piping location. SB-11, SB-13, and SB-12 will be finished as wells. URS received geophysical results, but have not evaluated them yet. URS will notify DEC regarding results of the geophysical investigation and the secondary piping location. AZ 8/2/2017 Email from K. Shanahan: Alex, One August 1, 2017 we discussed the environmental investigation work plan contained in our report submitted to the NYSDEC on May 8, 2017. Based on our conversation, we agreed to the following approach with respect to planned investigation to address the above referenced spill number.

1. Add tank piping to the proposed investigation plan, if available.
2. Install a monitoring well at proposed boring location SB-11.
3. Install monitoring wells MW-07 and MW-08 at proposed borings locations SB-12 and SB-13.
4. Install borings SB-12 and SB-13 at proposed monitoring well locations MW-07 and MW-08.
5. Install monitoring wells at borings SB-12 and SB-13 if petroleum impacts are detected during drilling. The attached figure illustrates these revisions to the original work plan. Please reply to this e-mail with your approval. Thanks, Kevin J. Shanahan Project Manager, Environment Business Unit, Metro New York Direct 716-923-1215 Cell 716-480-7352 kevin.shanahan@aecom.com 8-3-2017 Email to K. Shanahan/V. Brevdo: Kevin, As per your proposal and the telephone conversation on August 3, 2017, you can move monitoring well MW-09, if feasible. I concur with the Work Plan. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. spill for the gas station at this location. 4/23/07 - Carlson - Received email from Steve Frank at Liro Engineering : The trench was excavated to install a new water line. Trench length is more than 100 ' but the affected area is only about 10' wide. The trench is about 10' deep there. The contractor reported that nothing unusual was noticed in the soil when the trench was dug and that no liquid was in the trench when excavated. The substance in the trench was not noticed until after the big rainstorm. We inspected the fluid Weds. AM, collected a sample and called the hotline as it smelled and looked like a petroleum product to us. The trench is still open and the Contractor does not intend to backfill with the soil that was removed from the trench. Received laboratory results of sample. DEC Carlson performed site inspection. The sewer line is being installed at approximately 8 ft below grade. One portion about 10ft long is contains water and floating product. This portion is directly downgradient of the Hess station. The portion with water and product is greater than 8 ft deep, and will have a concrete box and manhole around it. The construction operator reported seeing soil staining when groundwater was encountered at approximately 8 ft below grade. Met with the engineer on site Attef Farag (phone 973-623-2999, email afarag@kseng.com). Met with Hess's consultant, Jonathan Curran from Delta. Tim Fisher from Delta will be managing this incident. I indicated to Attef Farag that the water in the excavation will need to pumped out and properly disposed of. 05/14/07-Vought-Called Farag for update on trench installation and to notify him that spill will be closed and referred to Hess open spill at adjacent site. Vought left message for Farag to return call to DEC. 05/16/07-Vought-Called Farag for update as no call received and told to call 718-424-4157. Vought called Steve Frank (Liro) and left message to return call to DEC and will provide him with contact info for DEC Carlson and Hess (who will be managing remediation of source site). 06/21/07-Vought-Called Frank (718)321-3136x236 for update and left message that case will be closed and referred to open spill for source Hess Station located at 401W207th Street (spill #0201597). Spill closed by Vought."

DEC Memo:	"7/29/05 - Transferred for closure review to M Johnson. 6/15/06 Transferred for closure review to T Knizek. 9/8/06 transferred to bf 9/8/06 faxed and sent by certified mail outstanding ttf letter to Robert Walton. Spoke to him on phone. He said he will make sure he takes care of it. bf 9/28/06 received response letter from Mr. Walton. bf 11/10/06 called A.L. Eastmond (718)378-7000 who did tank removals on 12/1/99. Left message to get back to me with more info. bf 8/17/12 Spill re-assigned to T. Demeo as per RSE. bf 12/4/12 TTF sent. AF 1/2/13 AFrischeisen intern Conversation with Elaina Jones from VA: Given the age of the case (April 7, 1994) this documentation will be provided as quickly as possible and I will continue to update you by phone and/or by e-mail. 1/18/2013 Sangesland reviewed a package of information from Elaina Jones from the VA Medical Center. Documents (see eDocs) show Eastmond dug out and removed 8 USTs from the property (all buried tanks) and reinstalled several new fiberglass tanks during 1998 & 1999. The tank/s associated with this TTF has been removed. Spill case closed out."

- Used oil transporter: No
- . Waste code: D001
 - . Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

 - . Waste code: D002
 - . Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

 - . Waste code: D003
 - . Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

. Waste name: AZIRINO[2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE,
6-AMINO-8-[[[(AMINOCARBONYL)OXY]METHYL]-
1,1A,2,8,8A,8B-HEXAHYDRO-8A-METHOXY-5-METHYL-, [1AS-(1AALPHA,
8BETA,8AALPHA,8BALPHA)]-

. Waste code: U031
. Waste name: 1-BUTANOL (I)

. Waste code: U035
. Waste name: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]-

. Waste code: U044
. Waste name: CHLOROFORM

. Waste code: U058
. Waste name: CYCLOPHOSPHAMIDE

. Waste code: U080
. Waste name: METHANE, DICHLORO-

. Waste code: U122
. Waste name: FORMALDEHYDE

. Waste code: U123
. Waste name: FORMIC ACID (C,T)

. Waste code: U147
. Waste name: 2,5-FURANDIONE

DER Facility ID: 389909
DEC Memo: "5/20/10-Vought-Discussed site with DEC Kahn and closed spill #0911418 consolidated with this spill as they are at same address and are governed under NYCHA Consent Order. See spill #0911418 for further information and history. These notes from closed spill #0911418: Contractor replacing boiler. To do this they are excavating a deeper/larger basement area. Digging in soils to install lines and found low levels of contaminated soil. They're digging out soil now. Question is if they need to chase the bad soil to end points, or just end. Problem is only with SVOCs which they believe are historical. Consultant will send e-mail to Vought with additional information. 5/20/10-Vought-See also PBS #2-475610 and #2-475602. Received message from Doug Schrimpf (Eastern Enviromental Ph:631-727-2700 Fax:631-727-2777). Vought called and spoke to Schrimpf and installing boilers in building including cutting out foundation and installation of new boilers. During excavation, contamination was noted. 50 yards of soil removed down to footing of apartment building and contamination noted at bottom of footing. 300 tons of soil may be removed as part of bid by boiler removal. No delineation performed to date. No further soil can be excavated due to footings. Endpoint soil sidewall samples collected. Excavation was performed to groundwater but no bottom groundwater samples collected as delineation was proposed but not authorized. Sheen on groundwater noted. Not sure of source of contamination. Contact for NYCHA is: Maric Mechanical Michael MacMenamie 19-03 75th Street East Elmhurst, NY 11370 Ph: (718)721-5449 Fax: (718)721-8144 Address of NYCHA is: Mr. Ralph Trocchio New York City Housing Authority Technical Service Department 23-02 49th Avenue, 5th Floor Long Island City, NY 11101 Ralph.Trocchio@nycha.nyc.gov Vought drafted letter that was signed by DEC Kann with below requirements and three month deadline. DEC requirements from consolidated Spill #0911418: 1)submission of endpoint samples 2)delineation of contamination including determination of source 3)submission of site plan 4)cc to Eastern (Schrimpf) DEC requirements for this spill: 1)Submission of site plan with leaking USTs that failed TTF 2)TTF letter (isolate/retest system or investigation/excavation). 5/25/10-Vought-Received email from Eastern (Schrimpf) that Jeff -Thank You Very Much For Your Help, I emailed Maric Mechanical the NYSDEC Correspondence and spoke to them ,they still don't feel this is part of contract. They told me there contract was with the housing authority includes removal existing boiler and install a new boiler in basement, remove of oil tank and oil impacted soil which was done by Maric Mechanical . Eastern Environmental only got involved with this when they had stock piled soil that they had already excavated . Eastern excavated some

additional soils from excavation bottom and collect endpoint sample and disposed of soil that was previously excavated by Maric Mechanical. Based on the endpoint results and contamination still observed in excavation that could n't be removed due to structural issues ,Eastern provided a cost estimate for full of oil impacted soil and ground water investigation sent in March . I suggested to Maric Mechanical that we meet at site with House Authority Representative to review what the NYSDEC requirements are and to find out what the current contract that Maric Mechanical has with Housing Authority and if this Environmental work would be covered under the contract .Thanks For Your Help Jeff . Vought forwarded email to DEC Kann and replied to Schrimpf that he should keep DEC Kann posted as she is current project manager. 12/27/11: J.kann - Visited site on June 2, 2011. Report received on August 30,2011. Reviewed report and sent comments to NYCHA on 12/23/11. 4/12/12: J.Kann - visited site with G. Breen for a PBS inspection in february 2012. Revised SAR submitted on April 12. 5/29/12: priority of p3 assigned, no exceedences in SIR. 8/7/13: J.Kann - The site was visited on July 31, 2013. The boiler room inspected, not fuel oil staining on boiler room walls. Based on the review of all information submitted to the Department, historic and current, the spill has been closed. This is based on the following: -The September 1995 SBE ISRP indicated and area around B-3 which was impacted. This contamination was likely No. 6 fuel oil. A well was installed in this boring location. A total of four borings were advanced and two wells installed. Groundwater samples analyzed were not impacted (STARS SVOCs and VOCs). USTs at this site were subsequently closed in place (Plant A feeds the boiler at Plant C) - As a part of boiler upgrade work in 2010, soils in the area around B-3 were excavated to allow for the installation of new boilers in the basement of Plant D. - No endpoints were taken as a part of boiler replacement, however, Boring B-5 was advanced by ALC in the vicinity of B-3 in 2011. The B-5 boring log did not show any indications of oil impacts and the soil sample collected did not exceed CP-51 soil guidance values. -The ALC report included the advancement of 5 soil borings and the collection of one groundwater sample. All samples met CP-51 and TOGS 1.1.1 criteria. -Site currently operates on firm gas. -NFA "

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT 10/10/95: This is additional information about material spilled from the translation of the old spill file: TTF, 3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 9/17/2003-Vought-Spoke with Mr. Murray Dweck (2 Ethel Road, Suite 205A, Edison NJ 08818 fax 732-248-9115, phone 732-248-8200) (contact for owner of adjacent property to the north (5530 Broadway). Mr Dweck will be constructing a building on entire footprint. Delienation needed on 5530 Broadway due to TAGM exceedances in MW1 and MW2. Vought will send letter to Getty requiring delineation via temporary Geoprobe wells before building is constructed. 9/22/2003-Vought-File review by Vought: Letter from DEC to Murray Dweck-4/22/94-Letter from Eugene Sullivan(DEC) stating we feel that you are not responsible for this contamination . Environmental Site Investigation-Nov 1994-Tyree Organization-201-791-2186-Installation of six monitoring wells on-site and three monitoring wells installed on adjacent property of 5530 Broadway (spill #9311342). Toluene and MTBE exceedances found in UW1. Groundwater at depth of 11'and flows to the west. .02' of free product found in MW2. Soil analyticals show 2330ppb benzene(Mw1), 1360ppb benzene(MW2), 1640ppb benzene(MW3), 89ppb benzene(MW5) and 355ppbb benzene(MW6). Groundwater analyticals show 9430ppb benzene(MW1), 14000ppb benzene(MW2), 5270ppb benzene(MW3), 5550ppb benzene(MW5), 290ppb benzene(MW6), 1210ppb benzene(UW2-located on 5530 Broadway), 186ppb MTBE (UW1). Letter from Tyree to Getty-May 1995-SVE pilot testing began Feb 1995. An effective radius of .1 of water was acheived at well MW6 only. Recommendation is for another pilot test using a larger vacuum blower. SVE Pilot Test-June 1995-Tyree-SVE test yielded and effective ROI of 10'. A vaccum of .1 of water was acheived at 10'. Installation of eight additional wells will be installed to cover contaminated area. Remedial Action Plan-Oct 1995-Tyree-Proposal to install Dual Phase Extraction (DPE) system to acheive the required radius of 10' as determined by SVE influence test . DPE system will be manifolded to 15 on-site wells. Monitoring will include 1)pressure and temp gauges 2)vapor effluent using PID 3)samling liquid effluent 4)sampling SVE system effluent Status Reports-April 1996 thru Nov 1996-Tyree-Sampling of nine monitoring wells-Groundwater at depths of 6-9'. MW5 was paved over. Sept 1996 groundwater samples show 2150ppb benzene(MW1), 8850ppb benzene(MW2), 1650ppb bezene(MW3), 6900ppb benzene(MW6), 1210ppb benzene(UW2). Letter from DEC to Scott Hanley(Getty)-1/21/97-Letter from DEC(O'Dowd) to Hanley including unsigned STIP agreement. Quarterly Status Reports-March thru May 1997-Sampling of nine monitoring wells-Groundwater at depths of 6-9'. MW5 was paved over. Sept 1996 groundwater samples show 2600ppb benzene(MW1), 8970ppb benzene(MW2), 2820ppb bezene(MW3), 2970ppb benzene(MW6), 131ppb benzene(UW2), 83.9ppb benzene(UW1). DPE Pilot Test -July 1997-Tyree-MW2 was pilot test well. In May 1997 three micro wells were installed for using during DPE pilot test. Included in pilot test were groundwater elevation monitoring, groundwater recovery rate, induced vacuum readings, VOC vapor monitoring and sampling, effluent sampling. Pilot test indicated that a 20 foot vapor ROI can be acheived . Test found that a DPE feasible due to 20' vapor and gw ROI. Quarterly Status Reports-June 1997 thru Nov 1997-Tyree-Sampling of thirteen monitoring wells-Groundwater at depths of 6-9'. MW5 was uncovered. Sept 1996 groundwater samples show 1810ppb benzene(MW1), 6560ppb benzene(MW2), 1460ppb bezene(MW3), 461ppb benzene(MW5), 4780ppb benzene(MW6), 2230ppb benzene(UW2), 17.9ppb benzene(UW1),

S100782246

4420ppb benzene(MW7), 6720ppb benzene(MW8), 701ppb benzene(MW10). Quarterly Status Reports-Dec 1997 thru Aug 1998-Tyree-Sampling of ten on-site monitoring wells. Groundwater at depths of 11-14'. July 1998 groundwater samples show 3460ppb benzene(MW1), 8220ppb benzene(MW2), 1160ppb benzene(MW3), 963ppb benzene(MW5), 10600ppb benzene(MW6), 7340ppb benzene(MW7), 11600ppb benzene(MW8), 10400ppb benzene(MW9), 1280ppb benzene(MW10). Quarterly Status Reports-Sept 1998 thru Nov 1998-Tyree-DPHVE (Dual Phase High Vacuum Extraction System) started on Aug 28, 1998. Effluent air samples were collected for analysis and influent and effluent water samples were also collected for analysis. Groundwater flow to the south/southeast. Quarterly Status Reports-Dec 1998 thru July 24, 2003. System not operational from April 2001 thru June 2001 due to electrical problems. System not operational from May 2001 thru Aug 2002 due to replacement of transfer pump. System not operational during March 2003. Groundwater flow to the southeast. Monthly system checks and quarterly sampling of air discharge and water influent and effluent. Nine monitoring wells on-site. Groundwater at depth of 10-14'. 9/23/2003-Vought-After file review NYSDEC requires: 1)sampling/current status of wells at 5530 Broadway 2)submission of remediation system plan including stack height and air flow(cfm) 3)Installation of two borings across West 230th Street and one boring west of MW1 4)sampling of system influent and effluent due to Not Accessible listing in data 5)Monthly sampling of influent and effluent versus current quarterly sampling. Vought sent letter with above requirements and a Stipulation Agreement on 9/24/03. Vought called David Pachan (Tyree-518-786-3200) and summarized the above. 9/25/2003-Vought-Spoke with Pachan and three adjacent wells were unable to be located due to debris as of 9/24/03. Debris is so thick that unable to get drill rig in. Vought called adjacent property owner (Murray Dweck-732-248-8200) and advised him to remove debris to obtain water sample and return call to DEC to obtain number of Pachan. 9/26/03-Email from Tyree(Pachan) to Dec(Vought)-9/26/03. Just confirmed today with the property owner and my tech that the off site wells are no longer there . We will have to get a Geoprobe rig in there for the groundwater samples and according to the property owner access shouldn't be a problem there is a 20 foot access gate and he is being very cooperative . 11/11/03-Received Investigation Plan (Tyree) as per STIP. Proposal for installation of six soil borings to soil and groundwater. Boring locations include two borings on the west side of West 230th Street, one boring west of MW1 and three borings on the adjacent property to the north (5530 Broadway). 12/1/03-Letter from DEC(Vought) to Tyree. This Department hereby approves Tyree Org for the installation of soil borings in sidewalks along Broadway and West 230th Street . Quarterly Monitoring Report (Tyree)-Oct 2003 thru Dec 2003. Nine wells on-site, no free product, groundwater flow to the southeast. Remedial activities include Dual Phase High Vacuum Extraction System with monthly system checks, quarterly sampling of air discharge and water influent/effluent. Groundwater analyticals show 51ppb benzene(MW1), 1350ppb benzene(MW2), 32.5ppb MTBE(MW3), 19.1ppb MTBE(MW5), 91ppb benzene(MW6), 244ppb benzene(MW7), 28.4ppb benzene(MW8), 8790ppb benzene(MW9) and 7.99ppb benzene(MW10). Water influent shows 175ppb benzene. 1/16/04-Email sent from Vought to Tyree requesting status of STIPs sent out on 9/24/03. Subsurface Investigation Report(Tyree-David Pachan)-1/19/04. Vacant property to the north, commercial properties to the south and west, commercial parking lot to the east. Six Geoprobe borings performed on 12/12/03. Report recommends

S100782246

Continue with quarterly groundwater monitoring and operation of the DPHVES. Results from this investigation show that the contaminant does not appear to be migrating off-site. There may be an off-site source for the contamination that was found upgradient of the site in B2 and B3 . Soil analyticals show no TAGM 4046 exceedance in boring samples. Groundwater analyticals show: 366ppb benzene(B2), 1370ppb naphthalene(B2), 328ppb benzene(B3) and 871ppb naphthalene(B3). Boring logs show strong odors in soil at depth of 8 below grade .

2/2/04-Vought-Received copy of signed STIPULATION Agreement. Stipulation implemented on 2/3/04 by DEC Kunkel. 2/20/04-Vought-After file review DEC requires: 1)monthly influent/effluent sampling 2)stack height and air flow (cfm) of system 3)placement of remediation system on site plan 4)upgradient sources to contamination found in B2 and B3. Vought sent email to David Pachan (Tyree) with requirements to be included in RAP. 8/5/04-Vought-New file review by Vought: Email from Tyree (Pachan)-9/26/03. Just confirmed today with the property owner and my Tech that the off site wells are no longer there. Parking lot was torn up and replaced with undeveloped land. We will have to get a Geoprobe rig in there for groundwater samples . Vought approved of borings. Email from Tyree (Pachan)-10/2/03. Email with stack statistics for comparison to SVE Benzene Emission Limits. 8/6/04-Vought-Sent email to Pachan and Lindell requiring: 1)water flow rate through air stripper 2)surrounding property map 3)formal copy of the RAP 4)possible expansion of the system to include 5530 Broadway 5)monthly influent and effluent sampling.

10/8/04-Vought-New file review by Vought: Email from Tyree (Pachan) to DEC Vought-8/9/04. The design flow rate through the stripper is 5 gallons per minute . I am also going to lower all the stingers in the wells that are connected to the system so that we can pull more water . The surrounding property map is attached below . The RAP is being overnighted to you . The DPE pilot test does show that the ROI's do cover the locations of B2 and B3 . Since the system has not been pulling water we have been unable to sample the influent and effluent streams monthly. I intend to modify the system. Vapor Extraction Influence Pilot Test-6/30/95. The greatest effective ROI obtained on this site was 10 feet . Remedial Action Plan-10/11/95. Proposal for Dual Phase Extraction. Dual Phase Extraction Pilot Test Report (Tyree)-7/2/97. This plot indicates that a 20 foot vapor ROI can be achieved . 08/31/2005 - Feng - Project transferred from Vought to Feng. 09/09/2005 - Feng - This Getty spill site is the source of contamination for the adjacent site on 5530 Broadway, Bronx, NY. For the concern of sensible receptors that arisen due to the future construction of a synagogue on the 5530 Broadway, a letter sent to Kevin Shea (Getty), Paul Hatcher (Tyree) and Paul Lindell (Delta) to requires additional investigation/remediation as listed below: 1. Delineation of Soil and Groundwater Contamination of Adjacent Site at 5530 Broadway (by November 11, 2005) 2. A revised Remedial Action Plan to include 5530 Broadway (by December 23, 2005) 10/18/2005 - Feng - Spill 04-12485 has been consolidated into this spill 11/8/2005 - Feng - Due day for soil/groundwater will be extended to the mid December because Tyree has to get the signed access agreement from the developer of 5510 Broadway. 12/22/2005 - Feng - 12/21/2005 Email from Scott Cunningham (Tyree) saying that the Subsurface Investigation Report for the adjacent property is in the way, will be here by next week. 2/2/2006 - Feng - Email Scott Cunningham asked about the status of the site investigation report. (RJF) 4/25/2006 - Feng - Reviewed the SIR dated 1/20/2006 submitted by Tyree. Tyree

S100782246

performed the offsite investigation at the sidewalk adjacent to West 230th Street (W-11 and W-12), sidewalk adjacent to Broadway Street (W-13) and the adjacent property 5530 Broadway (W-14, W-15 and W-16). W-12, high VOCs in groundwater. W-16, high SVOCs in soil and FP (sheen) detected in groundwater. Tyree recommended to: 1) tie W-16 into the DPVES and used as one of the vapor recovery wells. 2) reduce the vacuum in W-1, W-3, W-5 and W-10 to allow greater vacuum at extraction wells W-2, W-6, W-7, W-8 and W-16. 3) W-2 will have increased vacuum to provide influence at W-14, W-12 will be influence by the increase in vacuum at W-6 and W-8. 4) continue with quarterly monitoring and sampling of the monitoring wells will provide sufficient data collection to verify the groundwater conditions and the effectiveness of the existing DPVES on the 5510 Broadway property. Emailed Scott Cunningham I read the SIR, dated 1/20/2006. So there is contamination found in the sidewalk adjacent to West 230th St. (W-12) and 5530 Broadway (W-16) and remediation will be needed. So have you done what you recommended yet? And have you informed the owner of the property of 5530, Elite Murray about the investigation result and future remediation? Is he going to construct some building structure on top of 5530 this year? so let him know what you guys doing on his property and make sure there is no misunderstanding. 4/25/2006 - Feng - Email from Scott Cunningham: The person I have been in contact with regarding 5530 Broadway is Eli Dweck from Kimberly Associates. He has told me that there will be a building on the property in the future, but not right away. He is leasing the property to Prude Construction so they can store equipment and materials there for work they are doing down the street. As far as the system recommendations, the vacuum adjustments have not been made due to the systems main vacuum blower is in the shop for repair. So right now the system is not operational. The repair to the blower should be completed hopefully this week, and we will get the system running, make the adjustments mentioned in the SIR, and see how those adjustments effect the levels on and off the site. I will notify you as soon as the system is operational. Thanks 11/15/2006 - Feng - Quarterly Monitoring Report, 8/2006 - 10/2006, 10/2006, by Tyree. Groundwater sampled and gauged 9/26/2006. 15 monitoring wells. DTW 10.64' to 15.41' bg. Flow direction southeast. No LNAPL. BTEX range ND to 6,007.3 ppb. MTBE range ND to 1,130 ppb. All ND for MW-14, MW-15 and MW-16 which locate in the adjacent property. DPES effluent was not sampled this month. (RJF) 2/7/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 12/2006, by Tyree. Groundwater sampled 12/11/2006. 15 monitoring wells. DTW 11.13' to 15.22' bg. Flows southeast. No LNAPL. MW-1, 1.07 ppb BTEX, 3.27 ppb MTBE. MW-2, 7,114 ppb BTEX, 58.9 ppb MTBE. MW-3, 1.04 ppb BTEX, 5.54 ppb MTBE. MW-5, dry. MW-6, 43.2 ppb BTEX, 20.1 ppb MTBE. MW-7, 410.6 ppb BTEX, 19.9 ppb MTBE. MW-8, BDL. MW-9, 6,672 ppb BTEX, 1,410 ppb MTBE. MW-10, Not accessible. MW-11, BDL. MW-12, 21.19 ppb BTEX, 1 ppb MTBE. MW-13, 3.62 ppb BTEX, 2.14 ppb MTBE. MW-14, MW-15, and MW-16, not accessible. Noted that DPVES operational as of 7/12/2006, Liquid phase not operational as of 12/2006, and new belts for the system will be installed prior to next quarter sampling event. (RJF) 6/19/2007 - Feng - Quarterly Monitoring Report, 12/2006 - 3/2007, 3/2007. Groundwater sampled 3/13/2007. 15 monitoring wells were sampled. DTW 11.16' to 14.53' bg. Flows to southeast. No LNAPL. MW-2, 4,061 ppb BTEX, 28 ppb MTBE. MW-7, 341 ppb BTEX, 18 ppb MTBE. MW-9, 6,885 ppb BTEX, 938 ppb MTBE. Other wells were low. MW-14, MW-15 and MW-16 were not accessible. DPES running. The system is

currently off due to electrical difficulties. Tyree contacted Con Ed about the situation. (RJF) 9/27/2007 - Feng - Quarterly Monitoring Report, 4/2007 - 6/2007, 7/2007. Groundwater sampled 6/15/2007. 15 monitoring wells were sampled. DTW 9.95' to 15.56' bg. Flows to southeast. LNAPL in MW-16 (0.01'). MW-1, 1.1 ppb BTEX, MTBE BDL. MW-2, 4,534 ppb BTEX, MTBE BDL. MW-3, BTEX BDL, 2.8 ppb MTBE. MW-5, BDL. MW-6, 28.7 ppb BTEX, 12.5 ppb MTBE. MW-7, 345.2 ppb BTEX, 20.4 ppb MTBE. MW-8, BDL. MW-9, 6,217.9 ppb BTEX, 1,350 ppb MTBE. MW-10, BDL. MW-11, BDL. MW-12, BDL. MW-13, 1.5 ppb BTEX, MTBE BDL. MW-14, BDL. MW-15, BDL. MW-16, BDL. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. There is been electrical problem and the system is not operational. DEC required to have EVR events on MW-16 for MW-16 has shown some sheen in the last few quarters as Tyree mentioned. (RJF) 1/28/2008 - Feng - Quarterly Monitoring Report, 7/2007 - 10/2007, 11/2007. Active gasoline retail/service station. Groundwater gauged and sampled 10/1/2007. 15 monitoring wells. DTW 12' to 16.56' bg. Flows to southeast. NO LNAPL. BTEX range ND to 7,903.4 ppb (W-9). MTBE range ND to 1,380 ppb (W-9). Email to D. Madigan (Tyree) for status of the EVFR events and the restart of the DPES. (RJF) 3/19/2008 - Feng - eDoc Quarterly Monitoring Report 4Q2007. (RJF) 3/24/2008 - Feng - Quarterly Monitoring Report, 11/2007 - 2/2008, 2/2008. Active gasoline retail service station. Groundwater was gauged and sampled 12/26/2007. 15 monitoring wells. DTW 11.29' to 15.48' bg. Flows to southeast. No LNAPL. BTEX range ND to 7,697 ppb (W-9). MTBE range ND to 1,210 ppb (W-9). (RJF) 8/27/2008 - Quarterly Monitoring Report, 3/2008 - 5/2008, 6/2008. Active gasoline retail service station. Spill cause, tank test failure 12/14/1993. Spill source, former USTs onsite. Groundwater was gauged and sampled 5/2/2008. 15 monitoring wells. DTW 10.26' to 16.88' bg. flows to southeast. BTEX range ND to 6,264 ppb (MW-9). MTBE range ND to 415 ppb (MW-9). (RJF) 9/4/2008 - Getty Properties portfolio meeting with Tyree and Delta. Will check the Sandborn map for history research of the vacant property. W-2, w-9 to be operational, RAP by 10/2008. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Tyree is having problem getting the electrical power. Tyree will send Con Edison contact information for DEC's assistance. SanBorn maps in the submitted quarterly report. (RJF) 4/30/2009 - Quarterly Monitoring Report, 8/2008 - 10/2008, 12/2008, by Tyree. Active gasoline retail/service station. Groundwater was gauged and sampled 10/31/2008. 15 monitoring wells. DTW 11.11' to 16.40' bg. Flows to southeast. NO LNAPL. BTEX range nD to 6,840 ppb (W-9). MTBE range ND to 1,060 ppb (W-9). 10/23/2008, EVR was conducted on MW-16 and removed 270 gallons of water/gasoline mixture, waste manifest is included. Dual Phase High Vacuum Extraction System is monthly checked, quarterly sampled of the air discharge and water influent and effluent. The system is off due to the electrical difficulties. SanBorn maps are attached. email Jen Kotch (Tyree) for review summary of the SanBorn maps because the maps are hard to read (small and blur letters). (RJF) 7/24/2009 - Jim Lantowski from Tyree called. They are removing the tanks and asked if they need to remove the encased concrete or could drilling through the concrete to take endpoint samples. Told him to remove the concrete bottom and then take the samples because the concrete might impede from future drilling at this area. (RJF) 7/24/2009 - email from Jim Smith. They reported a spill based on petroleum impacted soil newly discover below the formerly encased tanks bottom slab. Spill 09-04799 was assigned for the new spill. They asked for game strategy for removal of impacted

soils . (RJF) 7/27/2009 - email replied to Jim Smith (Tyree). I couldn't come out today. Please remove as much impacted soil as possible based on safety and practical extent, then take post excavation samples. If there is no new tanks to be in this area, then the next step I would require a couple of monitoring wells to be installed over here for groundwater data. The site will be then re-evaluate based on the new data, further investigation and remediation may be required. (RJF) 7/28/2009 - Jim Smith called. They think that the impacted soil is not from Marketing, but rather from the old spill. They propose to put a poly sheeting and backfill. Called Jim Smith back and left voice message, follow by email. DEC will call Getty Properties to see if they want to take the opportunity to remove the soil, leave the excavation open for now. And endpoint samples shall be taken and submit the tank closure report. Tibbe called Paul Lindell. Paul Lindell said they will work something out with Getty Marketing. (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active gasoline retail service station. 15 monitoring wells. Groundwater was gauged 4/23/2009, 5/26/2009, 6/11/2009, 6/26/2009 and 7/14/2009. NO LNAPL. DTW 9.8' to 14.43' bg. Flows to southeast. Groundwater was sampled 7/16/2009. BTEX range ND to 3,400 ppb (MW-9). MTBE range ND to 531 ppb (MW-9). Remedial strategy will be determined by divestment activities. (RJF) 11/12/2009 - Tank Closure Report, dated 10/8/2009, pdf, by Tyree. On July 21 to 29, 2009, Tyree was contracted by Getty Petroleum Marketing to remove 3 (4,000-gallon) single wall steel USTs (2 gasoline and 1 diesel) encased in concrete and 5 dispensers at this site. The tank veseels appeared to be in good shape with no evidence of holes, scaling or pitting. 1 (550-gallon) ghost UST was observed upon removing the concrete slab from underneath the encased USTs, as well as petroleum stained soil. No soil, neither the ghost tank was removed. A new spill number 09-04799 was assigned to the site. The 3 USTs were cleaned and transported to Gershow Recycling in Medford, NY. 11 post excavation soil samples were collected from the tankfield and 4 were collected from the dispenser and run for 8260 and 8270. North Tank Bottom, 1,530 ug/Kg benzene, 50,900 naphthalene, 818,000 xylene, 126,000 ethylbenzene, 115,000 toluene. North Dispenser, 590 benzene, 27,470 xylenes, 3,970 ethylbenzene, 14,600 toluene. (RJF) 7/6/2010 - Subsurface Investigation Report, dated 4/29/2010, by Tyree. On October 21, 2009, Tyree oversaw Associated Environmental Service during the advancement of 9 soil borings SB-1 to SB-9 using Geoprobe 6620DT drill rig and direct push method. Soil borings were drilled from 7-20 feet bg. 18 soil samples were collected. SB-1 (5-10'), BDL. SB-1 (15-20'), BDL. SB-2 (0-5'), 1,830 xylenes, 2,042 BTEX. SB-2 (5-7), 1,570 xylenes, 1,679 BTEX. SB-3 (5-10'), BDL. SB-3 (10-15'), 1,620 xylenes, 8,400 xylenes, 10,839 BTEX, 4,010 1,2,4-trimethylbenzene. SB-4 (5-10'), 1,190 benzene, 16,500 toluene, 25,100 ethylbenzene, 129,000 xylenes, 171,790 BTEX, 11,000 n-propylbenzene, 98,000 1,2,4-trimethylbenzene, 29,800 1,3,5-trimethylbenzene, 21,000 naphthalene. SB-4 (15-20'), 1,180 benzene, 20,400 toluene, 10,400 ethylbenzene, 51,600 xylenes, 83,580 BTEX, 4,540 n-propylbenzene, 33,100 1,2,4-trimethylbenzene. SB-5 (5-10'), 165 benzene, 4,500 toluene, 10,300 ethylbenzene, 115,000 xylenes, 129,965 BTEX, 8,560 n-propylbenzene, 86,100 1,2,4-trimethylbenzene, 23,200 1,3,5-trimethylbenzene, 15,200 naphthalene. SB-5 (15-20'), BDL. SB-6 (10-15'), 228 benzene, 1,400 xylenes, 2,665 BTEX, 5,860 n-propylbenzene. SB-6 (15-20'), BDL. SB-7 (10-15'), 2,760 ethylbenzene, 11,400 xylenes, 14,284 BTEX, 11,100

1,2,4-trimethylbenzene. SB-7 (15-20'), low/BDL. SB-8 (10-15'), 290 benzene, 1,340 xylenes, 2,100 BTEX, 4,100 1,2,4-trimethylbenzene. SB-8 (15-20'), 60 benzene. SB-9 (10-15'), 14,300 1,2,4-trimethylbenzene, 13,900 1,3,5-trimethylbenzene. SB-9 (15-20'), low/BDL. Tyree claimed that the elevated VOCs impacts in soil were identified in soil borings advanced in the vicinity of Getty Marketing's tank field and the former dispenser and downgradient of Getty Marketing former remote fills. The October 2009 investigation suggests that the soils have been adversely impacted by Marketing's operation which only recently ceased in 7/2009. The groundwater data collected from the existing monitoring well network supports this conclusion as the majority of the impacts in groundwater are identified in monitoring wells adjacent to and downgradient of Marketing's former tank system while groundwater impacts near Properties's former 550-gallon tank field are minimal . Tyree requests to close spill 93-11138 and that Marketing address the remaining subsurface impacts under spill 0--04799 which as assigned to Marketing during their 7/2009 tank removal activities. 7/7/2010 - email to Tyree with comments on the SIR. 1) if the ghost tank hasn't been removed, then remove it; 2) register the ghost tank; 3) register the 550's tanks that were removed; 4) initiate legal case if no one do what DEC requires.

***** 12/1/2010 Getty contacted Steve Sangesland about open spill #0904799. They wanted to use the Oct 2009 Tank Closure report to close out this case, but Sangesland found problems with this report and forwarded these comments back to Tyree.... See Sangesland's comments: I have 4 primary problems with this closure report: 1) 5510 Broadway, Bronx is located about 1 block away from former waterfront (W 230th St used to be On the river before the Marble Hill section of Manhattan was cut off, and the river diverted below W 225th St.) The gist of this comment is a concern that the site may have shallow groundwater and it appears that no groundwater samples were taken when these tanks were pulled. Please determine the depth between the tank grave bottom and groundwater in the area.... Based on the geology I would guess that it's very close. 2) Page 5 of the report talks about petroleum stained soil found below the concrete slab, probably from the prior 550 gal tanks that once were in the area. Then page 6 specifically says No Petroleum Contaminated soil was dug out from the excavation why? Is that why several of the end point samples exceeded TAGM? Was the contaminated soil mixed with the good soil and then redistributed so it wouldn't look so bad? 3) What happened with the Phantom Tank ? Did excavation show there really was not an old tank there? Was the tank confirmed to be there and then left? 4) Tables 1 & 2 (Pages 11 & 12 of report) are not legible, even when it was enlarged. Could someone reprint/resend this table? Because this is not a clean and easy closure, I'm going to forward this case on to June Feng and have it co-listed under the other spill number on this site, Spill #9311138 *****
02/07/2011 - Talked to Chris Copely (cell - 203-414-5980). He is the env. rep. for the property owner (Moeller). He want sto be kept in the loop about any actions taken at this site. He claims they have two active potential buyers for the site. MCT 12/8/2011 - Reviewed 3Q2011, 10/2011, by Tyree. Sampled on 8/26/2011. Max BTEX 7,569 ug/L (MW-9). Tyree requests the abandonment of wells MW-5, 6, 7, 11, 12, and 13. MW-9 was re-installed which was destroyed during the tank removal activities. 2/1/2012 Getty portfolio transferred to KGH."

DEC Memo: "need to trace property manager and send TTF letter 8/24/06 ttf letter sent today. bf 4/20/11 sent 2nd ttf letter. bf 2/8/12 PBS settlement conference scheduled for today. Plan is to hand deliver and explain what needs to be done to close the case. Case may be referred to General Counsel. I was informaed by General Counsel that I need to open a separate case for the spill. This is the second PBS case with this facilitiy and the spill was not addressed in the earlier case. That being said, I am going to send one more letter giving a final ultimatum to the respondent to resolve the case immediately or the case will be referred to General Counsel. bf 3/1/12 On 2/17/12, sent ttf letter to: Eugene Holland WK Nursing Home 100 West Kingsbridge Road Bronx, NY 10468 Letter allows ten days to resolve the issue. Entry to database was not made untuil today when I realized that I already sent the letter. bf 07/16/13 - Spill Case is transferred from Brian Falvey (PBS Unit) to V. Brevdo (Section B) as per DER Region 2 decision - Tank Test Failure Spill Case. VB 3/18/14-DEC Piper received and reviewed sub surface investigation report for spill 1309050 at same location. See report in spill 1309050. Passing tightness test could not be perfromed from 06 so a subsurface investigation was required . No contamination found. Fill line was replaced in 2006 and passed tightness in 2012. . Based on findings, this spill is closed , no further action is warranted. See edoc if warranted for spill 1309050 "
Remarks: "PBS No: 2-602769 REMOTE FILL LINE."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was MULQUEEN 06/16/06: This spill is transferred from Mike Mulqueen to Mr. Koon Tang. 06/21/2012 Spoke with Heather Sonnenberg of J.R. Holzmacher P.E., LLC, Consulting Engineers Tel: 631-234-2220. Ms. Sonnenberg is a consultant for Jewish Home for VCP project, however, she stated she does not deal with spills and gave me number for Ms. Rosa Cardona of Jewish Home (718-933-1501), stating Ms. Cardona would be the right person to speak to or she would refer me to right persons. Brevdo 06/22/2012 - Brevdo Brevdo's December 2, 1998 letter commenting on the RAWP for VCP site located at 2614 University Avenue seems to have been placed into e-docs for this site erroneously. 100 West Kingsbride Rd. and 2614 University Avenue are two different buildings at two intersecting streets. Brevdo. 06/22/2012 - Brevdo. Left message on Ms. Roda Cordona's (Jewish Home) voice mail ((718-933-1501) explaining that DEC has an open spill case at 100 West Kingsbridge Road and I want to discuss this with her. Left my number on Ms. Cardona's voice mail. Brevdo 06/22/2012 - Brevdo. Called and spoke with Neil Tomasetti of Al Eastman (718)-378-300 a company which removed the tank in 1997 and representative of which on site noticed contaminated soil around the removed UST, and reported spill to DEC. Mr. Tomasetti stated that his company does not have any

SALSMAN BUILDING (Continued)

U003644532

records regarding this UST removal case or spill case because 1997 is too old and they can not keep files that old. Mr. Tomasetti confirmed that Al Eastman, when removing UST and having encountered contaminated soil associated with removed UST, always and definitely remove such contaminated soil. Mr. Tomasetti expressed confidence that contaminated soil was removed in this case just like it would be removed at any UST removal where contaminated soil was encountered, that removed soil was tested and disposed off appropriately according to NYS regulations. Given that this is very old spill and no information or sampling data is available, and taking Mr. Tomasetti's explanation into account, it is appropriate to close this spill case.

Remarks:

Brevdo 06/26/2012 - Spill is closed effective 06/26/2012. Brevdo "TANK REMOVER STATES WHILE REMOVING TANK CONTAMINATED SOIL WAS DISCOVERED. CONTACT BY CELL PHONE 917-771-6872"

DEC Memo: "03/11/11-Hiralkumar Patel. 2:19 PM:- spoke with Christie at ATS. she mentioned that property manager is looking for contractor to fix tank system and then ATS will go back for retesting. 2:22 PM:- left message for Evan Robert, property manager. alternate address: none no other spills. no PBS record. A & R Unity Mgt. LLC. **property owner** 36 East 37th Street New York, NY 10018 Attn.: Evan Robert **property owner** Ph. (212) 695-3510 Fax (212) 643-2061 email: evanrobertap@aol.com 03/14/11-Hiralkumar Patel. 12:59 PM:- left message for Evan Robert. 1:07 PM:- received call from Mr. Robert. asked him to conduct an isolation test or pump out tank by end of tomorrow to avoid any further release. 1:50 PM:- spoke with John at ATS. he mentioned that site has 1,000 gal tank. 2:04 PM:- sent TTF letter to Mr. Robert requiring isolation test. letter emailed to Mr. Robert. asked Mr. Robert to submit isolation test result by 9 AM on 03/16/11. 03/16/11-Hiralkumar Patel. 11:23 AM:- received call from Mr. Robert. he is still waiting for cost proposal for isolation test. during conversation, he mentioned that tank is aboveground. informed him that if tank is completely visible (including bottom) and there is no leak from tank bottom and lines to/from boiler are running aboveground with no leak, then no need for isolation test. but there should be no more oil deliveries until the tank system is fixed and tested tight again. informed him that if there is leak found in fill line and if portion of fill line is underground, then further investigation is needed. Mr. Robert will call back after talking to his super to confirm that tank is completely aboveground and not wrap with concrete. 03/17/11-Hiralkumar Patel. 10:28 AM:- received call from Daniel from DD Contracting, company hired to do tank repairs. Daniel is on site right now. he mentioned that site has 1,000 gal

IN THE BASEMENT (Continued)

S110769618

tank completely wrapped in concrete. he was told to fix the epoxy patch on top of tank. as per Daniel, during tank cleaning, contractor broke part of concrete wrap on top and cut hole in tank. after cleaning, tank cut was patched (approx. 15 inches by 13 inches). Daniel was told that during pressure test, air was coming out of this patch on top. Daniel observed five weep holes on concrete wrap and no sign of oil release from these weep holes. he did not see any sign of any oil release from the patch also. fill line runs aboveground and fill port is located on the building foundation wall. no sign of oil release found on foundation wall where fill line enters into building. supply/return lines runs aboveground, wrapped in concrete, along the basement floor. Daniel DD Contracting Ph. (646) 321-2646 03/21/11-Hiralkumar Patel. letter sent to Mr. Robert came back undelivered. 4:15 PM:- spoke with Daniel. he has finished repair and waiting for re-testing. he will call once retesting is scheduled. 03/24/11-Hiralkumar Patel. 3:41 PM:- sent email to Mr. Robert requiring to submit result of retesting of tank system. 03/29/11-Hiralkumar Patel. 11:54 AM:- spoke with operator at Mr. Robert's office. she mentioned that ATS went for retesting but required more repair. technician is on-site today for repair. she will ask technician to call. 12:25 PM:- received message from Daniel. 2:42 PM:- left message for Daniel. 4:18 PM:- received call from Daniel. he mentioned that tank system failed again after some repair. 4:22 PM:- spoke with Mr. Robert and Daniel. asked Mr. Robert to either prove that tank/supply/return lines are not leaking (by having isolation test of these parts) or pump out tank until the system is tested tight. also asked Mr. Robert to seal the fill port to prevent any more oil deliveries. told Mr. Robert that if required document is not submitted by end of tomorrow, case will be referred to legal. 03/30/11-Hiralkumar Patel. 10:30 AM:- visited site. met Daniel. site occupies by a five story building with a basement. a 1,000 gal AST is completely wrapped in concrete. tank is about 4.5 ft away from the boiler. all the lines running aboveground except about 4 ft of supply/return lines covered with concrete on top of boiler room floor (area between the tank and boiler). fill and vent line cross the foundation wall and then fill line runs aboveground to building line (about 4 ft from foundation wall). found old supply (or return) line connected to the tank. found open end of old fill line in building foundation wall where the current fill line enters into the building. five weep holes at the bottom of concrete wrap. no oil found seeping out of these weep holes. gauge was not working. Daniel mentioned that after they repair the patch on tank top, tank system failed again. so now they have to remove the old patch and fix it. super mentioned that about 600 gal oil delivered yesterday. 1:45 PM:- left message for Mr. Robert. 04/15/11-Hiralkumar Patel. 3:26 PM:- left message for Daniel inquiring updates. 05/26/11-Hiralkumar Patel. 1:30 PM:- left message for Mr. Robert. 1:36 PM:- received message from Shin, from Mr. Robert's office. 06/06/11-Hiralkumar Patel. 4:33 PM:- spoke with Mr. Robert and he mentioned that all work has been completed. spoke with Shin, Mr. Robert's assistance. she mentioned that tank passed the test. asked her to submit a statement (or invoice) from contractor including reason for tank test failure, repair done, any contamination during repair or not and passing tank test result. asked her to submit documents by end of 06/08/11. 4:40 PM:- sent email to Mr. Robert and asked him to submit spill closure report by the end of 06/08/11. 06/07/11-Hiralkumar Patel. 2:12 PM:- received email from Mr. Robert including copy of invoice. as per invoice from

 DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 11/14/03 tipple left 2 messages foe Joshilyn Perry. suggested that she call their insurance co to see if they would assist in the cleanup// Petro changed leaking line and what now remains is contaminated soil. Sangesland sent a contaminated soil letter to Joshlyn Perry 05/24/06: This spill is transferred from Mr. Koon Tang to Q.Abidi. 11/01/06: Called Ms. Joshlyn Perry (718)933-1582 nobody answering the phone. 02/08/07: Called Mr. Rodger Reirsen, Consultant (Geotrans Company) at (908)534-2303 to discuss regarding this spill. He said This spill occurred due to tank failure, Sheltering Arms hired his company. But Geotrans hired North East Environmental Company, New York to pull the tank. When tank was pulled by North East Environmental Company. Geotrans checked and did not found any product to excavate. Mr. Rodger Riersen will fax me all the documents including soil sample report to close the spill. -QA 02/16/07: Called Mr. Rodger Riersen (Geotrans) at (908)534-2303 he was not in the office. Left message to call me back regarding spill. Discussed with Mr. Rodger Riersen regarding spill to make borings around the tank, to evaluate contamination of soil. -QA 03/01/07: Talked to Mr. Roger Riersen (impact Environmental) to find out the contact number of

Petro Co. to clear this point where they have changed the line and where they have found the soil contamination. Also asked that to send diagram showing fill port to tank and tank to boiler. These thing should be cleared, Impact Environmental has to do borings around that to confirm the soil contamination. -QA 03/01/07: Called Mr. Roger Riersen to dicuss regarding soil contamination and to find out the contact number of Petro Co. Where they change the line and where they found the soil contamination. Mr. Roger will be available on monday March 5, 2007. I left message to call me back to discuss regarding this spill. -QA 03/14/07: Received a package from Mr. Roger Riersen, staff Geologist (GeoTrans, Inc.)on March 14. Reviewed the report based on his discussion with Mr.Reiner Ober, it is likely that historical references to contaminated soil were due to assumptions that were never confirmed by direct observation or laboratory analysis. Petro was never contracted to remove the pipeline and therefore no confirmation of the contaminated soil was ever conducted prior to tank removal activities. Furthermore, no contaminated soil was observed during the removal of the UST and associated pipes on January 10, 2007. GeoTrans inspected the area on March 6, 2007, demonstrates that the former leaking pipe ran through the basement stairwell and no petroleum or soil is present on the exterior wall or foundation where the former leaking pipe was located. On the basis of information provided by GeoTrans and by the approval of Mr. Jon Kolleeny (Supervisor) this spill is closed. -QA"

DISCOVERED. PROPERTY OWNER ADVISED. NO CALL BACK REQUESTED. Spill transferred to Greco June, 2005, as part of Spills Closure Initiative. Contacted Eastmond Boiler (company removing the tank) and was told to contact Mr. Renee Lewis or Issac Mungra at 718-378-7000. I left a message for Mr. Lewis to call me back. JDG 7/9/05 Called Mr. Lewis and left a message for him to call me back. 7/14/05 Called Mr. Lewis and he said he has pulled the files and will be getting back to me shortly. JDG 7/27/05 Called Mr. Lewis on 10/26/05. Mr. Lewis will call back. 1/04/06 Changed address to 2545 University (the proper address for the Jewish Home and Hospital). 1/04/06 It is apparent that Mr. Lewis is not going to produce any further information on this spill. Several other spills have been noted at 2545 University, as well as at 100 West Kingbridge (an alternate address for the same facility). As this spill may be the same release as other spills (open or closed) for the hospital, Regional staff should determine if the location has already been addressed. 4/26/07 Spill has been reassigned to Falvey. Received message from Jim DeMartinis of J.R. Holzmacher. (631)234-2220. He will call me back regarding the next action to be taken. He is researching past documentation and exploring the possibility of obtaining proper documentation from Eastmond. Other route is to test area of tank for contamination. bf 5/18/07 Spoke with Jim Demartinis of J.R. Holzmacher. He sent me a fax of a sketch of the boring locations. I told him 2 more borings were needed. He agreed and said that he will send me an email with an updated sketch. he will also tell me when they are going to take the samples. bf 6/18/07 Received email on 6/14/07 containing cover letter and sampling results. results are below soil cleanup objectives to protect gw quality. NFA. bf"

DEC Memo: "7/25/2006 Sangesland spoke to Eddy Feliciano of Stuyvesant Oil. He said the house has two-275 gal tanks tied together in the basement. One of these tanks appears to have been dented and the tank is leaking from this point. Approx. 4 gallons of #2 oil formed a puddle on the cement floor. Stuyvesant laid down absorbant pads and booms to keep the spill contained. USA Tanks (718-981-5710) was hired to pump the tank out later today. 7/27/2006 Sangesland confirmed with USA Tanks that they did drain the leaking tank and closed off the valves so it's isolated from the second working 275 gal tank. The property

owner is trying to decide if they'll repair/remove/replace the leaking tank. Sangesland told USA Tanks that they need to send in the following: 1) Color photos of the floor area showing the spill was cleaned. 2) A written statement saying the area was cleaned and no cracks were seen in the floor which may have caused underground contamination. 3) Documentation of what work was done on the tanks (repair/replace/remove). 9/20/06- DEC Piper spoke w/ Virginia Sardiis. As per conversation, work was completed. DECP iper pnoned USAP ENV. 718.981.5710.- As per conversation, leak was from tank. They removed one of the tanks and connected the single tank to the burner. Closed. E-doc report upon receipt."

Site Description:

Location: The site is located in an urban area in Bronx County. The site encompasses about 0.5 acres and is located at 2614 and 2620 University Avenue, Bronx County, Block 3215, Lot 11 and Lot 14. Site Features: The new building (a home and hospital for the aged) has been constructed and consists of seven floors with 50 residential units of affordable housing for seniors. Current Zoning/Use: The current use is a home and hospital of senior citizens. Surrounding uses also include residential and commercial. Historical Use: The 2614 Kingsbridge Corporation had operated a parking garage at the site since it purchased the property in 1973. Historical information indicated that there were three 550-gallon gasoline underground storage tanks USTs located beneath the garage. Phase II investigation identified petroleum impacts to the soil and groundwater. Additional sampling identified a release of tetrachloroethene (PCE) believed to be from a former dry cleaner offsite at 2628 University Ave. and a gasoline release from the former underground storage tanks at 2614 University Avenue. Site Geology and Hydrogeology: The site is underlain by a thin veneer (less than 6-inches to 8-feet) of low permeability, unconsolidated overburden on top of dense crystalline bedrock. The overburden is primarily silt and clay (weathered bedrock) with pockets of fill and thin lenses of native fine sand and rock fragments. Groundwater is not present at all locations in the overburden. Groundwater has been measured to flow from University Avenue southeasterly toward Aqueduct Avenue at a gradient of approximately 0.03 ft/ft.

Env Problem:

Nature and Extent of Contamination: Prior to Remediation - Contaminants of concern at the site included chlorinated volatile organic compounds (cVOCs) consisting of cis-1,2-dichloroethene, trichloroethene, and tetrachloroethene, as well as non-chlorinated petroleum VOCs such as benzene, ethyl-benzene, toluene, and xylene (BTEX). Impacted media included soil, soil gas, and groundwater. As a result of the remediation implemented at the site, concentrations of the contaminants of concern declined substantially. Post Remediation - The remedial measures commenced in 2000 and involved excavation and removal of the USTs and contaminated soils; installation and

operation of a Soil Vapor Extraction (SVE) system to address any residual contamination; a Sub-slab Depressurization System (SSDS) beneath the new building; and groundwater monitoring to assess the effectiveness of these remedial actions. A total of 3,070 tons of contaminated soil was removed and disposed off-site. The SVE system operated continuously for two years. The semi-annual groundwater monitoring program was implemented in June 2001, following completion of the remedy. Engineering and Institutional Controls (ECs/ICs), including a Site Management Plan and deed restrictions, are in-place. Engineering controls consist of a composite cover system, vapor barrier and active sub-slab depressurization system. The remediation was completed in April 2007 with the approval of the Site Management Plan and issuance of the VCA Release letter.

Health Problem: Volatile organic compounds are present in the groundwater at this site, however, exposure via ingestion is not expected as the area is served by public water. The potential for soil vapor intrusion in the on-site building has been mitigated by the installation and operation of a sub-slab depressurization system under the building.

Site Description: Location: The site is located in an urban area in Bronx County. The site encompasses about 0.5 acres and is located at 2614 and 2620 University Avenue, Bronx County, Block 3215, Lot 11 and Lot 14. Site Features: The new building (a home and hospital for the aged) has been constructed and consists of seven floors with 50 residential units of affordable housing for seniors. Current Zoning/Use: The current use is a home and hospital of senior citizens. Surrounding uses also include residential and commercial. Historical Use: The 2614 Kingsbridge Corporation had operated a parking garage at the site since it purchased the property in 1973. Historical information indicated that there were three 550-gallon gasoline underground storage tanks USTs located beneath the garage. Phase II investigation identified petroleum impacts to the soil and groundwater. Additional sampling identified a release of tetrachloroethene (PCE) believed to be from a former dry cleaner offsite at 2628 University Ave. and a gasoline release from the former underground storage tanks at 2614 University Avenue. Site Geology and Hydrogeology: The site is underlain by a thin veneer (less than 6-inches to 8-feet) of low permeability, unconsolidated overburden on top of dense crystalline bedrock. The overburden is primarily silt and clay (weathered bedrock) with pockets of fill and thin lenses of native fine sand and rock fragments. Groundwater is not present at all locations in the overburden. Groundwater has been measured to flow from University Avenue southeasterly toward Aqueduct Avenue at a gradient of approximately 0.03 ft/ft.

Env Problem: Nature and Extent of Contamination: Prior to Remediation - Contaminants of concern at the site included chlorinated volatile organic compounds (cVOCs) consisting of cis-1,2-dichloroethene,

trichloroethene, and tetrachloroethene, as well as non-chlorinated petroleum VOCs such as benzene, ethyl-benzene, toluene, and xylene (BTEX). Impacted media included soil, soil gas, and groundwater. As a result of the remediation implemented at the site, concentrations of the contaminants of concern declined substantially. Post Remediation - The remedial measures commenced in 2000 and involved excavation and removal of the USTs and contaminated soils; installation and operation of a Soil Vapor Extraction (SVE) system to address any residual contamination; a Sub-slab Depressurization System (SSDS) beneath the new building; and groundwater monitoring to assess the effectiveness of these remedial actions. A total of 3,070 tons of contaminated soil was removed and disposed off-site. The SVE system operated continuously for two years. The semi-annual groundwater monitoring program was implemented in June 2001, following completion of the remedy. Engineering and Institutional Controls (ECs/ICs), including a Site Management Plan and deed restrictions, are in-place. Engineering controls consist of a composite cover system, vapor barrier and active sub-slab depressurization system. The remediation was completed in April 2007 with the approval of the Site Management Plan and issuance of the VCA Release letter.

Health Problem: Volatile organic compounds are present in the groundwater at this site, however, exposure via ingestion is not expected as the area is served by public water. The potential for soil vapor intrusion in the on-site building has been mitigated by the installation and operation of a sub-slab depressurization system under the building.

 DEC Memo: "1/15/09 Reviewed tank tightness test report dated 1014/08. Report states that tank and line associated with tank 5 was inconclusive. Found leak at ATG riser and leak at manway lines. Notified engineer on-site. Checked database and no spill could be found. Called Tanknology and they have no record of calling in spill. I was told their procedure is to call spill hotline when a tank fails. I called Wayne Murphy of Bronx Community College (718)289-5245 and left message regarding spill and to return me call. 1/16/09 Sent ttf letter to: Wayne Murphy, Chief Administrative Superintendent Bronx Community College West 181st Street/University Avenue Bronx, NY 10453 Received call from Michael Spath of CUNY. Told him about ttf letter. He will provide response after he receives letter. He told me the tank failed because of the manhole gasket and that it was repaired. bf 9/1/09 Received faxed letter from Michael Dillon, Senior stationary engineer at BCC. Tank failed because of a gauge line on top of the tank. No release of fuel. Tank was retested on 1/9/09 and passed. NFA. bf"

SOIL. 12/21/2000 An additional spill site was found on the same property several hundred feet away from the original site. New site was a former gas station until 1950. Petroleum was found on the North East corner of the property. 7/18/2002 Sangesland spoke with Dave Winslow (consultant) at ATC Associates (212-353-8280). Mr. Winslow requested and Sangesland approved the creation of a new spill number to cover the New spill on the North East corner of the property discussed above in notes from 12/21/2000. ATC is then going to request the closure of this spill number 9306194 based on the excavation of contamination and the soil/water samples taken. Remediation of the North East corner of the property will continue under the New spill number: _____ 8/23/2002 - Sangesland spoke with Dave Winslow at ATC the site will NOT be broken into 2 sites. No new spill number will be opened. 8/26/2002 - Sangesland met with Dave Winslow. Another round of water sampling was conducted. MTBE on the whole site is non detect. VOC and SVOC on the site range from ND to 6.78 ppm. The site of the highest concentration is MW1 on the north east corner of the site. Groundwater flow is to the south, from MW 1 towards MW3. Levels at MW3 were just slightly over the Ambient Water quality guidance values. Levels will naturally attenuate over time. No Further Action. Spill Closed "

DEC Memo: "PBS 2-289647 Need to send a TTF letter Nov. 25, 2005 A Tank Test Failure Letter was sent to: Mr. Walter Delgado Audubon Partnership for Economic Devel 513 West 207th Street New York, NY 10034 05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin. 6/22/06 - Raphael Ketani. I called up Joe at PTC (718) 624-4842. He said that this is an old case (spill happened 11/8/05) and that he will have Diana call me back. The tank is 2000 gal., contained #2 fuel oil, and is listed as in service. 7/5/06 - Raphael Ketani. I reached Diana. She gave me the phone number to Audubon (212) 544-2400. She said that they had a failed tank only test, abandoned the tank in place with slurry, had 2 275 gal. tanks

installed in place, and other work. I called Audubon and was told to call Carmen Diaz after 12 noon. Ms. Diaz called me back to say that her contractor had sent her documents for the abandonment of the tank and other items. She asked which documents I needed. I told her I needed a revised PBS application for the 2000 gal. tank and any documents regarding cleanup and soil removal. She said she will call her vendor and get back to me. 7/11/06 - Raphael Ketani. I received a call from Nora Hines of the Audubon Partnership. She said that she was the assistant for Ms. Diaz. She said she had a bunch of papers that she could send me copies of regarding the work that was done at the site. Ms. Hines went through the list of documents, but none were the ones I needed. I checked the PBS record and the tank is still listed as in service. I told Ms. Hines that I needed a revised PBS application to show that the tank is abandoned and a report from PTC describing the abandonment work and the removal of any contamination. She said she will talk to Ms. Diaz on Monday when she comes back and get the proper paperwork. 7/13/06 - Raphael Ketani. Ms. Hines FAXed me a copy of the current PBS record, and the failing tank test results (in the dry portion). I still need an official document regarding abandonment of the tank (and any cleanup that was needed) and a revised PBS application. 7/20/06 - Raphael Ketani. I spoke to Ms. Diaz regarding the revised PBS application and the official letter regarding the abandonment of the tank and the replacement. She said that the person who normally handles these documents is on vacation and will be back on Monday. She said she will get me these documents. 7/25/06 - Raphael Ketani. Ms. Albertina Cabrera, assistant to Ms. Diaz, called up to ask what documents I needed from the Audubon Partnership. I told her that I needed a revised PBS and a letter describing the cleanup and the tank abandonment. She said she will send it. 8/15/06 - Raphael Ketani. Mark Salamack of PTC (718) 624-4842 called regarding the site. He said that he will submit to me a cover letter explaining what went on at the site, with soil test results, tanks test results, and a revised PBS application. 8/16/06 - Raphael Ketani. I received a FAX late yesterday from Mr. Salamack regarding the site. The FAX consisted of a letter to Sharif Rahman dated March 9, 2006 from PTC, soil analytical data, a site map, a copy of Mr. Rahman's tank test failure letter, and a copy of the closed record from the publicly accessible spill database. Mr. Rahman's spill case record number was 0507807 and was initiated due to a failed tank test for a 2000 gal. #2 fuel oil tank. His case was initiated on 9/29/05 and closed on 3/15/06. The case that I have, #0509515, also lists a 2000 gal. #2 fuel oil tank for the same site. This case was opened on 11/8/05 due to a tank test failure. The two cases appear to be exactly the same and are for the same site. I called up Mr. Salamack and he said that what they normally do is test the tank system first and then isolate the tank and test it alone. This would explain the two test dates. Based upon the documentation mentioned above that I received from Mr. Salamack, I am closing the spill case. "

Remarks:

"System test was done in October 2005 and failed. Tank was then evacuated and the holes in the line were plugged. A tank test was done today and it failed again. Now they are looking for a new tank and abandon the old one. (No release)"

cleanup. 12/24/04 Letter from O'Brien & Gere indicating the cleanup/ investigation will proceed, no start date is noted. 12/19/05 Feroze. Spill is transferred from Ketani to . 12/28/05. Mr. Martin pulver is called and a message is left for him to inform DEC the present status of that situation. A letter is sent to O'BRIEN & GERE to inform DEC about their actions to clean up debris, old tank and to close the old tank. 02/09/06. Feroze. Called O'brien & Gere and left a message them. 02/24/06 Feroze, Talked with Mr. Martin Pulver 718-289-5555, he said that he would talk with O'Brian and Gere that worked on that site. He will inform DEC about remediation actions. 03/15/06. Spill is transferred from Feroze to Kumer Patel. 04/06/06-Hiralkumar Patel. Called at O'Brien & Gere. Randy is no longer working at this company. Left message for Scott Scheidelnan, who is handling now. 04/17/06-Hiralkumar Patel. Spoke with Scott and he gave me number of Mr. Dipasca, who can tell that who is handling this case, as he was handling previously. Mr. Dipasca (732) 225-7380 Ext. Spoke with Peter Dipasca at Edison office of Obrien & Gere. he told me that Randy Waibel was handling this case previously and was working in Syracuse office of NJ. Peter is new to the company and only thing he has the letter that Randy sent out to Mike Tipple at DEC. Peter has sent out copy of this letter to Feroze. now Peter is not handling this matter and Michael Spath from University of NY is handling themselves. asked Peter to get file from Syracuse office as he doesn't know that what kind of work done after spill reported. Michael Spath CUNY Environmental Compliance Manager 535 East 80th Street 5th Floor New York, NY 10021 Ph.: (212) 794 - 5590 Email: Michael.Spath@mail.cuny.edu PBS #: 2-107204. as per PBS records, site has 13 in service tanks and 4 closed-in place tanks. * 13 in service tanks * 4 closed in place tanks * 7 USTs * 4 closed in place tanks are AST in concrete vault. * total capacity of tanks on site is 113855 gal. * 11 tanks are in use to store #2 fuel oil * 1 AST (700 gal) is in use to store Diesel * 1 UST (1000 gal) is in use to store Gasoline. * 4 closed-in place tanks are AST of 15,000 gal capacity each were in use to store #6 fuel oil. * all USTs currently in use are due for tank test. Tried phone number on PBS records for Person name Manny Ballen, but he is no longer working and operator transfer me to power plant. spoke with Anthony Johnson and he told me that Chief Engineers left for the Day. i can contact them tomorrow after 9 O'clock. Chief Engineer: Michael Dillon & Tyrone Fleming (718) 289-5258. Left message for Michael Spath. Received call from Mr. Spath and as per him Woodard and Currn Engineering is handling environmental problem at site. some one from this company will call me during week. as per his records, they have done tank test and sent test result to Benjamin Conlon at DEC. he will send copies through email again. 04/18/06-Hiralkumar Patel. REceived email from Mr. Spath with report. report included tank test results of six tanks only. among these six tanks, 4 tanks of 25,000 gal capacity storing #2 fuel oil, one tank is 1,000 gal capacity storing #2 fuel oil and one tank of 1,000 gal capacity stroing gasoline. this report doesn't include seventh tank of 10,000 gal capacity storing #2 fuel oil. send out email to Mr. Spath requesting information about this seventh tank and contact information about person who is handling environmental matter for university. 04/19/06-Hiralkumar Patel. Received call from Jack O'Neill, who is handling cleaning activities of tanks at site. as per him, they are planning to abandoned the four ASTs that are currently not in use. these tanks were in use to store #6 fuel oil and tanks are in concrete vaults. Jack will open vault and clean it. if he

finds any cracks on floor or any abnormal situation, he will notify the Department. i also asked him about seventh UST whose tank test data is not available. he will find it and call back.
05/05/06-Hiralkumar Patel. Received email from Michael Spath. the seventh UST was installed in 2002, so its due to tank test in 2007. as i was looking in tank test results that Mr. Spath send me before, found that the tests were done on 09/14/2004. but the tank test failure reported on 11/19/2004. send email to clarify this and to send if he has any new test results. 05/16/06-Hiralkumar Patel. Resend email to Mr. Spath. Received email from Mr. Spath. currently he is out of town. will contact soon. 06/05/06-Hiralkumar Patel. Resend email to Mr. Spath. 06/06/06-Hiralkumar Patel. Received email from Mr. Spath. he is looking for the tank which had leak in it. Received another email from Mr. Spath stating that the tank, which was reported leaking, is one of four #6 tanks at Bliss Hall. Woodard & Curran Engineering is working on work plan to permanently closing these tanks. Send email to Mr. Spath to find out which tank had problem and details about work done to correct this leaking tank. 08/14/06-Hiralkumar Patel. spoke with Mr. Spath. they are in process of hiring contractor to abandon four previously closed ASTs. asked Mr. Spath to test each tanks at location whose bottom is unvisible. he will call once he gets contractor. 11/27/06-Hiralkumar Patel. visited site. met Tyrone Fleming (718-289-5258), facility supervisor at university. as per Mr. Fleming, none of the active tanks has any problem. but there is oil spill from one of four 15000 gal Closed-In Place tanks. these tanks are located in Bliss Hall in concrete vault. this vault was in use as Coal storage in past and then they converted this storage into tank vault. spoke with Mike at facility. Mike was in this vault couple of months ago and he noticed oil inside vault. as per Mike, these tanks are out of service since 1984 and oil level readings in all these four tanks are constant since then. these tanks were in use to store #6 oil. from these four tanks, tank #2 has about 60% of oil and remaining three tanks has about 9 of product/sludge in it. all tanks are off-ground on legs. all lines to & from tank are aboveground. Mike hasn't noticed any oil leaking from any tank at time of his observation in tank vault. Mike mentioned that floor was not solid concrete when tanks were installed and he believed some oil may hit ground. Mike believe this oil spill may happened before 1984. spoke with Mr. Spath. they are in process of hiring contractor for spill cleanup and tank abandonment. asked Mr. Spath to call the Department with Contractor's name and number once they finalize it. sent out letter to Mr. Spath requiring endpoint sampling. letter emailed to Mr. Spath. 12/13/06-Hiralkumar Patel. received message from Ms. Hundley. spoke with Ms. Hundley. she asked copy of emails from Mr. Spath. she will be futher contact on this case. they hired O'Brian & Gere for further cleanup and will send final report at end of work. Esther Hundley Safety Officer City Uuiversity of NY (CUNY) 555 w 57th Street 10th Floor New York, NY 10019 Ph.: (212) 541-0430 Email: esther.hundley@mail.cuny.edu forwarded all emails that i received from Mr. Spath. sent copy of CSL to Ms. Hundley in email. email sent to Ms. Hundley came back undelivered. left message for Ms. Hundley. received call from Ms. Hundley. she gave current email address. sent email again to Ms. Hundley. 01/09/07-Hiralkumar Patel. left message for Ms. Hundley to provide contractor's info who will going to do required soil investigation. received call from Ms. Hundley. they have hired O'Brien & Gere and under them, AB Environmental working at site. AB environment visited site last week

and took some sample from product inside tank. they are planning to remove product from tanks on 01/16/07 and after removing tank, will do geoprobe to find any contamination. 02/14/07-Hiralkumar Patel. received call from Ms. Hundley. they finished removing sludge from three tanks out of four. fourth tank had about 10000 gal #6 oil in it and contractor is removing it currently. as per Mr. Hundley, tanks are sitting on cement floor inside concrete vault. as per her, vault floor is solid and if there was any oil spilled inside tank vault was contained at that time. once they remove oil from fourth tank, they will powerwash all four tanks. asked Ms. Hundley to submit report with condition of tank vault. 03/01/07-Hiralkumar Patel. received call from Ms. Hundley. she asked about requirement of cleaning lines of #6 oil tank. she mentioned that as per PBS regulations, lines must be free of oil/sludge. but as these lines were out of service for last 20 years, #6 oil got solidified in it and now it is very hard to removed from lines. discussed with DEC Jacob. he suggest to cap off these lines without any cleaning as it has #6 oil which has solidified. asked Ms. Hundley to cap off these lines without cleanint it. 03/13/07-Hiralkumar Patel. received call from Ms. Hundley. she asked whether she has to re-register #6 tanks which were closed 20 years ago. she asked because they cleaned out tanks now and closed these properly. told Ms. Hundley that as tanks were out of service for last 20 years, may not requires re-registration, but will call back once check with DEC Jacob. 04/17/07-Hiralkumar Patel. received tank closure report. based on available reports and informations, case closed. NFA sent to Ms. Hundley. letter emailed to Ms. Hundley. **tank test result copy that i had from Mr. Spath, i gave that to Brian to update tank test date in PBS Record.**"

Site Description: The site is located in a commercial/residential area of the Kingsbridge Heights section of the Bronx. The property is currently occupied by a two-story brick building which contains a laundromat. The site is bordered by a convenience store and apartment building on the north, by a formerly vacant lot (now under construction for Home/Hospital for the Aged), by a parking garage to the east, and by

University Avenue (a.k.a Martin Luther King, Jr. Boulevard) to the west. Before its use as a laundromat the property was previously utilized by a dry cleaner for an unknown length of time. Investigations conducted immediately south of the site (at 2614-2620 University Avenue) in 1997 identified tetrachloroethylene (PCE) at high levels in the soil (200 ppm) and groundwater (110,000 ppb). Based on subsequent investigations, a PCE hot spot was identified. In 2000, excavation of the hot spot area was completed. Confirmatory samples collected from the excavation showed non-detectable levels of PCE and associated breakdown products. Levels of contamination in the groundwater dropped by several orders of magnitude since 1997. The remaining groundwater contamination will be addressed under the Operations, Maintenance and Monitoring Plan. See also site no. 203008, which determined there was no source of contamination on 2628 University Ave. The site did not qualify for addition to the Registry of Inactive Hazardous Disposal Sites.

Env Problem: The operations contaminated the soil and groundwater on the adjacent property with tetrachloroethylene (PCE) and its associated breakdown products. Excavations addressed soil contamination, and most of the groundwater contamination. The remaining groundwater contamination is being addressed under the Operations, Maintenance and Monitoring Plan.

 DER Facility ID: 360181
 DEC Memo: "PBS 2-107204 - TTF Letter sent on 3/26/2009 Sangesland spoke to Mike Dillon at Building Facilities Dept. Gaskets on top of the tank were loose, repairs have been scheduled. Tank appears to be OK 9/21/09. J.Krimgold reviewed a letter submitted by Bronx Community College and dated July 14, 2009. According to the letter the tank failed the test due to two loose fittings on the to of the tank. Fittings were fixed. No release. Case closed."

Remarks: "Caller states they had a fitting failure on a 1080 gallon ast. No spill or resources affected."

Annual Monitoring Report, 7/2004 - 12/2004. 4 monitoring wells onsite, groundwater flow to southwest. no free product. Enhanced Fluid Recovery (monthly) on W-2 and W-4. W-1 and W-3 are in relatively low concentration. W-2 is high as 13,236 ppb BTEX and 22,200 ppb MTBE on 8/10/2004, 7,237.6ppb BTEX and 721ppb MTBE on 12/6/2004. W-4 is decreasing, 7,223.4 ppb BTEX and 82,500 ppb MTBE on 8/10/2004, 402.8ppb BTEX and 122ppb MTBE. 12/8/2005 - Feng - Letter to Scott Cunningham (Tyree) for getting the sidewalk permit to install monitoring wells downgradient of W-2 and W-4. Specific work to be performed: monitoring wells *The installation of monitoring wells in sidewalks along Albany Crescent and Bailey Ave across from the above referenced property. . 4/10/2006 - Feng - emailed to Scott Cunningham requesting the status of installation of monitoring wells. (RJF) 4/11/2006 - Feng - Reply from Scott Cunningham I was able to complete drilling in late December 2005 at this site. Delineation was difficult due to the firestation across the street from this site. I did have three wells installed (one on Bailey Avenue, one on Albany Crescent Avenue, and one on the intersection of those two streets) but unfortunately, the surrounding buildings, along with the firestation made it extremely difficult to get fully delineated. No wells were installed across the street from the site. 4/28/2006 - Feng - Quarterly Monitoring Report, 1/2006 - 3/2006. The site is an active gasoline retail/service station. Groundwater flows to southwest at the depth of 25.70' to 27.30' below grade. 7 monitoring wells onsite. W-1, BTEX BDL, 379 ppb MTBE. W-2, increased and 8,411.4 ppb BTEX, increased and 659 ppb MTBE. W-3, both BDL. W-4, increased and 6,398.1 ppb BTEX, increased and 3,550 ppb MTBE. W-5, BTEX BDL, 119 ppb MTBE. W-6, 382 ppb BTEX, 462 ppb MTBE. W-7, 620.3 ppb BTEX, 20,100 ppb MTBE. EFR done quarterly. (RJF) 4/28/2006 - Feng - Emailed to Scott Cunningham for further delineation around W-7, attached with well location siteplan. (RJF) 5/1/2006 - Feng - Email from Scott Cunningham The EFR events were conducted in 2005 and I did not remove the comment from the bottom of the cover page on the quarterly reports, but there are no EFR events scheduled for 2006. It will not be on the cover page any longer. As far as the additional monitoring well installations you noted on the site map, I do not know what purpose they would serve right now. The levels in MW-4 and MW-7 are elevated and we know where the source of the spill was, which way the groundwater flows, should we wait on the two (or more) new wells until we are closer to closure on this site? I was thinking that we would install monitoring wells closer to the source as the levels decreased in the wells near the perimeter. With the new data we have obtained, I am not sure new monitoring wells are the answer here. I am pretty sure right next to the source would have high levels according to the levels in MW-4 and MW-7, are you concerned with how high they would be right now? Let me know if you agree. 5/1/2006 - Feng - Emailed to Scott Cunningham Yes, I was interested to know what is there upgradient of W-7 for its low BTEX and high MTBE concentration and the plume extent in northeast side for W-3 is away from the plume. If you don't think these two wells are not necessary to delineate the plume, then please submit RAP to treat the contamination. (RJF) 11/15/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 9/2006, 8/2006, by Tyree. Active gasoline retail/service station. Groundwater sampled and gauged 8/21/2006. 7 monitoring wells. DTW 26.02' to 27.48' bg. Flow direction southwest. No LNAPL. BTEX range ND to 5,067 ppb (MW-2). MTBE range ND to 1,630 ppb (MW-7). (RJF) 12/1/2006 - Feng - RAP, 11/22/2006, by Tyree. Tyree proposed

EVFR events on MW-2 and MW-7 quarterly. The surrounding monitoring wells will be bonitored for fluctuations in the static level of the wells before and after the quarterly EVFR event, and the Radius of Influence will be determined. Tyree forwards a site plan with current tank location. The new tanks were installed in the same area where the former 550 gallon tanks used to be. Suggested Tyree to try different vacuum level to determine an effective ROI. The RAP is approved. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Quarterly EVR to address the contamination at SW portion of the property. (RJF) 2/7/2007 - Feng - Quarterly Monitoring Report, 10/2006 - 12/2006, 12/2006, by Tyree. Groundwater sampled 11/21/2006. 7 monitoring wells. DTW 25.8' to 27.45' bg. Flows southwest. No LNAPL. MW-1, BTEX BDL, 116 ppb MTBE. MW-2, 3,553 ppb BTEX, 21.9 ppb MTBE. MW-3, BDL. MW-4, 1,760 ppb BTEX, 27.9 ppb MTBE. MW-5, BTEX BDL, 19.3 ppb MTBE. MW-6, 123.12 ppb BTEX, 73.2 ppb MTBE. MW-7, 722 ppb BTEX, 4,150 ppb MTBE. (RJF) 6/19/2007 - Feng - Quarterly Monitoring Report, 1/2007 - 3/2007, 3/2007. Groundwater sampled 3/9/2007. 7 monitoring wells. DTW 26.31' to 28.06' bg. Flows to southwest. No LNAPL. MW-1, 0.64 ppb BTEX, 87.5 ppb MTBE. MW-2, 6,837 ppb BTEX, 57.4 ppb MTBE. MW-3, BDL. MW-4, 4,713 ppb BTEX, 232 ppb MTBE. MW-5, BTEX BDL, 11.3 ppb MTBE. MW-6, BDL. MW-7, 1,014 ppb BTEX, 1,090 ppb MTBE. 7/10/2007 - Feng - Quarterly Monitoring Report, 3/2007 - 5/2007, 5/2007. Groundwater sampled 5/11/2007. 7 monitoring wells. DTW 24.77' to 26.04' bg. Flows to southwest. No LNAPL. MW-1, 1.76 ppb BTEX, 221 ppb MTBE. MW-2, 3,426.7 ppb BTEX, 26.9 ppb MTBE. MW-3, BDL. MW-4, 4,357.6 ppb BTEX, 149 ppb MTBE. MW-5, BTEX BDL, 5 ppb MTBE. MW-6, BDL. MW-7, 1,543.4 ppb BTEX, 1,880 ppb MTBE. (RJF) 11/7/2007 - Feng - Quarterly Monitoring Report, 6/2007 - 8/2007, 8/2007. Groundwater sampled 8/21/2007. 7 monitoring wells. DTW 25.57' to 27.05' bg. Flows to southwest. No LNAPL. BTEX range ND to 1,622 ppb (MW-7). MTBE range ND to 3,310 ppb (MW-7). (RJF) 3/21/2008 - Feng - Quarterly Monitoring Report, 9/2007 - 11/2007, 12/2007. Active gasoline retail/service station. DTW 26.61' to 28.93' bg. Flows to southwest. NO LNAPL. BTEX range ND to 6,426 ppb (MW-2). MTBE range ND to 2,240 ppb (MW-7). Email D. Madigan (Tyree) for documentation of the EFR events performed. (RJF) 5/15/2008 - Feng - Quarterly Monitoring Report, 12/2007 - 3/2008, 3/2008. Active gasoline retail service station. Groundwater was gauged and sampled 3/3/2008. 7 monitoring wells. DTW 26.06' to 27.82' bg. Flows to southwest. No LNAPL. BTEX range ND to 2,534 ppb (W-2). MTBE range ND to 1,460 ppb (W-7). (RJF) 9/4/2008 - Getty Properties portfolio meeting with Tyree and Delta. Surrounding properties sketch. Survey the wells, contour next quarter. May need to do delection downgradient. Calculate the EFR results. (RJF) 5/6/2009 - Quarterly Monitoring Report, 4/2008 - 7/2008, 9/2008, by Tyree. Active gasoline retail service station. Groundwater was gauged and sampled 7/31/2008. 7 monitoring wells. DTW 26.62' to 28.06' bg. Flows to southwest. NO LNAPL. BTEX range ND to 5,481 ppb (W-2). MTBE range ND to 2,570 ppb (W-7). (RJF) 11/6/2009 - 2Q2009, 4/2009-6/2009, 9/2009, pdf, by Tyree. Active gasoline retail service station. Groundwater was gauged on 6/11/2009, 7/21/2009 and 8/20/2009. 7 monitoring wells. NO LNAPL. DTW 24.04' to 27.56' bg. Flows to south. Groundwater sampled on 6/11/2009. BTEX range ND to 6,709 ppb (MW-2). MTBE range ND to 116 ppb (MW-7). 6 EFR events are scheduled for this year. (RJF) 3/18/2010 - Reviewed Investigation Work Plan, dated 2/12/2010, by Tyree. Tyree proposes to install 6 soil borings around south corner of the site, soil samples to be collected only. 2 wells

are also proposed to be installed across Albany Crescent Road. Comments to Tyree asking for groundwater samples from SB-101 and SB-104 to see the extent of the groundwater containment. Revised work plan within 30 days. (RJF) 3/22/2010 - Tyree email explaining the reasons why not to take groundwater samples from SB-101 and SB-104. The objectives of the work plan are to determine the residual soil contamination and offsite migration, if any. Tyree requests DEC to reconsider the sampling of groundwater from SB-101 and SB-104. 3/29/2010 - Approve IWP proposing 6 soil borings collecting only soil samples and 2 monitoring wells across Albany Crescent Road. Investigation report by 6/2010. (RJF) 6/3/2010 - 1Q2010, 1/2010 - 3/2010, 5/2010, by Tyree. Monthly gauging and quarterly sampling. The groundwater was sampled on 3/18/2010. NO LNAPL. DTW 25.79 (MW-1) to 27.23' (MW-3). Flows to southwest. BTEX range ND to 2,172 ug/L (MW-4). MTBE range ND to 78.5 ug/L (MW-7). 6 VEFR events were conducted in 2009. The site investigation including 6 soil borings and 2 downgradient wells are being scheduled. FDNY permission to access area received from FDNY on 4/1/2010. 12/13/2011 - Reviewed 3Q2011, 11/2011, by Tyree. 9 wells were gauged and sampled. No product. Flows to west. High BTEX concentration in MW-2, 7,981 ug/L BTEX. MW-4, 3,188 ug/L BTEX. 2/1/2012 - KGH meets with R2 staff to discuss Getty Bankruptcy Case and closure petitions. 3/8/2012 - Reviewed 4Q2011 Report from Tyree which included their latest request for closure. As evidenced by this chronology, Tyree/Getty has conducted a long-term effort to meet groundwater standards across this site. A low-level (primarily xylene)exceedence persists in the area of MW-2. More than likely this is due to residual trapped in the shallow bedrock of the area. Surrounding wells demonstrate that groundwater attenuates naturally in a very short distance and is not an off-site threat. The NYSDEC accepts the Tyree/Getty motion that they have done all that is feasible under the circumstances. Therefore, the Department is requiring No Further Action at this time. Spill is being closed as currently Not Meeting Standards. Additional data may be submitted in the future for consideration of an upgrade in closure status. NFA - KGH"

Left message for property owner to call back. Property owner: Hop & Hung Lam (718)562 3679 9/20/02 TJD Site inspected by Demeo. 10 x 15 foot area in front yard was impacted by spill. Contaminated soils were removed by Milro. Demeo spoke with Paul Basso 9/18 and required endpoint samples as spill volume is estimated at approximately 20 gallons. At time of inspection soils had been removed and area was backfilled and reseeded. Awaiting analytical results. 12/27/02 TJD Closure report from Milro reviewed. Endpoint samples below TAGM. Spill closed."

Remarks: "appears to be an overfill from the vent pipe. cleanup in progress by petro."

DEC Memo: "Soil Contamination identified at an existing Long Term ExxonMobil site managed by P. David Smith. 09/12/2006: Per PBS record, two 4000 gal UST overdue for tightness test. Issuing letter to owner to perform tank test. The site has an open spill # 9200794 and Exxon Mobil is the RP. Lender Consulting Services Inc., (LCS) performed a limited and focused subsurface soil investigation at the site on July 21, 2006. They found contamination in the soil sample collected from the property. Per request from Exxon, a electronic copy of the LCS's report sent to their consultant GSC. (Sadique) 09/13/2006: Issued a letter to the current owner/operator to perform tightness test within 45 day for their two UST's which were overdue for tightness testing. (Sadique) 11/27/2006: Talked to Mr. Steve Thompson, G.M. regarding tank tightness test reports that was asked in the letter dated Sep 13th, 2006. He requested to send a fax of that letter again. Did send fax today. Received fax copy of the tank tighness test report from US Tank Alliance Inc. today. Last test performed on 12/05/2005. Per report all tanks and system passed the test. (Sadique) 03/02/2007: Per SIWP, Kleinfelder proposed advancement of one on-site and three off-site soil borings. Conversion of borings to four MW's. Conduct a subsurface investigation utility investigation utilizing ground penetrating radar (GPR). Collect at least one soil sample from each boring. SIWP found to be acceptable contingent upon to the following revisions: revise the location of two MW's. Install two on-site and two off-site MW's. Depth of the wells should be consistent with the seasonal variation of the gw depth at the site. Approval letter for SIWP issued. (Sadique) 05/10/2007: After reviewing the subsurface investigation report (Aug/Sep' 2007), either this spill will be consolidated to old ExxonMobil spill 9200794 or will be remediated by the current owner/ operator. (Sadique) 10/03/2007: File review/summary in preparation for closure: The spill No. 92 00794 was issued to Exxon Mobil at the site due to the discovery of petroleum impacts during excavation and UST removal on April 21, 1992. During this time twelve 550 gal UST s and one 1000 gal fuel oil UST had removed. A total of 351.9 tons of petroleum impacted soil was removed from the site. PID responses were recorded ranging from 32.5 to 4,510 ppm. Four excavation end point bottom samples were collected from the base of the excavation. Laboratory analytical results indicated that BTEX and MTBE were detected above NYSDEC RSCOs from one bottom soil sample located near the center of the excavation. January 28, 1994: Unico Environmental Inc. advanced two soil borings and collected soil

S102618902

samples near the highest PID readings as recorded during UST excavation. Soil samples were screened with PID. Laboratory analytical reports for the samples with highest PID reading indicates VOCs exceeded NYSDEC RSCOs at SB-2 (10-12 fbg) located adjacent to West 230th Street. Groundwater was not encountered during this time. July 01, 1997: Spill no. 9703936 was issued to Exxon Mobil at the site due to a tank test failure of one 4000 gal double walled fiberglass UST. The spill was closed on 09/23/2003. August 04, 1998: Geologic Services Corporation submitted a Closure Request letter for this spill. Based upon insufficient data and supporting documentation, the closure request was denied on 09/05/2006. Also requested to submit a SSIWP within 60 days. Lender Consulting Services Inc. (LCS) performed a limited and focused subsurface soil investigation on behalf of Burack Investment and report submitted on August 09, 2006. On July 21, 2006, LCS advanced six borings, depths ranging from 16 fbg to 20 fbg. Soil samples were screened with a PID and samples exhibiting the highest PID response in soil samples collected from BH1 through BH4 were submitted for lab analysis. Lab results indicated that benzene exceeded NYSDEC RSCOs at BH01 (at 14-16' as 290 ppb), BH02 (at 14-16' as 370 ppb) and BH03 (at 14-15.8' as 370 ppb). Due to the discovery of the petroleum impacted soil LCS notified NYSDEC and spill number 0605425 was assigned to the site on 08/09/2006. February 21, 2007 on behalf of Exxon Mobil, Kleinfelder submitted SIWP which was approved on March 02, 2007 with some revisions. August 28, 2007; Kleinfelder submitted the Subsurface Investigation Report and Sensitive Receptor Survey Report. During geophysical survey of the site, no subsurface anomalies were identified. During April 2007 four MW s were installed. Two on-site near the old tank field area and two off-site. No VOCs were detected in the soil at concentrations above the NYSDEC RSCOs. Six SVOCs were detected above NYSDEC RSCOs at MW-1 (8-10') and MW-4 (13-15'), one SVOC was detected at MW-3 (9-12'). Groundwater depth on May 14, 2007 ranged from 11.83 fbg (MW-4) to 12.23 fbg (MW-1). Regional groundwater flow direction is suspected to the southwest to the East River. Laboratory analytical results indicated concentrations of total BTEX in groundwater ranging from 2.5 ppb in MW-3 to 43.7 ppb in MW-4. Concentration of MTBE ranged from 6.1 ppb in MW-4 to 15.6 ppb in MW-2. Benzene was detected above the NYSDEC guidance value in all four wells as 5.9, 6.8, 1.6 and 33 ppb (guidance value for benzene is 1 ppb). MTBE was detected at concentrations above NYSDEC guidance value in monitoring wells MW-2 (15.6 ppb) and MW-3 (11.6 ppb). Guidance value for MTBE is 10 ppb. Ethanol was not detected in the groundwater samples. Exceedances of dissolved phase hydrocarbons are highest in MW-4, which is located directly adjacent to the central dispenser islands and the former UST field. Exceedances of SVOCs in soil and groundwater are consistent with the observation of coal ash as urban fill through out the site. During soil boring at MW-1 location, elevated PID responses (819 ppm) and strong odor were observed in the soil samples from depth ranged 24-26 feet. This is associated with the anaerobic degradation of plant and animal material and are not considered associated with petroleum contamination. Detections of SVOCs in soil are consistent with urban fill containing coal ash, which was observed during soil sampling. Detection of VOCs in groundwater were only marginally above respective NYSDEC WQS and guidance values. Per August 2007 SRS, there are potential sensitive receptors surrounding the site. These include commercial buildings, residential and public area buildings with

basements and subsurface structures including utility vaults and catch basins on and adjacent to the site. There are no surface water bodies within 300 meters of the site. No municipal water supply wells within 1500 meters. One private well associated with the Riverdale Car Wash, Inc. is located directly west of the site. No subways or tunnels located within 100 meters of the site. The water table was estimated at approximately 10 fbg and flowing from the northeast to the southwest towards the East River. Conclusion: The site was adequately characterized - soil and groundwater. Source removal of contaminated soil was conducted during UST removal activities in 1992. Four monitoring wells were installed and groundwater samples were analyzed. VOCs detected in groundwater were marginally above respective NYSDEC WQS and guidance values. No further remediation warranted. Standard not met due to minor exceedances in soil. NFA letter can be issued for the both spills, spill # 92 00794 and 06 05425. Also refer to the spill # 92 00794. (Sadique) 10/03/2007: Spill closure letter issued. Also see the spill # 92 00794. (Sadique)

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL This spill case was reassigned from DEC (Sigona) to Rommel on 02/10/2004. This Spill site cleanup has been consolidated under Spill No. 9200794. Bureau B, unassigned, due to low priority. Transferred from R-2 on April 27, 2005. Formerly R-2, unassigned. 7/25/2006: Reviewed all the available documents including the Aug 04, 1998 Closure Request letter. Geologic Services Corporation has prepared and submitted the letter with supporting documents to the department on behalf of the Exxon Mobil Corporation. As mentioned in the Closure Request letter, departments file does not have any copy of the report prepared by Zebra Environmental regarding the work performed on Feb 1995. Issued letter on July 24, 2006 to Exxon Mobil to submit a copy of that report within 45 days. (Sadique) 08/10/2006: Reply received from ExxonMobil on 8/10/06. They searched internally and also inquired its consultant at the time the report was prepared. The result of this search have been unsuccessful. (Sadique) 08/15/2006: Talked to Mr. Jeff Rowley of LCS, Inc. They completed a Phase II recently on that property and e-mailed a copy of that report. Six boreholes were completed on 7/21/06. 47 samples were collected. GW encountered in BH01 through BH3 at between 11.5 to 16.5 ft. PID readings were above ambient air background VOC for 39 samples out of 47. In BH01, slight petroleum odor and petroleum type sheen detected from 10 to 12 ft bgs and 16 to 20 ft. Based on the analytical results, a few VOCs and several SVOCs were detected. Analytical results are: VOC- benzene (370ppb, in BH02 at 0-2 ft, 290ppb in BH01 at 14-16 ft). Only metal Mercury present at, 1.1 ppb (0.1 ppb limit). Highest concentration of SVOC was 89000ppb for fluorathene in BH02 at 14-16 ft. (Sadique) 09/05/2006: Issued a denial letter to ExxonMobil in reply to the Aug 04, 1998 Closure Request letter that was prepared and submitted by Geologic Services Corporation on behalf of the Exxon Mobil Corporation. Also requested to submit a supplemental site specific Investigation work plan (SSIWP) within 60 days. (Sadique) 01/11/2007: Per Kleinfelders FOIL request, copies of the available documents sent today. Submission of the supplemental site specific Investigation work plan (SSIWP) is past due. (Sadique) 02/23/2007: On behalf of Exxon Mobil Kleinfelder has submitted Subsurface Investigation Work Plan. SIWP is now under review. (Sadique) 03/02/2007: Per SIWP, Kleinfelder proposed advancement of one on-site and three off-site soil borings. Conversion of borings to four MW's. Conduct a subsurface investigation utility investigation utilizing ground penetrating radar (GPR). Collect at least one soil sample from each boring. SIWP found to be acceptable contingent upon to the following revisions: revise the location of two MW's. Install two on-site and two off-site MW's. Depth of the wells should be consistent with the seasonal variation of the gw depth at the site. Approval letter for SIWP issued. (Sadique) 03/20/2007: Shan Zuidema of Kleinfelder informed due to site condition revised location for the 3rd well will need to shifted little west southwest but will be on-site. (Sadique) 07/23/2007: Field work per approved SIWP has

EXXONMOBIL (Continued)

S102618902

completed during 4/30/07 thru 5/3/07. (Sadique) 09/06/2007: Sensitive Receptor Survey dated August 2007 reviewed. There are potential receptors surrounding the site. These includes commercial buildings, residential and public area buildings with basements and subsurface structures including utility vaults and catch basins on and adjacent to the site. SRS is acceptable. (Sadique) 10/03/2007: File review/summary in preparation for closure: The spill No. 92 00794 was issued to Exxon Mobil at the site due to the discovery of petroleum impacts during excavation and UST removal on April 21, 1992. During this time twelve 550 gal UST s and one 1000 gal fuel oil UST had removed. A total of 351.9 tons of petroleum impacted soil was removed from the site. PID responses were recorded ranging from 32.5 to 4,510 ppm. Four excavation end point bottom samples were collected from the base of the excavation. Laboratory analytical results indicated that BTEX and MTBE were detected above NYSDEC RSCOs from one bottom soil sample located near the center of the excavation. January 28, 1994: Unico Environmental Inc. advanced two soil borings and collected soil samples near the highest PID readings as recorded during UST excavation. Soil samples were screened with PID. Laboratory analytical reports for the samples with highest PID reading indicates VOCs exceeded NYSDEC RSCOs at SB-2 (10-12 fbg) located adjacent to West 230th Street. Groundwater was not encountered during this time. July 01, 1997: Spill no. 9703936 was issued to Exxon Mobil at the site due to a tank test failure of one 4000 gal double walled fiberglass UST. The spill was closed on 09/23/2003. August 04, 1998: Geologic Services Corporation submitted a Closure Request letter for this spill. Based upon insufficient data and supporting documentation, the closure request was denied on 09/05/2006. Also requested to submit a SSIWP within 60 days. Lender Consulting Services Inc. (LCS) performed a limited and focused subsurface soil investigation on behalf of Burack Investment and report submitted on August 09, 2006. On July 21, 2006, LCS advanced six borings, depths ranging from 16 fbg to 20 fbg. Soil samples were screened with a PID and samples exhibiting the highest PID response in soil samples collected from BH1 through BH4 were submitted for lab analysis. Lab results indicated that benzene exceeded NYSDEC RSCOs at BH01 (at 14-16' as 290 ppb), BH02 (at 14-16' as 370 ppb) and BH03 (at 14-15.8' as 370 ppb). Due to the discovery of the petroleum impacted soil LCS notified NYSDEC and spill number 0605425 was assigned to the site on 08/09/2006. February 21, 2007 on behalf of Exxon Mobil, Kleinfelder submitted SIWP which was approved on March 02, 2007 with some revisions. August 28, 2007; Kleinfelder submitted the Subsurface Investigation Report and Sensitive Receptor Survey Report. During geophysical survey of the site, no subsurface anomalies were identified. During April 2007 four MW s were installed. Two on-site near the old tank field area and two off-site. No VOCs were detected in the soil at concentrations above the NYSDEC RSCOs. Six SVOCs were detected above NYSDEC RSCOs at MW-1 (8-10') and MW-4 (13-15'), one SVOC was detected at MW-3 (9-12'). Groundwater depth on May 14, 2007 ranged from 11.83 fbg (MW-4) to 12.23 fbg (MW-1). Regional groundwater flow direction is suspected to the southwest to the East River. Laboratory analytical results indicated concentrations of total BTEX in groundwater ranging from 2.5 ppb in MW-3 to 43.7 ppb in MW-4. Concentration of MTBE ranged from 6.1 ppb in MW-4 to 15.6 ppb in MW-2. Benzene was detected above the NYSDEC guidance value in all four wells as 5.9, 6.8, 1.6 and 33 ppb (guidance value for benzene is 1 ppb). MTBE was detected at concentrations above NYSDEC guidance

Environmental) on October 3 to discuss requirements of the site. Proposed and agreed to the installation of 5 borings (collection of gw and soil from each) and 1 additional wells (3 wells remains on site, 2 with product). Work Plan will be submitted shortly. 11/24/08: J.Kann - WP submitted on 11/19/08 5/25/12: J.Kann - assigned priority P0 to site as a part of monthly report tracking. 4/27/16: J.Kann email sent on 6/20/14: Yelena- Based on the Langan site investigation report of 2009 (report), product was detected at the referenced site in MW-1 and MW-3. According to the recommendations in the report, product gauging and removal should be prepared on a monthly basis. If any work has been done in the last few years, please update me. If no work has been done, please have your staff gauge the two wells containing product using the gauging methods used at Seth Low Houses. Once product thickness is determined, please vacuum out the wells and continue gauging and product removal on a monthly basis thereafter and have quarterly reports prepared and submitted to the Department. If free phase product is no longer present at the site, please let me know. - Jennifer November 2009 SIR by Langan DEcDoced. 5/12/17: J.Kann - visited site today. Wells were gauged and only water detected. MW-1 did have thick weathered 6 oil on the side of it that stuck to the probe. This well was only 2 inches in diameter. Given that no dissolved phase was detected and no product at the groundwater interface, old tanks were removed over 15 years ago and no other source present, spill closed. Email sent to NYCHA." DEC Memo:	"03/11/11-Hiralkumar Patel. 2:19 PM:- spoke with Christie at ATS. she mentioned that property manager is looking for contractor to fix tank system and then ATS will go back for retesting. 2:22 PM:- left message for Evan Robert, property manager. alternate address: none no other spills. PBS #: 2-509485. as per PBS record, site has one 2,000 gal #2 oil AST in contact with soil. PBS registration has expired on 11/02/10. A & R Davidson Mgt. LLC. **property owner** 36 East 37th Street New York, NY 10018 Attn.: Evan Robert **property owner** Ph. (212) 695-3510 Fax (212) 643-2061 email: evanrobertap@aol.com 03/14/11-Hiralkumar Patel. 12:59 PM:- left message for Evan Robert. 1:07 PM:- received call from Mr. Robert. asked him to conduct an isolation test or pump out tank by end of tomorrow to avoid any further release. 2:04 PM:- sent TTF letter to Mr. Robert requiring isolation test and PBS renewal. letter emailed to Mr. Robert with PBS application. asked Mr. Robert to submit isolation test result by 9 AM on 03/16/11. 03/16/11-Hiralkumar Patel. 11:23 AM:- received call from Mr. Robert. he is still waiting for cost proposal for isolation test. during conversation, he mentioned that tank is aboveground. informed him that if tank is completely visible (including bottom) and there is no leak from tank bottom and lines to/from boiler are running aboveground with no leak, then no need for isolation test. but there should be no more oil deliveries until the tank system is fixed and tested tight again. informed him that if there is leak found in fill line and if portion of fill line is underground, then further investigation is needed. Mr. Robert will call back after talking to his super to confirm that tank is completely aboveground and not wrap with concrete. 03/17/11-Hiralkumar Patel. 10:53 AM:- received call from Daniel from DD Contracting, company hired to do tank repairs. Daniel is on site right now. he mentioned that site has 1,500 gal tank completely wrapped in concrete. he was told to fix the fill line. fill line runs aboveground and fill port is located on building foundation wall. Daniels did not see any sign of leak from fill line but he was asked to change fill line. no oil found from weep holes on bottom of concrete wrap. supply/return lines run underground. Daniel DD Contracting Ph. (646) 321-2646 03/21/11-Hiralkumar Patel. letter sent to Mr. Robert came back undelivered. 4:15 PM:- spoke with Daniel. he has finished repair and waiting for re-testing. he will call once retesting is scheduled. 03/24/11-Hiralkumar Patel. 3:41 PM:- sent email to Mr. Robert requiring to submit result of retesting of tank system. 03/29/11-Hiralkumar Patel. 11:54 AM:- spoke with

IN THE BASEMENT (Continued)

S110769617

operator at Mr. Robert's office. she mentioned that ATS went for retesting but required more repair. technician is on-site today for repair. she will ask technician to call. 12:25 PM:- received message from Daniel. 2:42 PM:- left message for Daniel. 4:22 PM:- spoke with Mr. Robert and Daniel. asked Mr. Robert to either prove that tank/supply/return lines are not leaking (by having isolation test of these parts) or pump out tank until the system is tested tight. also asked Mr. Robert to seal the fill port to prevent any more oil deliveries. told Mr. Robert that if required document is not submitted by end of tomorrow, case will be referred to legal.

03/30/11-Hiralkumar Patel. 10:30 AM:- visited site. met Daniel. site occupies by a five story building with a basement. a 1,500 gal AST is completely wrapped in cinder blocks. weep holes at the bottom of tank wrap. no oil observed coming out from two visible weep holes. tank is about 6 ft away from the boiler in next room. all the lines running aboveground except about 6-7 ft of supply/return lines running under the boiler room floor and fill line running under the sidewalk. found valve connection (old connection from other pipes) in middle of fill line. gauge is not working. Daniel mentioned that they changed a piece of fill line in area where it enters into tank and now waiting for retest (which hasn't done yet) which will occur on 04/04/11. as no sign of any release observed inside the basement and as tank will be re-tested on 04/04/11, approved Daniel's request not to empty out the tank. 1:45 PM:- left message for Mr. Robert. 2:06 PM:- received message from Daniel. 04/15/11-Hiralkumar Patel. 3:26 PM:- left message for Daniel inquiring updates. 05/26/11-Hiralkumar Patel. 1:30 PM:- left message for Mr. Robert. 1:36 PM:- received message from Mr. Robert's office. 06/06/11-Hiralkumar Patel. 4:33 PM:- spoke with Mr. Robert and he mentioned that all work has been completed. spoke with Shin, Mr. Robert's assistance. she mentioned that tank passed the test. asked her to submit a statement (or invoice) from contractor including reason for tank test failure, repair done, any contamination during repair or not and passing tank test result. asked her to submit documents by end of 06/08/11. 4:40 PM:- sent email to Mr. Robert and asked him to submit spill closure report by the end of 06/08/11. 06/07/11-Hiralkumar Patel. 2:12 PM:- received email from Mr. Robert including copy of invoice. as per invoice from DD Contracting, they replace epoxy patch on oil tank with fiberglass resin patch, replace tank whistle and pipe which were leaking air and installed new petrometer. 06/09/11-Hiralkumar Patel. 11:44 AM:- sent email to Mr. Robert and asked him to send letter report from contractor including following: - cause of tank system failure - type of repair done - any contamination found during repair or not - results of tank system test performed after repair done asked him to submit documents by 06/13/11 - final notice. 08/05/11-Hiralkumar Patel. 11:24 AM:- spoke with Shin. she has access to Mr. Robert's email account and she mentioned that they did not received email dated 06/09/11. informed her that email will be resent. asked her to submit report as per the email, by the end of 08/09/11. 11:28 AM:- sent email to Shin (at Mr. Robert's email address) requiring to submit report by 08/09/11. 11:30 AM:- spoke with Shin. she confirmed that she received the email and will send document by 08/09/11. 08/11/11-Hiralkumar Patel. 4:29 PM:- received email from Shin including letter from DD Contracting. as per Daniel from DD Contracting, tank system failed a test due to leaking 1/4 inch copper line compression fitting located at the top of the tank. the fitting was replaced. no contamination found during repair. as per Daniel,

tank system was pressure tested and passed. 08/15/11-Hiralkumar Patel. 2:33 PM:- spoke with Shin and asked her to submit tank system test result. 4:09 PM:- received email from Shin including tank pressure test result. result is not acceptable as includes tight tank and no information about system test. 08/19/11-Hiralkumar Patel. 11:50 AM:- spoke with Shin and informed her that tightness test must be performed for entire system. she will call ATS, who performed test, for corrected result. 12:35 PM:- received email from Shin. she mentioned that Kristi Clune from ATS environmental will send tank test result. Kristi Clune ATS Environmental Ph. (800) 440-8265 Ext. 107 Email: kristi@atsenvironmental.com 12:36 PM:- spoke with Kirsti. she mentioned that they tested entire tank system. asked her to submit test result that shows tank system is tight. 1:16 PM:- received tank test result from Kristi. based on available information, case closed. **also see spill #: 1012136 as same managemenet and tank test failure.**"

Remarks: "vent pipe is loose from the top of the tank, after repaired they will retest."

532 West 215th Street New York, NY 10034 07/14/09. J.Krimgold reviewed the letter report submitted by Atec Environmental and dated May 21, 2009. Based on the report the tank failed the test either due to outdated vent cap or excessive corrosion of the manhole. Both components were repaired and a new manhole gasket was installed. The tank was retested and passed. Excavation of the tank top to perform repair did not reveal soil contamination. NFA. "

DEC Memo: "1/8/04 Reassigned from O'Dowd to K Foley. See spills #9700905, 9500824, 8907358. PBS #2-320439.(KMF) 1/3/05 Issued letter requiring site assessment be submitted for ten 550gal gas USTs closed-in-place on 10/1/01. Site assessment due 4/4/05. 1/14/05 Received voicemail message from Neil Vanderwood (914-774-2194) regarding letter requiring site assessment. 1/19/05 Spoke to N. Vanderwood. Site assessment activities were completed and soil samples were clean. Approx 2 months after geoprobes were done, they closed tanks in place. Four additional soil samples were taken from around the tanks.

No groundwater was encountered. He will submit documentation. 1/26/05 Spoke to N. Vanderwood. There are a couple of wells located next to the tanks if they need to collect groundwater samples. 1/31/05 Spoke to Anthony Della Mura who will send me the closure report. 2/2/05 Received Tank Closure Report prepared by Don Carlo, dated 10/15/01. Ten 550gal USTs and one 4000gal UST were abandoned in place. Allstate pumped the liquid contents from all the USTs which were filled with a foam fill material. All fill lines and pumps were removed. Soil samples were collected from four borings(around tanks and pump islands) at a depth of 12'bgs (not sure why samples were collected at 12'). The samples were screened by PID and did not register any readings. No staining or odors were observed. Samples were submitted for VOCs by EPA Method 8021. All returned below MDLs. No groundwater samples collected. No borings logs or scaled site plan included. Unknown if there were remote fills. 2/3/05 Issued letter requiring at least six soil samples near the tank field(within 2.5') and groundwater sample (within 5' of tank field and downgradient) be collected. Remote fill/dispenser island locations to be included on scaled site plan. Investigation summary report to be submitted by 5/6/05. 2/11/05-Vought-Received message from James Romano (212-826-6735) (Foley on vacation). Vought spoke to secretary and told her to call back on 2/14 when Foley returns. 3/25/05 Spoke to N. Vanderwood, subcontracted by Don Carlo. They have completed borings around the former tank field and have confirmed impact in soil. Groundwater samples do not indicate impacts. Will send report with proposal to install monitoring wells. 6/7/05 Spoke to Ted Yen. Owner was trying to sell property but will be taking care of environmental impacts first before selling. Don Carlo will be sampling wells and getting in full report. 3/22/06 Reassigned from Foley to Tang.(KMF) 06/22/2012 - Brevdo Left voice message to Neil Vanderwood (914-774-2194. I stated that DEC records indicate that Mr. Vanderwood was involved with this spill back in 2005 and I would like to speak to find any information he may have regarding this spill case. Left my number on his voice mail. Brevdo 06/22/2012 - Brevdo Mr. Vanderwood returned the call. He was a subcontractor to Don Carlo who was environmental consultant at the time but can not provide any helpful information and is no longer in business. Brevdo 05/22/2013 - Brevdo The following remediation work was completed at the site: 1) Ten 550gal USTs and one 4000gal UST were abandoned in place. Allstate pumped the liquid contents from all the USTs which were filled with a foam fill material. All fill lines and pumps were removed. 2) Soil samples were collected from four borings(around tanks and pump islands) at a depth of 12'bgs. The samples were screened by PID and did not register any readings. No staining or odors were observed. This indicates that contamination is unlikely impacted soils below 12 feet depth and the groundwater is unlikely to be impacted. 3) Groundwater sampling conducted in 2005 confirmed no impacts to groundwater. Given that the site remains oil change center and gas station, no groundwater impacts, site is paved, spill can be closed. Spill Case is closed effective May 22, 2013. Brevdo "

Remarks:

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was VOUGHT NO REGISTRATION FOR 2376.3/13/03 REASSIGNED FROM ROMMEL TO VOUGHT. 7/20/04-Vought-Changed site address from 2376 to 2375 Jerome Avenue. File review by Vought: See also closed spills: 9604011, 9606024, 9613200 and 9613206 at same location. Letter from DEC ODowd to Getty (Hanley)-2/11/97. The Department is mandating that the following work be done within 10 days: 1)full system precision testing of existing underground storage tanks 2)pumping out of product from service station drainage ports 3)an underground injection control investigation to determine the endpoints of the drains 4)determine if any 550 gal USTs exist at this site, their status and registration of them with the PBS Unit. Emergency Spill Response Report-Feb 1997. NYFD responded to complaints made by residents of nearby buildings of gasoline odors. Spill as result of a fuel delivery overfill. In order to mitigate a hazardous condition at the time fo the spill, the excess fuel was flushed through drains and ultimately found it's way into the municipal sewer system . Operational tanks include two (4000-gallon) and one (2000-gallon) gasoline USTs, Twelve (12) 550-gallon underground storage tanks previously abandoned in place are located to the east of the station building adjacent to Jerome Avenue. Two pump islands located along

S102232691

Jerome Avenue. A dye test and sewer inspection were performed. Storm drains on property had solid walls and bottoms . The discharge from both storm drains showed dye entering the sewer manhole located on west 184th Street . Tank tests were performed and passed for operational USTs. Letter from NYFD to Getty (Hanley)-3/18/97. You are therefore ordered to discontinue all motor fuel deliveries until approval has been given by this Department to resume . Tank Closure Report (Tyree)-August 1998. Reason for tank closure was property divestment. Apartment buildings located adjacent to the site to the west and a commercial building located to the north of the site . Removal of one (550-gallon) waste oil UST, two (4000-gallon) gasoline USTs and one (2000-gallon) gasoline UST. Twelve endpoint soil samples were collected. No soil for disposal was generated during the tank closure work . Soil analyticals show 171ppb MTBE(CTB2), 9930ppb ethylbenzene(DTB1), 24900ppb xylene(DTB1), 8480ppb MTBE(DTB1), 7061ppb xylene(DTB1) and 15700ppb MTBE(DTB1). Soil analyticals also show minor SVOC exceedences attributable to fill material. Quarterly Monitoring Report (Tyree)-June 1999 thru June 2001. Four monitoring wells onsite. Groundwater at depths of 9-11' below grade and flow to the west-southwest. Total Phase High Vacuum Extraction performed monthly on all four wells from Jan 2000 thru Dec 2000. June 2001 groundwater analyticals show 7.25ppb benzene(W2), 764ppb MTBE(W2), 107ppb benzene(W3), 71.6ppb benzene(W4), 20.4ppb toluene(W4), 169.8ppb xylene(W4) and 149ppb MTBE(W4). Request for No Further Action (Tyree)-9/6/01. Quarterly Monitoring Report (Tyree) July 2001 thru Dec 2002. Quarterly gauging and sampling and semi-annual reporting. Four monitoring wells onsite. Groundwater at depths of 9-11' below grade and flow to the west-southwest. Request for No Further Action (Tyree)-7/9/02. Tyree will continue monitoring activities on a quarterly basis until said letter is received . Semi-Annual Monitoring Report (Tyree)-Jan 2003 thru June 2004. Four monitoring wells onsite. Groundwater flow to the west and at depth of 9-10' below grade. Semi-annual gauging and sampling. Current site status is Perez Communications and Electronics . Parking lot to the north, commercial property to the east and residential apartment buildings to the west and south . Geoprobe Workplan (Tyree)-5/27/04. Proposal for the installation of 7 or more borings: from the former underground, gasoline storage tanks and throughout the site property . Soil and groundwater samples will be collected. Unless you indicate otherwise, Tyree will proceed with the work mentioned above on June 4th 2004. 7/22/04-Vought-File review continued: Investigation Report (Tyree)-6/28/04. Three Geoprobe borings performed. Groundwater encountered at 10'. Only three out of eight borings (B-2, 5 and 6) were installed because the manager of the property was not cooperative and would not let us advance the other five borings (B-1,3,4,7 and 8). If additional work is required, Tyree also requests that a letter be sent to Mr. Perez at: Mr. Perez Perez Communications and Electronics, Inc. 2375 Jerome Avenue Bronx, NY 10468 Ph 718-329-2744 Vought called Perez from phone number obtained via public information. Phone number disconnected. Vought spoke to Dave Pachan and he has same number as information. 7/23/04-Vought-Left message for Pachan inquiring as to Mr. Perez's first name for failure to cooperate letter. Vought also sent cooperation letter to Perez Electronics and cc'd Getty Properties. 9/3/04-Vought-Sent Stipulation Agreement with due date of 10/04/04 which includes requirements of: 1)well installation downgradient of B5/B6, adjacent to southern pump island, at proposed boring location

GETTY (Continued)

S102232691

B3, B7 and B8 from 5/27/04 proposal 2) surrounding area site plan. 10/15/04-Vought-Sent Tyree Delta email for STIP status. 12/1/04-Vought-Received email from Paul Lindell. Developer contact info is Joey Rishty (732-897-0400, 908-309-882). The delay in executing the Stipulation Agreement for this site is due to the pending construction plans of Joey Rishty. Since we don't know the exact location of the proposed structure and the foundation details, we can't move forward with a subsurface investigation since we won't know where to place our borings/wells, how much if any impacted soil will be encountered and how construction will affect our remedial plans for this site. Vought called Rishty for contact information and was told to call back. 12/2/04-Vought-Called Rishty for contact information and left a message to return call. 12/3/04-Vought-Received message from Rishty requesting copy of DEC's requirements. Vought faxed him copy of 9/3/04 Stipulation Agreement and required him to call back upon review. 12/14/04-Vought-Called Rishty for address to send letter requiring stip compliance prior to development: Joseph Rishty CTK Realty LLC. PO Box 77 Allenhurst, NJ 07711 ph: 732-897-0700 cell:908-309-8822 Fax: 732-897-0475 Vought faxed copy of Getty Stipulation and requirement letter and sent hardcopy via mail. Getty cc'd on requirement letter to Rishty. Vought sent email and fax to Delta and Tyree requesting status of overdue Stip and site meeting. Vought also sent letter to developer requiring adherence to STIP prior to development. 1/21/05-Vought-Quarterly Monitoring Report (Tyree)-Four monitoring wells onsite. Groundwater at depth of 9-10' below grade and apparent groundwater flow to the west. Site on semi-annual monitoring. Groundwater analyticals show 10.5ppb benzene(MW2), 956ppb MTBE(MW2), 53.2ppb benzene(MW3), 118ppb MTBE(MW3), 39.3ppb benzene(MW4), 20.4ppb toluene(MW4), 50.1ppb ethylbenzene(MW4) and 265.2ppb xylene(MW4). DEC requires: 1) quarterly monitoring reports (as opposed to semiannual) 2) Well installation at former boring locations B3, B7 and B8, adjacent to southern pump island and downgradient of B5 and B6 3) surrounding property sketch 4) determination of actual groundwater flow 5) development schedule and properties intended use 6) signing of STIP 7) vapor barrier/passive ventilation system. Site visit on 1/21/05 with Lindell, Hatcher and Rishty. Meeting resulted in: 1) Getty will sign Stipulation 2) Getty will perform hotspot excavation of soil and associated endpoint sampling 3) no basement will be included in retail stores and foundation depth will go to 3'bg 4) vapor barrier will be installed onsite 5) Getty will install four monitoring wells in sidewalk (two in Jerome and two downgradient on West 184th Street) 6) Quarterly reports will be submitted 7) groundwater flow submitted (to the west) is actual groundwater flow. DEC no longer requires well installation at B3, B7, B8 and adjacent pump island due to soil excavation of hotspots, development plans and agreement to install downgradient wells from these locations. Vought sent Lindell and Hatcher copy of NYSDOH Guidance for Evaluating Soil Vapor Intrusion in the State of New York dated October 2004. 2/18/05-Vought-Stipulation implemented by Kunkel with 2/10/05 date. Vought faxed and sent copies to Shea, Lindell and Hatcher. 7/6/05-Vought-New file review by Vought: Groundwater Investigation (Tyree Cunningham)-4/6/05. Eight geoprobe borings, collection of soil and groundwater samples and seven soil gas samples. Soil gas analyticals show max of 706ppb benzene(SG5), 34ppb toluene(SG2), 100ppb ethylbenzene(SG6), 104ppb xylene(SG2), 980ppb MTBE(SG3). Soil analyticals show: 101000ppb ethylbenzene(B1 9-10'bg), 256000ppb xylene(B1 9-10'bg), 398ppb benzene(B2 9-10'bg),

17500ppb toluene(B2 9-10'bg), 121000ppb ethylbenzene(B2 9-10'bg), 782000ppb xylene(B2 9-10'bg). Excavation Report (Tyree Cunningham)-6/30/05. No samples were collected from the bottom of the excavation due to the presence of groundwater in the hole. No bottom samples were collected due to groundwater. A total of 1016.5 tons of soil were removed from the site. Soil analyticals show: 46500ppb ethylbenzene(EX1 South), 24140ppb xylene(EX1 South), 569ppb MTBE(EX1 South), 8820ppb ethylbenzene(EX2 North), 9668ppb xylene(EX2 North), 1280ppb benzene(EX2 South), 3200ppb toluene(EX2 South), 951000ppb xylene(EX2 South), 19800ppb ethylbenzene(EX2 East), 57600ppb xylene(EX2 East), 10800ppb toluene(EX2 West), 44900ppb ethylbenzene(EX2 West), 306000ppb xylene(EX2 West). DEC requires: 1)Submission of RAP prior to building approval so that remedial system (if necessary) can be located. 2)installation of vapor barrier and mitigation system due to soil gas detections of BTEX in areas not excavated 3)delineation of groundwater contamination. Vought called Lindell to discuss and sent email with same. Vought called Rishtey who assured Vought that no construction will take place prior to DEC approval. 7/22/05-Vought-Received message from Rishtey that additional 500 tons of soil are going to be excavated by Tyree. Vought called Rishtey and agreed to additional excavation. 8/8/05-Vought-Notified Rishtey, Lindell and Hatcher that Imdad Islam will be new PM. Vought spoke to Rishtey who said that excavation has already taken place. 8/22/05- Responded as follows to Paul Lindell's email asking for Dept. permission to proceed with the site development work for constructing residential building at the site: Dear Mr. Lindell, In reponse to your email and as a follow up of and further to our telephone discussion today, pls make a note of the following issues: 1. The site's historical investigation results show that both soil and groundwater at the site have been impacted by petroleum-related contamination. Some contaminated soil has been excavated and removed so far from the site, and it appears more contaminated soil may exist. 2. Even though the groundwater contamination was detected long time ago, no remedial measures have been taken other than monitoring. However, the monitoring data reveals that dissolved phase residual contamination still exist. 3. A complete and precise delineation of the extent of petroleum contamination to soil and groundwater has not been done as yet. 4. Under the above situation and as per signed Stipulation Agreement, the Dept. requires a detailed Investigation Summary Report along with a proposed recommended Remedial Plan both for soil and groundwater. 5. The Dept. may not allow to proceed with any development work on the site without any approved and pragmatic remedial system in place. Please contact me if you have any questions or concerns. Sincerely, Imdadul Islam 8/24/05- Went for a site visit today and met Paul Lindell (Delta), Paul Hatcher & Scott Cunningham (Tyree) at the site. Issued a letter requiring ISRP submission by the end of Sept./05.-II 9/8/05- Received the following email from Paul Lindell. Imdad- We are in receipt of your letter dated August 24, 2005. Tyree is nearly complete with its remedial proposal and is attempting to get the required ground water delineation drilling conducted next week. I hope to have their draft of the proposal tomorrow. Once I have completed my review of the remedial proposal I will forward for your review and comment. At this point, we will most likely base our remedial proposal on the most recent ground water data obtained from the wells on site. We can validate the proposal once the delineation data is in. Regarding the deadlines associated with the Stipulation

GETTY (Continued)

S102232691

Agreement, we kept Jeff Vought apprised on the progress of this investigation and the various hurdles we encountered with moving this investigation forward. He acknowledged the difficulties and appreciated the updates and was fine with the delays encountered. I and Tyree will continue the updates going forward. Regards, Paul 11/14/05- The site being Getty's property, spill case is reassigned to Rui of Joe-Sun's group. 12/8/2005 - Feng - Email from Paul Lindell (Delta) inquired the status of this site. They submitted the RAP. This site was issued a violation for excavation at the site by Department of Building. And asked for recommendations and comments for the submitted RAP before new year. 12/14/2005 - Feng - Reviewed the file. The site will be developed as a commercial building on top of the site. There are 2 (30 FT DIAMETER) CRATERS APPROX 6-8 FT IN DEPTH CAUSING REMAINING LEVEL PAVEMENT TO CRACK & (FORMER GAS STATION) SINK. REMEDY: MAKE ALL REPAIRS . A. In the Subsurface Investigation Report, dated June 28, 2004, Tyree stated that three (3) borings were performed on 6/14/2004. B-5 and B-6 which located downgradient from the former pump island were found high BTEX concentration in groundwater. The groundwater sample collected from B-5 indicated to have 268 ppb Benzene, 54.8 ppb Toluene, 1,960 ppb Ethylbenzene and 5,909 ppb Total Xylenes. Furthermore, groundwater sample collected from B-6 was detected to have 27 ppb Benzene, 17 ppb Toluene, 2,260 ppb Ethylbenzene and 7,610 ppb Total Xylenes. B. In the Subsurface Investigation Report, dated April 6, 2005, Tyree mentioned that they performed a groundwater investigation consisting of eight (8) soil borings . In fact, only soil and soil gas samples analytical results were presented in the report. The soil samples collected from locations B-1 and B-2 at depth of 9-10 feet below grade revealed extremely high concentration. C. In Post Excavation Report, dated June 30, 2005, Tyree reported has performed a limited contaminated soil excavation on the property on June 15, June 16, and June 20. Soil samples taken from Ex-2 South at eight (8) feet below grade on 6/20/2005 revealed elevation of 1,140,410 ppb BTEX. D. In Post Excavation Report, dated August 9, 2005, Tyree reported has performed a limited contaminated soil excavation on the property on July 22 and July 25, 2005. Soil samples taken from Ex-2 South at eight (8) feet below grade on 7/25/2005 revealed elevation of 1,014,720 ppb BTEX. E. In the Subsurface Investigation Report, dated September 29, 2005, nine (9) borings were performed on 9/21/2005. Among these borings, five (5) were around the property and four (4) on the sidewalk. Up to 1,300 ppb MTBE found in GP-3 groundwater sample, and 1,176 ppb BTEX found in GP-8 groundwater sample. 12/16/2005 - Feng - Email to Scott Cunningham (Tyree) with comments above and requested: 1) Groundwater/soil concentration locate where the future building will be locate, i mean the samples collected upon reaching the terminus of the foundation excavation. 2) Groundwater/soil concentration or endpoint samples of the excavations, i mean when removing the contaminated soil off the site. 3) Dimensions of the excavations. 4) Construction detail and vapor mitigation of the building, like vapor barrier and ventilation system design. 12/21/2005 - Feng - Email from Scott Cunningham (Tyree) and said would send the monitoring reports over. 12/29/2005 - Feng - Formally rejected the RAP (proposed MNA). Received the monitoring reports. Reviewed RAP and the entire file that submitted by Tyree. Tyree proposed Monitored Natural Attenuation for the site. This site is going to develop and a commercial building will be on top of it. Basically, this site has not enough groundwater information for the area where the future building locate, extremely

EPA ID Number

GETTY (Continued)

S102232691

high soil concentration was observed even after excavation. RAP rejected and requested: 1) delineation of the groundwater contamination on where the building locate. 2) construction detail and vapor mitigation design. 3) propose another RAP. (RJF) 1/4/2005 - Feng - Quarterly Monitoring Report, 8/2005 - 10/2005. 3 monitoring wells locate in 3 corners of the site. W-2, 14.4 ppb BTEX and 949 ppb MTBE. W-3, 8.98 ppb BTEX and 86.6 ppb MTBE. W-4, not accessible. 2/13/2006 - Feng - Reviewed the construction details (drawings submitted by Just Architecture) on 2/10/2006. Emailed to Scott Cunningham (Tyree) requested vapor barrier specification since it wasn't on the drawings. And asked about the status of extending passive venting pipe to Ex.1 and application of ORC. (RJF) 2/24/2006 - Feng - Approve via email the installation of Passive Vapor Extraction System in area of Ex 2 (letter 1/19/2006, drawing attached), and the application of ORC in area of Ex 1 (letter 2/22/2006) to address the soil contamination in these area that couldn't be removed off the site anymore due to location problem. Still need the vapor barrier detail, thickness and material, etc. and the weight of ORC that going to be used. (RJF) 3/17/2006 - Feng - Approve the installation of vapor barrier system Griffolyn Type-65 and thickness of 8 mil (email from Just Architecture, 3/14/2006). Since there is no basement, and contamination is mainly in the soil below south sidewalk which cannot be removed, and water table at 10'-12', so thickness of 8 mil was approved. letter sent to Kevin Shea (Getty Properties) and CC to Tyree. (RJF) 8/28/2006 - Feng - Update from Paul Lindell (Delta), the remedial work is held by the developer now. The NYC Buildings Dept has issued another violation because of the property condition. Getty could only do their work when the developer has done certain things on his site. (RJF) 10/17/2006 - Feng - Quarterly Monitoring Report, 5/2006 - 7/2006, 7/2006, by Tyree. DTW 9.49' to 10.57' bg, flow direction west. No LNAPL. BTEX range from non-detect to 367.1 ppb. MTBE range from non-detect to 245 ppb. (RJF) 11/13/2006 - Feng - Quarterly Monitoring Report, 7/2006 - 10/2006, 10/2006, by Tyree. Groundwater sampled and gauged 9/25/2006. 2 monitoring wells. MW-1, MW-2, MW-3, MW-4, MW-5 and MW-6 were destroyed during the excavation 6/2006 and 8/2006. DTW 10.71' to 11.20' bg. Flows to west. No LNAPL. MW-7, 1,016.44 ppb BTEX, 4.81 ppb MTBE. MW-8, BDL. (RJF) 1/18/2007 - Feng - Getty Properties portfolio meeting with Tyree and Delta. Construction started. PVES will be installed after developer constructs the proposed building on the site. 9/19/2006 ORC Advanced solution applied to the contaminated soil. (RJF) 5/10/2007 - Feng - Spoke to D. Madigan (Tyree). The building is up and the vapor barrier was installed. A passive well was installed and will be connected to the building this week. (RJF) 11/6/2007 - Feng - Reviewed the spill closure request, letter from Tyree dated 6/14/2007. Tyree performed the ORC application and the installation of the PVES at the proximity of north sidewalk of West 184th Street. Vapor barrier installed for the new building. But the latest submitted quarterly report of 10/2006 indicated the groundwater concentration of 1,016 ppb BTEX in the MW-7. Spill closure request denied and additional work required to conduct at the MW-7 area. Work plan due 12/21/2007. (RJF) 11/8/2007 - Feng - Portfolio meeting with Delta and Tyree. Monroe college campus is opened onsite. Tyree will grab water samples (GeoProbe) from MW-7 area. (RJF) 8/6/2008 - Reviewed the Subsurface Investigation Report dated January 2008, by Tyree, pdf copy via email. On 12/3/2007, 2 soil borings were advanced in the vicinity of

S102232691

former MW-7 using GeoProbe. Soil was screened began at 5 feet bgs until groundwater was met at 11 feet. No PID readings. 2 soil samples were collected at 5'-10' bg. Soil analyticals are ND. 2 groundwater samples were taken and slight VOCs exceedances were detected. B-1, 2.2 ppb benzene. B-2, 11.6 ppb benzene, 11.4 ppb MTBE. Tyree requested spill closure. (RJF) 9/4/2008 - Getty Properties portfolio meeting with Delta and Tyree. Need old hydrographs. Will review the closure petition. (RJF) 1/6/2009 - Getty Properties portfolio meeting with Delta and Tyree. Petition for closure with updated maps, contours and hydrographs for historical data by 1/2009. (RJF) 12/14/2009 - Reviewed Spill Closure Request, dated 6/12/2009, by Tyree. Email Tyree comments, in eDoc. Resubmit the closure request by 1/2010. (RJF) 11/2010 - (KGH) Getty Petitions R2 for Spill Closure 12/2011 - (KGH) Central Office BTS(Hale)is requested to assist OGC with coordination of DEC response to Notice of Bankruptcy Filing: Chapter 11, CaseNo.: 11-15606 Getty Petroleum Marketing, Inc.,et al. BTS is also provided with a list of 15 spill numbers for which Getty has petitioned but not yet received closure. KGH begins review of files available in EDOCs. 2/1/2012 - KGH meets with R2 staff to discuss Getty Bankruptcy Case and closure petitions. Consensus of senior staff is that Spill # 97-02759 has been addressed to the extent feasible and it was appropriate to consider closure. 2/8/12 - KGH - an overfill during delivery in 6/1997 caused a surface spill of gasoline into the sewer system which resulted in vapor impacts to neighboring buildings. This was quickly resolved by NYFD. Subsequent investigation by DEC identified significant petroleum soil contamination which was excavated in 2005 to the extent feasible. Approximately 1500 tons of soil was removed. The site was redeveloped in 2007 and vapor mitigation (barrier and passive vent) was engineered into the new construction. Inaccessible residual soil contamination may remain but will biodegrade over time. GW concentrations have steadily decreased since source removal and were very close to drinking water standards when last sampled in 2008. The Department is requiring No Further Action at this time. Spill is being closed as currently Not Meeting Standards. Additional data may be submitted in the future for consideration of an upgrade in closure status. NFA"

 Town: New York City
 Record Added Date: 09/27/2016
 Record Updated Date: 05/09/2018
 Update By: SXDEWES
 Site Description:

Location: The 0.578 acre site is located in an urban area at 2409 Jerome Avenue in the Fordham Heights neighborhood of the Bronx. The site is identified on the New York City Tax Map as Block 3199, Lots 106 and 113. The site is bound by a 2-story commercial building (2415 Jerome Ave) followed by West Fordham Road to the north, Jerome Avenue to the east, a 2-story academic facility (2375 Jerome Avenue) followed by West 184th Street to the south, and a 5-story multifamily residential buildings (2390-2410 Davidson Avenue) followed by Davidson Avenue to the west. Site Features: The site is rectangular shaped and encompasses an approximate area of 25,200 square feet. The proposed site is comprised of an asphalt-paved parking lot and two 1-story structures used for auto repair. The topography of the site generally slopes to the east. An NYCTA elevated structure (the "4 "-line) is east of the site, above Jerome Avenue. The transit structure is offset approximately 28 feet from the east property line. Current Zoning and Land Use: The proposed site is located within residential zoning district R7-1 with a C2-4 commercial overlay. R7 districts are classified as medium-density apartment house districts. The district has a maximum floor area ratio (FAR) of 3.44. The surrounding parcels are located in residential and commercial zoning districts. Past Use of the Site: The site was used as a fuel dispensing station and auto repair facility from 1927 to 1989, a greasing and auto laundry facility (circa 1945 to 1989), and auto repair facility from 1927 to the present. Thirteen closed 550-gallon gasoline underground storage tanks (UST) and one closed 4,000-gallon gasoline UST were associated with the former fuel dispensing station. The thirteen closed 550-gallon USTs and closed 4,000-gallon USTs were installed in

S116551319

December 1968 and December 1978, respectively. Based on the NYSDEC petroleum bulk storage (PBS) records (PBS # 2-188492) and an interview with site personnel, these USTs were decommissioned and removed from the site between 1988 and 1991. A petroleum spill (Spill No.: 88-05383) was reported to the NYSDEC during the removal of a UST in September 1988 when an unknown amount of gasoline was released into surface soil and groundwater. The spill was subsequently closed by the NYSDEC in February 1989. Site Geology and Hydrogeology: The subsurface strata consists of a layer of historic fill material that extends to depths of up to 9 feet bgs followed by native soil and bedrock. The historic fill consists of brown-black, medium to fine sand with varying amounts of silt, clay, gravel, and debris. Native soil consisting of a layer of gray-brown clay with varying amounts of sand and silt, followed by a layer of brown-black, medium to fine sand with varying amounts of gravel, silt, and clay was encountered beneath the historic fill layer. Bedrock, consisting of fine-grained biotite-quartz gneiss, is present at about 15 to 18 feet bgs across the site; bedrock is weathered near the contact with overlying soil in isolated locations. Depth to groundwater ranges from about 9.63 to 10.00 feet bgs. The poor recharge experienced during groundwater sampling likely indicates groundwater is perched on bedrock. Groundwater is expected to flow to the west towards the Harlem River, which is located about 3,000 feet west of the proposed brownfield property.

Env Problem:

Nature and Extent of Contamination: Prior to Remediation Based on the investigations conducted to date, known contaminants including chlorinated solvents, semi-volatile organic compounds (SVOCs), metals, and other volatile organic compounds (VOCs) were present in the subsurface. These contaminants are impacting soil, groundwater, and soil vapor. Previous investigations included a Phase I Environmental Site Assessment (ESA) and a Phase II ESA. Soil - The concentrations of 1,2,4-Trimethylbenzene (VOC), 1,3,5-Trimethylbenzene (VOC), Ethylbenzene (VOC), and Toluene (VOC) exceeded the Commercial Use SCOs in the samples collected from 10-11 ft bgs in two (2) borings installed across the Site (SB01, and SB03). Benzo(a)pyrene (SVOC) and Copper (Metal) Commercial Use SCOs in the 0-2 foot interval in two (2) borings (SB07 and SB08). Groundwater - VOCs detected in groundwater samples collected were 1,2,4-Trimethylbenzene (VOC), 1,3,5-Trimethylbenzene (VOC), Benzene (VOC), Ethylbenzene (VOC), n-Propylbenzene (VOC), Naphthalene (VOC), o-Xylene (VOC), p/m-Xylene (VOC), Toluene (VOC), 2,4-Dimethylphenol (SVOC), Naphthalene (SVOC), Barium (Metal), Iron (Metal), Magnesium (Metal), Manganese (Metal), Sodium (Metal), and Lead (Metal). Soil Vapor - PCE was detected in one out of the three soil vapor samples at the concentration 63.7 ug/m3.

Health Problem:

Information submitted with the BCP application regarding the conditions at the site are currently under review and will be revised as additional information becomes available.

DER Facility ID: 171615
DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE Spill transferred to Greco in July, 2005 as part of Spills Closure Initiative. Greco called property manager, Mr. Jack Timlin (718) 796-2482, and alerted him that he had two open spills associated with 2600 Neatherlands Ave., both from 1998. Mr. Timlin was unaware of there being any open spills, but said he would check records from that era and get back to Greco. JDG 7/21/05 7/21/05 Spill is open and was consolidated with Spill # 9807392 (i.e., # 9807392 has been closed, as it appears to be the same spill as # 9807098). JDG 11/01/05 Greco recontacted Mr. Timlin and he will return call tomorrow. JDG 11/2/05 Mr. Timlin returned my call and said that they have not found much. We were able to determine that 5/98 was the date of an UST closure on the property, so he is checking to see if that closure included any soil sampling. JDG 11/3/05 Mr. Timlin forwarded an invoice showing 22,000 dollars of work had been performed relative to the release, however, the invoice is not clear if the contaminated soils were removed. Placed a call to NYCDEP on-site rep, Keith Williams (718)595-4755, and left a message for call back. JDG 12/29/05 Attempted to contact NYCDEP on-site rep, Keith Williams. A message was left. 12/29/05 Contacted the plumbing company (Arthur C. Klem, Inc., aka ALKLEM Plumbing, Inc., at 718-433-2400 to see if anyone remembered contaminated soils being removed. They will call back later today. JDG 12/30/05 Mr. Keith Williams of the NYCDEP returned my call. Mr. Williams remembered the site, but couldn't easily locate any documentation. Nonetheless, he felt certain that a major problem would not have been left behind. His recollection, plus the fact that \$22,000 worth of work was clearly performed, was deemed adequate for closing the site. JDG 12/30/05 "

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 05/13/2018	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704

Number of Days to Update: 92	Next Scheduled EDR Contact: 10/15/2018
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 05/18/2018	Source: EPA
Date Data Arrived at EDR: 05/30/2018	Telephone: 800-424-9346
Date Made Active in Reports: 06/22/2018	Last EDR Contact: 07/06/2018

	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 05/18/2018	Source: EPA
Date Data Arrived at EDR: 05/30/2018	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/28/2018	Telephone: (212) 637-3660

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

RES DECL: Restrictive Declarations Listing

A restrictive declaration is a covenant running with the land which binds the present and future owners of the property. As a condition of certain special permits, the City Planning Commission may require an applicant to sign and record a restrictive declaration that places specified conditions on the future use and development of the property. Certain restrictive declarations are indicated by a D on zoning maps.

VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.
